

Senators

I am 56 years old and have worked my entire career in the pulp and paper industry . During my years in the business capitalism as practiced in the United States has molded an industry that is environmenatly friendly , innovative and highly profitaable for both the employees and the owners of both the private and public companies both here and abroad . Your extension of enormous tax credits to a tiny handful of the largest US only companies as prescribed by your alternative fuels legislation poses an enormous threat to the vitality of this entire industry . Your largess to these few chosen busineeses puts the countless numbers of recycled paper mills , privately held small businesses that compete with the large companies various divisions and all non – US pulp paper and packaging companies existence at risk . All of this at an enormous cost to the US taxpayer and to no energy or environmental benefit to anyone. These tax credits must not only be stopped immediately but must be repaid to avoid irreparable harm to our industry.

Sincerely

Michael Hudson  
Sales Manager  
Jackson Paper Mfg . Co
