

As you can see from my email address, I work for a paper company.
Why are paper companies who have been good environmental stewards and leaders being excluded from the tax credit? Yes, this industry has been generating alternative fuel for decades.
What is wrong with rewarding our initiatives? We have been environmental leaders for decades.
Now, because it is not a new concept to the paper industry - we are not allowed to reap tax benefits.
How discouraging to those who are leaders!!
