

The pulp and paper industry far outpaces every other industry in production and use of renewable power. However, until now we have largely been unable to take advantage of incentives for renewable power. Currently, restrictions exist in the Section 45 renewable electricity tax credit which disqualify renewable biomass power that is generated and consumed on site—a practice we employ here at Domtar. Meanwhile, those that compete with us for wood fiber, such as independent power producers and facilities that make cellulosic transportation fuels, benefit fully from Section 45 and other production tax incentives.

Please consider allowing us to continue to take advantage of the incentives for renewable power.

Thanks
Rick Zelehoski
