

I have worked for this company for over thirty years, and by the grace of God I am still working.

I have seen many good employees effected by downsizing over the years, so I feel I have to e-mail in my feelings.

I am writing this in hopes that you will keep the Alternative Fuel Tax Credit.

I know that it is not creating jobs at our mill, but I feel that it is saving jobs.

I feel it is giving us time so that the economy will improve, and hopefully the paper industry.

I know that you hear this all the time, but this is a small town, and people will be effected if this mill is shut down.

Thank you.
