

As an employee of a paper manufacturer, I would like to encourage you to remove kraft paper mills from the list of eligible recipients of the alternative fuel tax rebate. We are a 100% recycled mill and run the risk of shutting down due to other paper companies using the tax rebate to drive down the cost of newsprint. It's unbelievable to think that companies using virgin pulp are getting such an enormous amount of funds to run recycled mills out of business. I know that was not the intent of the rebate. So please do the right thing and clarify or end this tax rebate.
