

Good afternoon,

I am employed by Domtar Paper Company, LLC. I ask for your support in preserving the current Alternative Fuel Mixture Credit. The pulp and paper industry outpaces every other industry in the production and use of renewable power. Our industry has shown leadership in the area of biomass utilization. This credit and other policies which provide incentives for our industry's use of biomass as a fuel source will allow our mill, and industry, to continue to innovate and lead the way in the area of renewable energy. Thank you.

Karen Grigorow
Enterprise Group
Midwest Sales Manager

Paper is a renewable resource. Print responsibly with Domtar Papers.
