

Dear Senators,

I am writing to let you know that I would strongly disagree with the proposal to discontinue the " Alternative Fuel Mixture Tax Credit ". Imp an account manager for Domtar Paper and with so much pressure coming from off shore manufacturers, it would be unfortunate to see another industry take a back seat to foreign competitors that have the backing of their governments to continue to take market share in the United States.

I'm not one to complain about the political system that we have in this great country of ours, but at times I feel there is too much pressure from foreign interests to keep any business in this country from being slowly stolen away from us. Lets keep what we have and continue to support the hard working people who worked so hard to make this land of ours one that we can proudly call the " United States of America".
