

To The Congress of the United States of America.....
To Senate leaders Baucus and Grassley,,,

Please re-consider the proposal which eliminates the eligibility of black liquor fuel derived from the processing of pulp and paper as an Alternative Fuels Mixture Tax Credit. The Alabama River Pulp Mill has been a vital part of Monroe County beginning in 1977. The eliminating of this fuel from the tax credit would have a huge impact on wheather this mill could continue the process of making pulp for making paper. The economic situation we now have in Monroe County Alabama (and in the rest of the country) is a very bad timing for this proposal. I ask you as a voting citizen to please nix this proposal.
Thank you,

Bennie Casey
