To amend the Tariff Schedules of the United States to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled within the United States if duty was paid on such replacement engine during a previous importation

Present law.—Imports of aircraft engines are dutiable at 4 percent ad valorem under column 1 (applicable to imports from countries accorded nondiscriminatory (MFN) tariff treatment) of Tariff Schedules of the United States (TSUS) item 660.44 (piston type engines) and at 5 percent ad valorem under column 1 of TSUS item 660.46 (nonpiston engines). Column 1 imports of aircraft engines produced in a beneficiary developing country are eligible for duty-free treatment under the Generalized System of Preferences. Aircraft engines imported from a non-MFN country (most Communist countries) are subject to a column 2 rate of duty of 35 percent ad valorem.

House bill.—Adds a new item 801.20 to the TSUS permitting duty-free entry of an aircraft engine if:

- (1) The engine was previously imported and duty was paid on the importation;
- (2) The engine was used abroad as a temporary replacement for an aircraft engine being repaired in the United States;
- (3) The engine has not been advanced in value or improved in condition while abroad; and
- (4) The engine is imported by the person who previously exported the engine.

Effective date.—Date of enactment.

Revenue effect.—An annual loss of approximately \$2.5 million.

Previous bill.—H.R. 2181, 94th Congress, contained the same provisions as H.R. 422. It passed the Senate on October 1, 1976, with amendments and died in the House.

H.R. 5289

For the relief of Joe Cortina of Tampa, Fla.

Present law.—Joe Cortina, a customs broker, is the importer of record of musical instruments entered between October 1971, and October 1973. The instruments were imported from a West German firm for a Tampa company which is now defunct. The individual who owned both firms is now dead. After entry, the dutiable value and the duty payable on the instruments was increased when the Customs Service discovered that, without Mr. Cortina's knowledge, commissions were paid on the shipments which should have been included in the value of the imports for duty purposes. Further, the Customs Service discovered that, although the goods were recorded as being exported from West Germany, the country of origin was in some cases East Germany. Because imports of musical instruments from East Germany are subject to a higher rate of duty (40 percent ad valorem) than imports of musical instruments from West Germany (5 to 17 percent ad valorem) the duty payable by Mr. Cortina was again increased. Mr. Cortina became subject to an additional \$46,000 in duties as a result of circumstances unknown to him at the time of entry, and it is alleged that this would financially ruin him, because he apparently has no insurance and no recourse against either the domestic firm he represented, now dissolved, or against the owner of the firm, now deceased.

House bill.—Provides for the liquidation or reliquidation of 29 entries of musical instruments made in the name of Joe Cortina. The entries are to be appraised at invoice unit prices, net, packed, and are to be subject to the rates of duty applicable to imports from West Germany.

Effective date.—Date of enactment.

Revenue effect.—One-time loss of approximately \$46,000.

H.R. 5322

To provide duty-free treatment for istle

Present law.—Imports of crude istle fiber, a plant fiber used in cordage and as upholstery padding, receive duty-free treatment under column 1 and column 2 of TSUS item 192.65. Imports of processed istle fiber, used as bristles in a variety of brushes and brooms, are dutiable at 20 percent ad valorem under column 1 and column 2 of TSUS item 192.70, unless the istle is imported from a beneficiary developing country eligible for duty-free treatment under the Generalized System of Preferences. Most imports come from Mexico, which is eligible under GSP for duty-free treatment. Under TSUS 903.90, the column 1 and column 2 rates of duty on istle are suspended until July 1, 1978. The suspension of duty has been in effect for nearly 20 years as a result of repeated short suspensions provided for in a series of tariff bills.

House bill.—Repeals TSUS items 192.65, 192.70, and 903.90. Adds a new TSUS item 192.66 which provides for duty-free treatment under column 1 and column 2 of istle fibers whether crude or processed.

Effective date.—Date of enactment.

Revenue effect.—No loss of revenue.

S. 594

To authorize the President to designate any of certain countries as eligible for the tariff preferences extended to developing countries under title V of the Trade Act of 1974 if the President determines that such designation is in the national economic interest

Present law.—Section 502(b) of the Trade Act of 1974 prohibits the designation as a beneficiary developing country, for the purpose of receiving duty-free treatment under the Generalized System of Preferences, of any country that is a member of the Organization of Petroleum Exporting Countries (OPEC), or other cartel arrangement, if such country participates in any action pursuant to such arrangement the effect of which is—

(1) to withhold supplies of vital commodity resources from international trade, or

(2) to raise the price of such commodities to an unreasonable level which causes serious disruption of the world economy.

Senate bill.—Would amend section 502(b) to authorize the President to designate as a beneficiary developing country any country which is a member of OPEC or other cartel arrangement if that country has not and does not participate in an action the effect of which is to withhold supplies of a vital commodity from international trade, such as an embargo. The President must determine that such designation will be in the national economic interest of the United States. The effect of S. 594 would be to permit the President to designate nonembargoing OPEC countries as beneficiary developing countries eligible for GSP. Those countries are Ecuador, Gabon, Indonesia, Iran, Nigeria, and Venezuela.

Effective date.—Date of enactment.

Revenue effect.—Annual loss of approximately \$3,000,000, based on 1976 import levels.

S. 843

To permit the free entry of Canadian petroleum (including reconstituted crude petroleum) and crude shale oil, provided that an equivalent amount of the same kind and quality of domestic crude petroleum and crude shale oil has been exported to Canada

Present law.—Imports of crude petroleum and crude shale oil are dutiable under column 1 of TSUS item 475.05 and 475.10 at 0.125 cents or 0.25 cents per gallon, depending on viscosity. In addition to these duties, about half of the crude petroleum imports are subject to a license fee of 21¢ per barrel which is administered by the Federal Energy Administration. For such imports, the TSUS duty is, in effect, deducted from the license fee. License fees have not been applicable to imports from Canada since May 1, 1976.

Senate bill.—Amends the TSUS by adding new item 475.12 providing for duty-free treatment for Canadian crude petroleum (in-

cluding reconstituted crude petroleum) and Canadian crude shale oil if an equivalent amount of the same kind and quality of domestic or duty paid foreign crude oil or crude shale oil has been exported to Canada from the United States during the 30-day period preceding the date of entry. The purpose of S. 843 is to assure a continued Canadian crude petroleum supply at the lowest cost to those U.S. refiners located near the Canadian border.

Effective date.—Date of enactment.

Revenue effect.—Certain Canadian crude petroleum imports which are now dutiable would be duty-free under S. 843, resulting in a loss of revenue. However, for each barrel imported duty-free from Canada, the bill would require a barrel of similar crude petroleum, some of which could be foreign duty paid petroleum, to be exported from the United States to Canada. Sufficient data to estimate revenue effect are not available.

S. 1302

To provide a temporary suspension of the duty on chlorendic acid

Present law.—Imports of chlorendic acid made from benzene, used as a flame retardant in certain polyester resin products, e.g., aircraft and electrical components are dutiable under TSUS item 403.80 at a column 1 rate of duty of 1.7 cents per pound plus 12.5 percent ad valorem and a column 2 rate of duty of 7 cents per pound plus 40 percent ad valorem. Articles classifiable under TSUS item 403.80 are subject to valuation on the basis of American Selling Price (ASP). Imports of chlorendic acid made from butane are dutiable under TSUS item 425.99 at a column 1 rate of duty of 6 percent ad valorem and a column 2 rate of duty of 25 percent ad valorem.

Senate bill.—Adds new item 906.00 to the Appendix to the TSUS, providing duty-free treatment for imports of chlorendic acid entered under column 1 or column 2 on or before December 31, 1978.

Effective date.—Day after the date of enactment.

Revenue effect.—Annual loss of approximately \$400,000.

S. 1519

To suspend until the close of December 31, 1978, the duty on certain field glasses, opera glasses, binoculars and other telescopes

Present law.—Field glasses, opera glasses, binoculars and telescopes are dutiable under TSUS items 708.51, 708.52, and 708.53 at column 1 rates ranging from 8.5 percent to 20 percent ad valorem. Column 1 imports under all three items are eligible for duty-free treatment if imported from a designated beneficiary developing country under the Generalized System of Preferences.

Senate bill.—Adds new item 912.06 to the Appendix to the TSUS providing for duty-free treatment for imports of field glasses, opera glasses, prism binoculars, and other telescopes not designed for use with infrared light, entered under column 1 before January 1, 1979.

Effective date.—Date of enactment.

Revenue effect.—Annual loss of approximately \$3 million.
