

Max

I ask your support in preserving the current Alternative Fuel Credit until the end of the year when it is set to run out.

This credit is helping to keep jobs here in the U.S. I am lucky to work for Domtar (Nekoosa)

Paper Mill in Wis. In June 2008 the Port Edwards Wis. Paper and Pulp mill closed for good and over 500 good paying jobs were lost. Pulp and Paper mills have been using renewable forest products for energy use for years and haven't been given enough credit for that.

We need YOUR HELP NOW!!

Thank you  
Paul Behselich
