

The loophole in the 2005 Highway Bill being exploited by kraft paper mills is tantamount to the abuses of AIG in being given billions of dollars of taxpayer money to pay bonuses to their executives. I am appalled at government constantly allowing such financial atrocities. The paper mill I work at renovated to be 100% recycle several years ago. That renovation to help save the environment is now putting us out of business because the pulp mills that were permitted to twist this black liquor credit to their advantage are now collecting more money from the government subsidy than they are from producing paper. How on earth was this allowed to happen with a TRANSPORTATION bill????
