

I am in support of the Alternate Fuel Tax Credit. Not only for employment security reasons, but for patriotic reasons as well.

I am proud to be an American, and want to see this county return to its position as a worldwide leader in product production. We are losing, or have lost, our footing in this area! We buy almost everything we consume!

Domtar proudly boasts, "Made in the United States of America" for over 70% of its manufactured papers. However, we are fighting to stay alive as one of the few product producing companies in America. We need help.

The tax credit has been a lifeline for Domtar. Designed to incentivize production of fish oil—a substance very similar in makeup to black liquor—this tax credit is critical for maintaining our facility's viability in this extraordinarily challenging economic environment.

Domtar's Woodland pulp mill resumed operations due largely to the company's certification by the United States Internal Revenue Service as alternative fuel blenders. The mill sustains good paying jobs in a rural community that depends on these jobs to drive economic activity in the area.

We ask your support in preserving the current Alternative Fuel mixture Credit until the end of the year when it is set to expire.
