EXPLANATION OF DISTRIBUTION OF FUNDS

Both the House and committee versions of the Revenue Sharing Act of 1972, H.R. 14370, effective January 1, 1972, provide for the distribution of funds to State and local governments over a 5-year period. Initially, the House bill provides that funds are to be distributed at an annual rate of \$5.3 billion; the committee bill provides for an initial revenue sharing distribution of this same amount, but also provides a supplementary sharing amount, replacing social service grants, which bring the total up to \$6.3 billion. Both the House and committee bills provide for one-third of this amount (\$1.8 billion under the House bill and \$2.1 billion under the committee bill) to be distributed to State governments. The remaining two-thirds is distributed to the localities (\$3.5 billion under the House bill and \$4.2 billion under the committee bill).

Both the House and the committee bills provide that the annual amount distributed after the first full year is to increase by \$300 million a year. Under the House bill, this increment was entirely allocated to the States; under the committee bill, this increment is divided between the States and localities, one-third going to the States and two-thirds to the localities. The aggregate distribution under the House bill, in the last half year of the 5-year period, is (on an annual rate basis) to be \$6.65 billion; under the committee action, this will be \$7.65 billion.

For the first full year of operation of regular revenue sharing, table 1 shows under the House and committee bills the distributions to the States for their own use, and the total distributions to each of the States for their localities. The amount shown for the committee bill includes the supplemental sharing amount, which becomes effective January 1, 1973.

The distributions to individual localities within each State under the committee bill are shown in the tabular material which comprises the bulk of this report (beginning at the end of this introductory explanation). Comparable distribution data under the House bill are available in Part 2 of the House committee report.

The State data in this report are arranged alphabetically with the breakdown of the amounts going to the localities within each State classified by county area (again arranged alphabetically). Municipalities are classified under the county in which they are located.

The data are shown on an annualized basis for the first entitlement period (January-June 1972) with the supplemental sharing amount which first becomes applicable January 1, 1973, but based on the funds distributed under the January-June 1972 entitlements.

VIII

TABLE 1.—ESTIMATED DISTRIBUTION OF FUNDS UNDER HOUSE AND COMMITTEE BILLS, BY STATE

(Amounts in millions of dollars)

¹ These figures show, on an annual rate basis, the revenue sharing distribution for the half year, Jan. 1, through June 30, 1972. The figures for the committee bill also include the supplemental sharing grant which first becomes effective Jan. 1, 1973.

² Local share includes amounts redistributed to States because of limitation. These amounts shown in the tabulation which follows on the first page for each State.

Note: Details may not add to totals because of rounding.

A full explanation of the committee bill formulas appears in Part 1 of this report (printed under separate cover). In general, however, the \$5.3 billion initially distributed to the States and localities under the committee's revenue sharing formula is distributed to the States, to the county area within each State, and to the municipalities and

townships within each county area under a single formula. This formula is population times tax effort times inverse relative income levels. One-third of the amount distributed to the States under this formula remains with the State governments for their own use. The remaining two-thirds is distributed under this same formula to county areas. The county area funds then are divided between the county government and the aggregate of the municipalities in the county area on the basis of the adjusted revenue raised by each. The division of the funds among the municipalities is made under the same formula as the division among county areas.

The committee bill provides that in no event is the per capita amount going to any county area, county government or municipal government to be less than 20 percent of the average per capita local amount for the State as a whole, or more than 145 percent of this average. In addition, the bill provides that in no event is the amount of regular revenue sharing funds going to any county government or municipality to be more than 50 percent of adjusted taxes from its own sources plus intergovernmental transfers. The same type of division as that made for municipalities is to be made for townships where these types of governmental units exist and raise taxes. The term "adjusted taxes" referred to here is taxes reduced by those set aside, or used, for education.

After the first year, the formulas indicated above used within a State may be modified by the State (by statute) where this is considered desirable to meet local problems. The States may substitute for the formula in the bill, a formula consisting of two factors: population multiplied by tax effort and population multiplied by inverse relative income levels. These factors may be weighted in any manner deemed desirable by the State. If the State substitutes an alternative formula for that provided in the bill, it may not, however, in the 5-year period subsequently change this formula.

Although distributions will be made to municipalities with a population under 2,500, the breakdown for the smaller municipalities is not yet available. Similarly, the distribution for townships also is not yet available. Distributions will, however, be made to any municipality or township where its entitlement amounts to \$200 or more. Although distributions will be made to municipalities first incorporated since 1967, the distributions these cities will receive is not yet available.

The tabulation which follows shows, by States, the grants from the Federal government to all local governments within each State. This tabulation is arranged alphabetically by State, and the table of contents, at the beginning of this explanation, indicates the pages on which the data for each State begin.

The information shown, and order in which shown, with respect to each State is as follows:

- (1) The total grants to local governments within the State.
- (2) The amount which is not made available to local governments within the States because of limitations provided in the bill and which as a result is available to the State for its own expenditure or for its redistribution to local governments as it sees fit. The limitation which results in these funds being diverted to the State is the limitation to the effect that the amount going to any local governmental unit may not exceed 50 percent of its adjusted taxes (i.e., adjusted to eliminate

those related to education) plus intergovernmental transfers. These amounts may ultimately be somewhat larger than shown since there may be amounts which municipalities under 2,500 in population and townships may not spend because of the limitation. Such amounts are not included in the totals redistributed to the States.

(3) The total amount going to all governmental units within each county area. The county areas are arranged alphabetically within each State.

(4) The total amount going to the county government itself.

(5) The total amount going to all municipal governments in the county with populations of over 2,500.

(6) The total amount going to all municipal governments with populations of under 2,500.

(7) The total amount going to all townships in the county. Where there are no townships or the township government does not raise any revenue, a "0" is shown for this entry.

(8) A breakdown of the amount going to each municipal government within the county with a population of over 2,500 is shown. (Distributions also are to be made to smaller municipalities, but this is not shown in this tabulation.) Some municipalities are located in more than one county. Where this is true, the name of the city is followed by the word "(Part)." In such a case, it is necessary, in order to obtain the total payment going to the city, to add together the amounts going to it from the two or more applicable county areas.
