

Dear Sirs:

technical corrections bills (H.R. 6264 & S. 4026) are to fix errors and ambiguities in the tax code.

One provision included in both bills would increase from 15 percent to 35 percent the tax rate on qualified export income for small business exporters! This provision is not a technical correction and should not be made part of the bill with that heading, or any other heading for that matter.

Please get real, and honest.

Brad Johnson
