

I am sending you my request to reverse and do not allow any money to be paid because of the "Black Liquor Tax Credit". Pulp mills should'nt be paid with tax money for something they have done since the day they started operations. This tax credit is putting unbelievable hardship on the papermills that are tuely trying to do all they can for the enviroment. I work at a papermill in Snowflake, Arizona that changed from a black liquor producing mill to a 100% recycled mill. This tax credit has given the black liquor mills the go-ahead to put us and other mill like us out of business. Who is doing the most for the enviroment? A mill that will continue to make black liquor after all the money is gone or the mills that don't make black liquor at all and don't need billions of tax payer money. Come on now! Is it really that hard to figure out? Do we need more rocket scientists in Washington to figure this out? Don't just hand out money to every bleeding heart comes along. Think first and then do what's right. Please stop this tax credit and don't pay anything to those that are taking unfair advantage just because they can. Thanks for your time and help. Sincerely, Lawrence DeWitt, Catalyst Paper Co.-Snowflake, Arizona (100% recycled)(NO BLACK LIQUOR, NO NEED FOR TAX DOLLARS) Keep the money for something more important.
