

Facts:

- 1. The burning of black liquor has been done for over 60 years. Nothing new or additional investment.**
- 2. Only a very few Large Corporations have opportunities to benefit. Thus selective financial discrimination.**
- 3. The end user of the paper receive no benefits, only a few manufacturers.**
- 4. International Paper to receive over 1.2 Billion Dollars. They are using as a competitive advantage.**
- 5. Independent manufacture are at a great disadvantage. Only so many boxes will be produced. The economic aid will not create any more jobs, only who will produce them. This only benefits a very few large companies and is a great disadvantage to the rest of the manufactures. This can result in 20% to 25 % price advantage.**
- 6. This places all other manufacture in a great disadvantage. The consolidation of the industry the past few years makes this a unacceptable aid and against all small business that make profits and are taxed to support the large companies that use this aid to cut prices and take business from them.**
- 7. This has caused International concern . Canada, Mexico, and Europe have filed strong objections to this Government subsidy and are threatening retaliation.**

I have written many letters to my Congressman , Mike Pence, on this subject. As a entrepreneur owner for a Corrugated Company, it is a terrible condition that is totally unfair and a travesty to the American tax paying citizen.

This must be repealed and should demand full return of all tax credits issued.
