Statistical Information

Total Federal, State, and local expenditures, 3 major programs (chart)-----	2
Tables:	
1. Number of recipients--selected welfare programs, December 1973-June 1979-----	4
2. Expenditures for selected social welfare programs, 1973-81-----	5
3. Federal medical assistance percentages, 1956-1981-----	7
4. Aid to families with dependent children (AFDC) total benefit payments and source of funds, by State, fiscal year 1978-----	12
5. Aid to families with dependent children (AFDC) expenditures for State and local administration, by State, fiscal year 1978-----	15
6. Aid to families with dependent children (AFDC) total benefit payments and source of funds, by State, fiscal year 1977-----	18
7. Aid to families with dependent children (AFDC) administrative expenditures and source of funds, by State, fiscal year 1977-----	21
8. Aid to families with dependent children: recipients of cash payments and amount of payments, by State, May 1979-----	24
9. Aid to families with dependent children, unemployed father segment: recipients of cash payments and amount of payments, by State, May 1979-----	27
10. Aid to families with dependent children: percentage change in number of recipients and amount of cash payments, by State, May 1979 from earlier months-----	28
11. Maximum potential benefits, AFDC and food stamps, 4-person family, July 1979-----	30
12. Maximum potential benefits, AFDC and food stamps, 4-person family, July 1978-----	32
13. Children at home, as a percent of all children, nationally and by State-----	34
14. WIN characteristics, 1969-71-----	35
15. Percent of the nation's labor force age 16 or older force in use of state and federal child support programs-----	36
16. Child support by income: 10 percent children-----	37

17. Employment status of AFDC mother by usual occupation-----	37
18. Emergency assistance: Families receiving assistance and amount of payments, by State, May 1979-----	38
19. AFDC--April-September 1978 payment error rates compared with January-June 1978 payment error rates, by State-----	40
20. AFDC--April-September 1978 case error rates compared with January-June 1978 case error rates, by State-----	43
21. AFDC--estimated April-September 1978 expenditures and erroneous payments to assistance recipients, by State-----	46
22. Case closings due to increased earnings of AFDC mothers, number and percent: October-December 1973, 1975, and 1978-----	48
23. Work incentive program data, fiscal years 1971-78-----	52
24. WIN participants and job entrants by selected characteristics, fiscal year 1978-----	53
25. Work incentive program: Basic registration and employment statistics, fiscal years 1977 and 1978-----	54
26. Hourly entry wages of WIN job entrants, by selected characteristics, Sept. 30, 1978-----	55
27. Impact of CETA participation on AFDC status-----	56
28. Child support enforcement collections, fiscal years 1978 and 1979-----	58
29. Child support enforcement expenditures, fiscal years 1978 and 1979-----	60
30. Child support collections and AFDC payments, May 1979-----	61
31. Supplemental security income for the aged, blind, and disabled: Number of persons receiving federally administered payments and total amount, by reason for eligibility, October 1979-----	65
32. (A) Supplemental security income for the aged, blind, and disabled: Amount of payments, Federal SSI payments, and federally administered State supplementation, by State, October 1979-----	65
(B) Supplemental security income for the aged, blind, and disabled: Number of persons receiving federally administered payments, by reason for eligibility and State, October 1979-----	67
33. Supplemental security income for the aged, blind, and disabled: Amount of total payments, Federal SSI payments and State supplementary payments, 1974-79-----	70
34. Supplemental security income benefits: Total benefits, State supplements, and share of total paid by United States, fiscal year 1977-----	72
35. Supplemental security income: Amount of combined Federal SSI payments, and federally administered State supplementation, by reason for eligibility and State, calendar year 1978-----	74
36. Maximum potential benefits, SS, and food stamps, individual living independently, July 1979-----	75
37. Supplemental security income—Summary of error rates-----	78
38. Food stamp recipients and benefits, by State: June 1979-----	80
39. Food stamp program—Summary of benefit costs, participation and administrative costs—Fiscal year 1979-----	83
40. Food stamp recipients and average monthly benefits: Fiscal years 1970-79-----	86
41. Federal food stamp expenditures: Fiscal years 1970-79-----	86
42. General assistance: Recipients of cash payments and amount of payments, by State, May 1979-----	88
43. General assistance: Average monthly number of recipients of cash payments and aggregate amount of payments, by State, calendar year 1978-----	91
44. General assistance (including Medicaid) payments (including intermediate care facility, serv. est., b, State and source of funds, fiscal year 1977)-----	95

45. Medical assistance payments (medicaid) administrative expenditures, by State and source of funds, fiscal year 1977-----	98
46. Basic medicaid eligibility coverage by State, January 1979-----	101
47. Total medical vendor payments, by program, 1951-78-----	102
48. Number of medicaid recipients, by basis for eligibility, fiscal year 1979-----	104
49. Social services: Federal allocation by State-----	106
50. Title XX services costs (including child day care)-----	108
51. Title XX services: Percentage distribution of Federal funds by 3 major categories of recipients, fiscal years 1976, 1978, and 1979-----	108
52. Title IV-B-Child welfare services: Federal expenditures-Fiscal years 1978-79-----	109
53. Child welfare services: State estimates of total expenditures reported under the title IV-B program from all sources, fiscal year 1979-----	111
54. Estimated weighted average thresholds at the poverty level in 1979 by size of family and sex of head, by farm-nonfarm residence-----	114
55. Persons below the poverty level, 1959-77-----	115
56. Family relationship and presence of parents, for persons under 18 years old, by age and race, March 1978-----	118

PUBLIC ASSISTANCE PROGRAMS

I. Introduction

A. GENERAL DEVELOPMENT

The Social Security Act of 1935 provided for the establishment of federally assisted cash assistance programs for the aged and blind, and for dependent children. The act has been amended many times in the last 40 years, expanding and altering somewhat the character and emphases of the original programs.

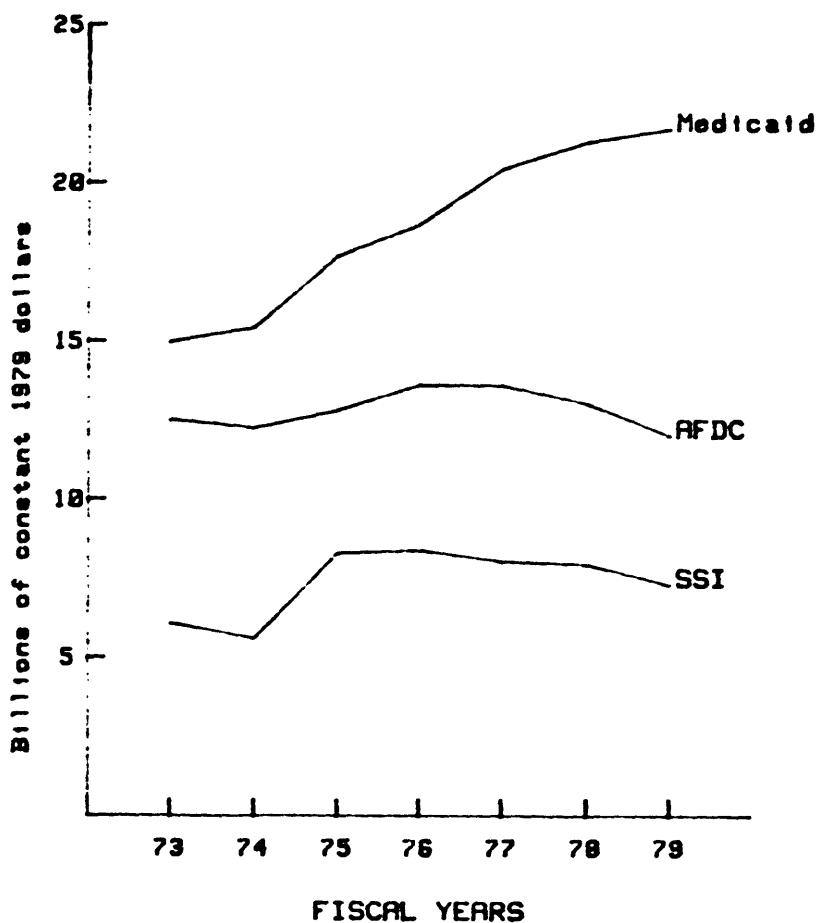

The present Social Security Act includes title IV, which authorizes Federal matching funds to States for (1) cash assistance to families with children (aid to families with dependent children-AFDC), (2) child welfare services, (3) the work incentive (WIN) program to provide employment for welfare recipients, and (4) services to both AFDC and non-AFDC families for the collection of child support and the establishment of paternity. Title XVI provides for a federally funded and federally administered program of cash assistance to the aged, blind, and disabled (supplemental security income-SSI), and title XIX authorizes Federal matching for State administered programs of medical assistance (medicaid) generally aimed at providing services for persons eligible to receive cash assistance under titles IV and XVI. In addition, title XX provides funds for State programs of social services to both welfare and nonwelfare families and individuals.

Other important sources of assistance to those with limited income are the food stamp program and the earned income tax credit.

The following tables show changes that have occurred in these programs since 1973 in terms of enrollment and expenditures. AFDC has been showing a declining number of recipients since 1975 (although the Administration projects a slight increase in 1980 and 1981). The number of recipients of SSI has remained stable. The medicaid program has grown significantly, and the food stamp program enrollment has shown considerable volatility. The most recent increases have been attributed to a large degree to changes in the 1977 food stamp reform law. (See table 1.)

Overall, the dollar expenditures for all of these programs have grown by impressive percentages on a current dollar basis. (See table 2.) However, as the following chart shows, in constant (1979 dollars) the AFDC and SSI programs have actually experienced decreases.

TOTAL FEDERAL, STATE, AND LOCAL EXPENDITURES,^a 3 MAJOR PROGRAMS^b
 (Billions of constant 1979 dollars^{c,d})

^a Including administrative costs.

^b Constant 1979 dollars based on the Consumer Price Index.

^c The above chart is based on the following expenditure data shown in billions of constant (1979) dollars. (The SSI program did not begin operation until Jan. 1, 1974. Prior to that date payments were made to recipients under State-administered programs of aid to the aged, blind, and disabled.)

Fiscal year	Constant 1979 dollars (billions)		
	Medicaid	AFDC	SSI
1973	14.97	12.50	6.00
1974	15.41	12.24	5.50
1975	17.68	12.79	8.30
1976	18.67	13.50	8.39
1977	20.44	13.50	8.63
1978	21.29	13.01	7.98
1979	21.70	12.00	7.30

B. FEDERAL-STATE MATCHING REQUIREMENTS

The funding provisions for these major public welfare programs are varied. The medicaid and AFDC programs receive Federal matching on the basis of the so-called "medicaid formula." The States were authorized to use the medicaid formula for their AFDC cash assistance programs in 1965, as part of the same legislation which created the medicaid program. Under the medicaid formula the Federal share of AFDC payments or of medical vendor payments made by the State is determined in such a way as to provide a higher percentage of Federal matching to States with low per capita incomes, and a lower percentage of Federal matching to States with higher per capita incomes. Under the formula, if a State's per capita income is equal to the national average per capita income, the Federal share would be 55 percent. If a State's per capita income exceeds the national average, the Federal share is lower, with a statutory minimum of 50 percent. If a State's per capita income is lower than the national average, the Federal share is increased, up to a maximum of 83 percent. At the present time no State is entitled to receive more than 77.55 percent.

The actual formula used in determining the State and Federal share is as follows:

$$\text{State share} = \frac{(\text{State per capita income})}{(\text{National per capita income})} \times 45 \text{ percent}$$

Federal share = 100 percent minus the State share (with a minimum of 50 percent and a maximum of 83 percent)

The formula provides for squaring both the State and national average per capita incomes; this procedure magnifies any differences between the State income and the national average. Consequently, Federal matching to lower income States is increased, and Federal matching to higher income States is decreased. However, the statutory minimum of 50 percent eliminates much of the impact on higher income States.

Table 3 shows the Federal medical assistance percentages in effect since enactment. As can be seen, the percentages applicable to some States have changed substantially over time, reflecting changes in relative per capita incomes. For example, Virginia's percentage has dropped from 66.96 to 56.54 percent. These percentages apply to AFDC cash assistance and to medical vendor payments only. Administrative costs are generally matched by a 50 percent Federal contribution with certain exceptions.

With respect to Federal matching of AFDC cash payments only, there are four States which have elected to continue to use the formula which is provided in the AFDC law. It also includes State per capita income as a factor, but it is more advantageous than the more recently enacted and alternative medicaid formula to States which have very low average assistance payments (three States), and has been used by Arizona because that State has no medicaid program and therefore is not eligible to use the medicaid formula for its AFDC program.

Briefly, other major programs are funded as follows:

The basic Federal SSI payments are fully federally funded. However, States may elect to supplement these payments. Levels of

State supplementation are determined by the States (and localities, in some instances) and vary widely.

The work incentive program has 90 percent Federal matching, with 10 percent matching required by the States. In general, the title XX social services program provides for Federal matching of 75 percent, with States and localities providing 25 percent. Food stamp benefits are 100 percent federally funded, while general assistance benefits are fully funded by States and localities.

All of these programs are described in the material which follows. Detailed State-by-State expenditure information is provided for each program for the most recent period for which it is available.

**TABLE 1.—NUMBER OF RECIPIENTS—SELECTED WELFARE PROGRAMS,
DECEMBER 1973–JUNE 1979**

[In millions]

	December						June 1979
	1973	1974	1975	1976	1977	1978

II. Aid to Families with Dependent Children

The program of aid to families with dependent children (AFDC) provides Federal matching for State programs of cash assistance to needy families with children in which at least one parent is deceased, disabled, or absent from the home. States, at their option, may also provide benefits for families in which dependency arises from the parent's unemployment. (The statute limits the program to families in which the *father* is unemployed. A recent Supreme Court decision has broadened the program to cover families with unemployed mothers.) Twenty-five States plus Guam and the District of Columbia have elected to provide benefits to families with unemployed parents. States establish their own income and resource criteria for use in determining eligibility for AFDC.

The amount of Federal matching for AFDC benefits varies from State to State under formulas providing higher percentages in States with lower per capita income. In 1978, 15 States with the highest income received the minimum Federal matching of 50 percent; Mississippi received the highest matching of all States—about 82 percent. For all States, the percentage of benefits paid for by the Federal Government was about 54 percent. In 1978, local governments contributed about 8 percent of the cost of AFDC benefits.

In recent years the AFDC caseload has been declining. In December of 1975 there were 11.4 million AFDC recipients. Two years later the number had decreased to 10.8 million. By July of 1979, the number had declined again to 10.2 million. The cost of AFDC in constant dollars, in contrast to current dollars, has been declining. In 1973 the cost of the program in 1973 dollars was \$7.6 billion, and increased to \$12.0 billion in 1979 dollars. In constant 1979 dollars, however, AFDC program costs actually declined slightly from \$12.5 billion in 1973 to \$12.0 billion in 1979.

The AFDC caseload is largely concentrated in a few States. California and New York alone account for nearly one-quarter (24 percent) of the national caseload. These two States, plus Illinois, Michigan, New Jersey, Ohio, and Pennsylvania, make up more than half (52 percent) of the national total. Expenditures for benefits are similarly concentrated. In 1978, recipients in New York and California received one-third (33 percent) of all AFDC benefits paid in the United States. Recipients in these two States, plus the five listed above, received 62 percent of the benefits paid to all recipients in the United States in 1978.

The makeup of the AFDC population has undergone some important changes in recent years. Average family size has dropped from four persons per AFDC family in 1969 to 3.1 persons in 1977. The percentage of families in which the father is absent has continued to increase, from 77 percent in 1969 to 85 percent in 1977. The percentage of mothers who are employed either part or full time increased between 1969 and 1973, but since has dropped from about 16 to 14 percent. In 1969 only 53 percent of AFDC families participated in the food stamp or commodity food programs. In 1977, 74 percent were participating and this percentage is expected to increase substantially as the result of the elimination of the purchase requirement under 1977 food stamp reform legislation.

Since the implementation of quality control measures in 1973, the amount of AFDC money which has been spent in error has decreased significantly, from 16.5 percent in April-September 1973 to 9.4 percent in April-September 1978 (using a new and more rigorous definition of "error" in the latter period). The percentage of payments made in error varies greatly among the States. In the April-September 1978 period California made only 3.7 percent of its payments in error (with only 1 percent being paid to ineligible families) while Alaska made erroneous payments amounting to 31.2 percent of all payments, and the District of Columbia made erroneous payments amounting to 22.4 percent of all payments.

¹ As of July 1979 unless otherwise indicated. Maximum paid to a family with zero countable income.

² Food stamp benefits assume deductions of \$160 monthly (maximum allowable in July-December 1979). \$70 standard allowance plus \$90 deduction for excess shelter costs and/or dependent care) in the 48 contiguous States and D.C. In the remaining 5 jurisdictions these maximum deductions were assumed: Alaska, \$280; Hawaii, \$230; Guam, \$250; Puerto Rico, \$75; and Virgin Islands, \$125. If only the \$70 standard deduction were assumed, food stamp benefits would drop by \$27 monthly in the 48 contiguous States and D.C. Maximum food stamp benefits in the last half of 1979 were \$204 monthly for a family of 4 except in these 5 jurisdictions, where they were as follows: Alaska, \$288; Hawaii, \$277; Guam, \$286; Puerto Rico, \$190; and Virgin Islands, \$251.

³ Highest of area standards within the State

⁴ Higher in winter. Winter AFDC maximum benefits are \$347 in Rhode Island and \$518 in Rhode Island.

⁵ Annual total does not reflect higher winter benefits.

⁶ Indiana's maximum AFDC payment rose to \$315 on Jan 1, 1980.

⁷ As of August 1979

⁸ Washtenaw County (Ann Arbor)

⁹ Effective in October 1979 Michigan payments rose to a maximum of \$531 in Ann Arbor and \$501 in Detroit.

¹⁰ Suffolk County

¹¹ Oregon payment is for a mother and three children, aged 7-12. The State varies payments by age of child.

¹² Pennsylvania's maximum AFDC payment rose to \$395 on Jan 1, 1980.

¹³ Figure reflects November 1979 increase retroactive to July 1979.

¹⁴ Fairfax and Arlington Counties supplement these benefits.

* Indian State	5,469	3,642	67	3,972	¹⁰ 2,145	1,497

¹ U.S. funding share calculated on basis of medicaid formula unless otherwise marked.

² Food stamp bonus benefits are based on the Food Stamp Act of 1977 and assume use of maximum deductions (standard deduction plus excess shelter/dependent care deduction) \$140 monthly in the 48 States and D.C., \$250 in Alaska, \$210 in Hawaii, \$225 in Guam, \$70 in Puerto Rico, and \$115 in the Virgin Islands. Food stamp benefits would be smaller for families without the maximum deduction.

* U.S. funding share based on actual U.S. share paid in fiscal year 1976. (State did not use medicaid matching formula for AFDC in last quarter fiscal year 1978).

* Highest of area standards within the State.

* Summer rates annualized. Higher winter rates raise the annual total to \$3,779 in Colorado and \$4,538 in Rhode Island.

* Washtenaw County (Ann Arbor)

* Suffolk County

* As of October 1978

* Some Maryland and Virginia counties supplement these AFDC benefits.

¹⁰ Federal share of national average AFDC benefits (54 percent)

51. Wyoming	2.9	3.4	3.5	3.4	2.5

¹ Percentages calculated on the basis of all children in each State under age 20.

Source Prepared by the Social Security Administration.

TABLE 14.—AFDC CHARACTERISTICS, 1969–77

	May 1969	Jan 1973	May 1975	Mar 1977	Per- centage change of 1977 from 1969
Average family size (persons)	4.0	3.6	3.2	3.1	-22
Incidence of fathers (percent):					
Absent	¹ 77.1	² 80.5	² 83.3	84.7	(6)
Not married to the mother	¹ 27.9	² 31.5	² 31.0	33.8	(6)
Incidence of working mothers (per- cent):					
With full-time jobs	7.5	9.8	10.4	8.4	12
With part-time jobs	5.8	6.3	5.7	5.3	-9
Actively seeking work, or in school or training	9.2	11.5	12.2	10.6	15
Median number of months on AFDC ³	23	24	31	25.2	10
Race (percent):					
White	* 49.2	46.9	50.2	56.6
Black	46.2	45.8	44.3	43.0
Incidence of households (percent):					
Living in public housing	* 12.8	13.6	14.6	14.9	16

See footnotes at end of table.

TABLE 14.—AFDC CHARACTERISTICS, 1969–77—Continued

	May 1969	Jan 1973	May 1975	Mar 1977	Per- centage change of 1977 from 1969
Participating in food stamp or donated-food program.....	52.9	68.4	75.1	74.0	40
Including nonrecipient mem- bers.....	33.1	34.9	34.8	NA	NA
Average family AFDC grant.....	\$170.90	\$188.90	\$211.28	\$236.32	38
Average grant per recipient.....	\$42.10	\$53.43	\$64.78	\$75.86	76

¹ Calculated on the basis of total number of families.

² Calculated on the basis of total number of children on the basis of total number of families; the January 1973 percentages would be 83.0 where the father was absent and 34.7 where the father was not married to the mother.

³ Since most recent enrollment.

⁴ Excludes Puerto Rico and the Virgin Islands.

⁵ As of 1971 item not available for 1969.

⁶ Percentages not on a comparable basis.

Source: Congressional Research Service, based on AFDC recipient characteristic studies, conducted by the Department of Health, Education, and Welfare.

TABLE 15.—PERCENT OF AFDC MOTHERS UNDER AGE 40 OUT OF LABOR FORCE, BY AGE OF MOTHER AND NUMBER OF CHILDREN*

Age	Number of children						
	One	Two	Three	Four	Five	Six	Seven +
Under 20	79.7	79.4	80.7	(¹)	(¹)	(¹)	(¹)
20 to 24	77.2	73.8	79.5	86.9	(¹)	(¹)	(¹)
25 to 29	65.7	58.5	63.3	73.0	75.5	78.7	(¹)
30 to 34	57.8	50.4	49.7	60.2	64.0	68.8	69.8
35 to 39	52.5	41.5	48.9	50.4	55.3	59.4	58.1
							79.3

* Out of labor force means mothers who were neither working nor looking for work.

¹ For women under the age of 30, only an insignificant number had more than the listed number of children.

Source: Based on data from the March 1977 survey of AFDC recipients conducted by the Department of Health, Education and Welfare.

TABLE 16.—AFDC MOTHERS BY NUMBER OF RECIPIENT CHILDREN

	Number of children	Percent of universe
Total		100.0
One		39.2
Two		27.7
Three		16.4
Four		8.5
Five		4.6
Six		2.0
Seven +		1.6

Source. Based on data from the March 1977 survey of AFDC recipients conducted by the Department of Health, Education, and Welfare.

TABLE 17.—EMPLOYMENT STATUS OF AFDC MOTHER BY USUAL OCCUPATION

Usual occupation	Percent of universe	Percent in labor force ¹	Percent employed
Total	100.0	26.6	54.9
White collar	15.4	47.5	67.2
Blue collar	12.1	38.6	54.9
Farm	1.4	22.7	37.9
Service	15.5	43.0	63.0
Private household	3.6	47.8	67.0
Unknown	27.9	15.9	33.1
Never employed	24.1	6.0	0.0

¹ In labor force means persons either working or looking for work.

Source. Based on data from the March 1977 survey of AFDC recipients conducted by the Department of Health, Education, and Welfare.

III. Work Incentive (WIN) Program

The work incentive (WIN) program was originally enacted by Congress in 1967 with the purpose of reducing welfare dependency through the provision of manpower training and job placement services. In 1971 the Congress adopted amendments aimed at strengthening the administrative framework of the program and at placing greater emphasis on immediate employment instead of institutional training, thus specifically directing the program to assist individuals in the transition from welfare to work. In the same year, Congress also provided for a tax credit to employers who hire WIN participants. This credit was expanded under P.L. 95-600.

The 1971 amendments required that all persons at least 16 years of age and receiving AFDC benefits must register for WIN, unless legally exempt by reason of health, disability, needed in the home, advanced age, student status, or geographic location. Registrants selected for participation in WIN must accept available jobs, training, or needed services to prepare them for employment. Refusal to do so without good cause will result in termination of their AFDC payments.

Since these amendments were enacted, there has been a significant increase in the number of persons placed in employment with resultant savings in AFDC funding.

The administration estimates that in fiscal year 1978 about \$364 million was spent for WIN, including \$247 million for training and employment services, and \$117 million for supportive services, including child care.

In fiscal year 1973, according to Labor Department statistics, 137,000 WIN registrants entered employment, increasing to 294,000 in 1978. State WIN agencies may provide employment and training services directly, or they may contract with prime sponsors who are authorized to provide such services under the Comprehensive Employment and Training Act (CETA).

Program statistics show that about 74 percent of those registered for WIN are female, and 73 percent are age 22 to 44 years. Nearly 60 percent have completed less than 12 years of school. About 17 percent are participating on a voluntary basis.

IV. Child Support

The child support enforcement program, enacted near the close of the 94th Congress as title IV-D of the Social Security Act, mandates an aggressively administered program at both the Federal and State levels. The program provides for child support services, including support collection and establishment of paternity, for both AFDC and non-AFDC families. It leaves basic responsibility for these activities with the States, but provides for an active role on the part of the Federal Government in monitoring and evaluating State programs, in providing technical assistance and, in certain instances, in undertaking to give direct assistance to the States in locating absent parents and obtaining support payments from them. There is also provision for financial penalties to be imposed on States which, as a result of a Federal audit, are shown not to have an effective child support program.

To assist and oversee the operation of the State program, the Department of Health, Education, and Welfare is required to establish a separate organizational unit under the direct control of an individual who has been designated by, and reports directly to, the Secretary. In the most recent reorganization of the Department of Health, Education, and Welfare, this responsibility was placed with the Commissioner on Social Security. The Office of Child Support Enforcement reviews and approves State plans, evaluates and audits implementation in each State, and provides technical assistance to the States. There is also a legislatively mandated parent locator service within the child support office.

The implementation of the child support program since 1975 has been highly successful in many States. Overall, in fiscal year 1979 States reported collecting a total of \$1.3 billion in child support payments, with \$600 million being collected in support of AFDC families, and more than \$700 million for non-AFDC families. The cost of collecting these payments was \$366 million, 75 percent of which was paid by the Federal Government. Between 1978 and 1979 child support collections for both AFDC and non-AFDC families increased by 27 percent. In 1979 the program collected \$3.65 for every \$1 spent on administration.

The number of AFDC families being served by the child support program has been increasing steadily. This increase is anticipated to continue. A total of 529,000 families had collections made in their behalf in 1979. It is estimated that the number will increase to 639,000 families in 1981.

¹ Data not reported by Alaska, North Dakota, and South Dakota, reporting waived for Guam, Puerto Rico, and the Virgin Islands.

² Estimate

Note—Most of the amount collected is used to reimburse Federal and State governments for their shares in current and past AFDC payments. Part of the Federal share is then paid to States and political subdivisions as incentives, which amount to 15 percent of the collections made by political subdivisions or by one State on behalf of another. Nationally, about 5 percent of the total amount collected is paid to recipients. In some States this percentage is higher because of payments to recipients pursuant to Section 402(a)(28) of the Social Security Act, which insures against reductions in aid.

V. Supplemental Security Income

The supplemental security income (SSI) program is a federally administered income support program for the aged, blind, and disabled. The program was enacted in 1972 and became effective on January 1, 1974, replacing the former State-administered programs of aid to the aged, blind, and disabled.

The SSI program guarantees needy aged, blind, and disabled persons a minimum monthly income of \$208.20 for a single individual or \$312.30 for a married couple. These are the basic Federal guarantee levels. In many States, however, higher levels prevail as a result of State action to supplement the basic Federal support levels. States may elect to administer their supplementary payments as a separate program or to contract for Federal administration by the Social Security Administration (SSA) so that the monthly payment of Federal and State benefits combined is included in a single check issued by the Federal Treasury.

The amount actually payable to a given recipient is determined by subtracting from the overall income support level the amount of income the individual has from other sources. In making this computation, some types of income are not counted. For example, there is excluded the first \$20 of monthly income from any source (such as from social security benefits) and certain proportions of income from wages. As a result, the total income of an individual who has some other source of income will always be somewhat higher than the total income of an individual who is entirely dependent upon SSI benefits.

In calendar year 1978, the SSI program paid \$4.9 billion in Federal benefits and another \$1.5 billion in federally administered State supplementary benefits.

The total number of individuals receiving SSI has remained relatively stable over the last four years. In January 1975 there were about 4.0 million aged, blind and disabled recipients receiving federally administered benefits. In October 1979 the number was 4.2 million.

Despite this stability in program statistics, the SSI program is nonetheless becoming a program that is increasingly dominated by the disability aspects. Out of the 4.2 million persons receiving SSI benefits, 2.2 million came onto the rolls as the result of being determined to be disabled. (349,000 of these individuals have now reached age 65, but are still listed by SSA as being disabled.)

Perhaps most indicative of the predominance of disability issues in the program are the figures showing numbers of applicants for benefits. About 80 percent of all applications are now being made on the basis of disability. This has been the case since 1976. In addition, about two-thirds of all awards made in recent years have been made to persons determined to be disabled. Program expenditures also reflect the numbers and relatively higher average SSI payments of the disabled SSI population. About 60 percent of all SSI expenditures now go to persons who have been determined disabled.

The composition of the SSI rolls varies greatly from State to State, with some States serving predominantly the aged, and others the disabled. Massachusetts, for example, has about 71,000 aged

individuals receiving SSI, and 53,000 who are disabled. Louisiana similarly has more aged recipients than it has disabled—about 70,000 aged individuals compared with 67,000 disabled. In contrast, New York has 227,000 disabled recipients, compared with 143,000 aged recipients. California has 368,000 disabled recipients, and 313,000 aged recipients.

¹ State funded except for Federal "hold harmless" payments to Hawaii, Massachusetts, and Wisconsin. See footnote 3.

² Column consists of \$4,654 million in Federal SSI payments plus "hold-harmless" payments of \$39.3 million toward the cost of State supplements.

³ State administered State supplements.

⁴ Includes hold harmless payments \$20,200 to Hawaii, \$9.4 million to Massachusetts, and \$29.9 million to Wisconsin.

⁵ Excludes data on State administered supplements.

⁶ Includes both State and federally administered supplements.

⁷ Total includes State supplementation payments of \$33,900 not allocated by State.

⁸ Total includes Federal SSI payments of \$34 million not allocated by State.

50. Wisconsin.....	7 300.90	(5)	300.90	3,611
51. Wyoming.....	228.20	41	269.20	3,230

¹ Maximum amount payable to an individual in combined Federal SSI and State supplementary payments for basic needs. The Federal SSI payment in July 1, 1979-June 30, 1980, is \$208.20.

² Calculated on the basis of food stamp allotments for July-December 1980 (\$61 in the continental U.S., \$88 in Alaska, and \$83 in Hawaii). Assumes that SSI benefit is the recipient's only income. Also assumes maximum deductions allowed in July 1979, \$70 standard household deduction plus \$90 for excess shelter costs and/or dependent care (higher sums in Alaska and Hawaii). If only the \$70 standard household deduction were used, the food stamp bonus in the continental U.S. would drop by \$27 monthly.

³ Less if shelter costs less than \$35 monthly.

⁴ More if blind.

⁵ SSI recipients in these States are ineligible for food stamps; their States provide increased cash benefits in lieu of stamps.

⁶ Less if blind or disabled.

⁷ As of October 1979 July maximums were D.C., \$208.20; Massachusetts, \$336.01; New Jersey, \$226; and Wisconsin, \$294.40.

⁸ Estimate. State administers program and budgets each case individually.

⁹ Maine also disregards \$42.30 in a recipient's other income.

¹⁰ More if blind, less if disabled.

¹¹ As of September 1979 Washington's July maximum was \$242.30.

TABLE 37.—SUPPLEMENTAL SECURITY INCOME—SUMMARY OF ERROR RATES

	January-June 1975	October 1976-March 1977	April-September 1977	October 1977-March 1978	April-September 1978
Payment error rate (incorrect payments as a percentage of all payments):					
Overpayments	5.2	2.8	2.5	1.8	1.8
Payments to ineligibles	6.3	3.5	2.7	2.8	2.8
Total ¹	11.5	6.3	5.2	4.6	4.6
Dollar values of payment error rate (in millions):					
Total payments	\$2,800	\$3,000	\$3,100	\$3,200	\$3,300
Excess payments	\$300	\$190	\$160	\$146	\$151

¹ Underpayments are not included in the payment error rate because they represent money not paid. Payment error rates refer only to dollars misspent through payments to ineligibles and overpayments to eligibles as a percent to total payments.

Staff note.—Error rates shown above are based on sample surveys conducted by the administration. The amount of incorrect payments shown by these surveys is understated because of certain tolerances incorporated in the surveys and because the surveys do not attempt to measure errors resulting from incorrect disability findings.

VI. Food Stamp Program

The largest part of public welfare program expenditures derives from the assistance titles of the Social Security Act. However, in recent years the food stamp program has expanded significantly in number of persons receiving benefits and in expenditures. In fiscal year 1973, food stamp expenditures were \$2.2 billion. They are expected to grow to \$10.2 billion in 1981. In December 1973, about 12.7 million persons received food stamps. In June 1979 the number was 18.2 million.

The objective of the food stamp program is to increase the food purchasing power of participating low-income households. This is accomplished by granting each household a federally funded subsidy, equal to the cost of a nutritious diet reduced by 30 percent of the household's net (countable) monthly income.

The maximum monthly allotments are calculated based on the Department of Agriculture's "Thrifty Food Plan" estimates of the cost of a "nutritionally adequate diet." They are varied by household size and indexed semi-annually to food price changes.

In fiscal year 1979 the average monthly benefit per person was \$29.50, and the average monthly participation was 18.2 million individuals.

All households must meet three nationally uniform eligibility tests. (1) Their net (after deductions) monthly income must fall below the annually adjusted "poverty level," (2) their liquid (and certain non-liquid) assets must total to less than \$1,750 per household or to less than \$3,000 for households of two or more containing elderly members (3) certain able-bodied household members must register for and accept suitable employment, if offered, and must fulfill "job search" requirements.

The food stamp program is administered, at the Federal level, by the U.S. Department of Agriculture's Food and Nutrition Service; benefit and eligibility rules are federally established. However, actual administration of the program is carried out by State and local welfare offices.

The entire amount of the benefit cost is borne by the Federal Government, along with its own administrative costs and 50 percent of State and local administrative costs. States and localities are responsible for 50 percent of their administrative costs.

VII. General Assistance

In most States there are programs, frequently called general assistance, to provide assistance to individuals who do not qualify for federally funded assistance. These programs may be funded fully by the State, by localities, or by a combination of funds from both sources. Data for these programs are somewhat incomplete, since reporting by the States to the Department of Health, Education, and Welfare is done on a voluntary basis.

According to information received by the Department of HEW, an average monthly number of 793,000 recipients received general assistance in calendar year 1978.

In May 1979 a total of 771,000 recipients were reported as receiving assistance (either in cash or nonmedical vendor payments), a decline of 3.9 percent from May of the previous year.

VIII. Medicaid

Title XIX (medicaid) of the Social Security Act provides medical assistance for certain low-income individuals and families. The program, which became Federal law in 1965, is the primary source of health care coverage for the low-income population. In addition to the estimated 11.3 million persons below the Federal poverty level who will receive Medicaid benefits in 1980, close to another 11.1 million persons whose income is slightly above the poverty line will receive program benefits at some point during the year.

Medicaid is financed jointly with State and Federal funds. The current Federal contribution, based on a formula related to State per capita income, ranges from 50 percent to 78 percent. Programs are basically administered by each State subject to Federal requirements and guidelines.

Medicaid is designed to provide medical assistance to those groups or categories of people who are eligible to receive cash payments under one of the existing welfare programs established under the Social Security Act—the program of aid to families with dependent children (AFDC) and the supplemental security income (SSI) program for the aged, blind and disabled. In general, receipt of a welfare payment under one of these programs means automatic eligibility for medicaid (although since 1974, when the welfare programs for the aged, blind and disabled were federalized as the SSI program, States may exclude some of these SSI cash assistance recipients from automatic medicaid eligibility if they are eligible only because the standards for the Federal program are more liberal than those previously utilized by the State).

In addition, States may provide medicaid to the "medically needy", that is, to people who fit into one of the categories of people covered by the cash welfare programs (aged, blind or disabled individuals, or members of families with dependent children when one parent is absent, incapacitated or unemployed), and who are deemed to have enough income to pay for their basic living expenses (and so are not recipients of welfare) but not enough to pay for their medical care. For persons and families with incomes above these levels, any medical expenses incurred can be deducted from income in determining eligibility allowing these persons to "spend down" to medicaid eligibility.

Medicaid does not provide medical assistance to all of the poor. Low income is only one test of eligibility. Resources are also tested. And, most importantly, one must belong to one of the categorical groups eligible for welfare assistance.

Certain basic services must be offered in any State medicaid program: inpatient hospital services, outpatient hospital services, laboratory and X-ray services, skilled nursing facility services for individuals 21 and older, home health care services for individuals eligible for skilled nursing services, physicians' services, family planning services, rural health clinic services, and early and periodic screening, diagnosis and treatment services for individuals under 21. In addition, States may provide a number of other services if they elect to do so, including drugs, eyeglasses, private duty nursing, intermediate care facility services, inpatient psychiatric

care for the aged and persons under 21, physical therapy, dental care, etc.

States determine the scope of services offered (they may limit the days of hospital care or number of physicians' visits covered, for example). They also, in general, determine the reimbursement rate for services, except for hospital care, where States are required to follow the medicare reasonable cost payment system unless they have approval from the Secretary of Health, Education, and Welfare to use an alternate payment system for hospital care.

Since States generally determine the eligibility level for the welfare programs (they set the AFDC level, and determine the amount of supplement, if any, to the basic Federal SSI payment), they exercise a great deal of control over the income eligibility levels for medicaid. If they cover the medically needy, they may establish the income level for eligibility at any point between the cash assistance eligibility level for an AFDC family (adjusted for family size) and 133½ percent of the payment to such an AFDC family. All of these variations—in benefits offered, in groups covered, in income standards, and in levels of reimbursement for providers—mean that medicaid programs differ substantially from State to State.

Many members of the medicaid population who are aged or disabled are also covered under medicare. In cases where this dual coverage exists, most State medicaid programs pay the medicare premiums, deductibles and copayments, and for some services not provided by medicare.

States participate in the medicaid program at their option. All States except Arizona currently have medicaid programs.

TABLE 44.—MEDICAL ASSISTANCE (MEDICAID) PAYMENTS (INCLUDING INTERMEDIATE CARE FACILITY SERVICES), BY STATE AND SOURCE OF FUNDS, FISCAL YEAR 1977

¹ Amounts shown are 50 percent of the sum reported by HEW as the total computable for Federal matching funds. HEW report erroneously shows a lesser Federal share for the District of Columbia and a greater one for Puerto Rico. HEW report shows non-Federal shares of these four jurisdictions as "local" shares rather than "State" shares, as here.

IX. Social Services and Child Welfare Services

A. SOCIAL SERVICES

In addition to providing Federal funding for cash public assistance to certain categories of needy individuals, the welfare titles of the Social Security Act have provided funding for a variety of social services programs. Originally, the costs of social services were considered a part of the administrative costs of operating cash public assistance programs, but subsequent amendments provided separate recognition of social services programs, expanded their availability to persons not receiving cash assistance, permitted funding of services provided by other than the welfare agency itself (including services by nonpublic agencies), and increased the Federal rate of matching to 75 percent (90 percent in the case of family planning services).

Prior to fiscal year 1973, Federal matching for social services, like Federal matching for welfare payments, was mandatory and open ended. Every dollar a State spent for social services was matched by three Federal dollars. In 1971 and 1972 particularly, States made use of these provisions to increase at a rapid rate the amount of Federal money going into social services programs.

In 1972, the Congress established a \$2.5 billion annual ceiling on the amount of Federal funding for social services programs effective for fiscal year 1973 and subsequent fiscal years. The permanent ceiling level remains at \$2.5 billion although a temporary ceiling of \$2.9 billion was in effect for fiscal 1979. Under this overall national ceiling, each State has a ceiling established which is based on its population relative to the population of the entire Nation. (Legislation now pending before the Congress, H.R. 3434, would provide for an increase in the permanent ceiling. The Senate-passed bill would provide \$2.7 billion in 1980; the House-passed bill would provide \$3.1 billion.)

In 1974, Congress substantially revised the statutes governing the social services programs. The 1974 legislation transferred the provisions governing social services programs from the cash public assistance titles of the Social Security Act to a new separate services title (title XX). The Federal matching percentage for services remained at 75 percent under the new title XX program and the overall ceiling of \$2.5 billion allocated among the States on a population basis was not changed.

HEW estimates that nearly all States are expected to have used all or close to all of their title XX funds in 1979. A substantial number of States are spending more than their allotments on services which would qualify for title XX funding, and are paying for them out of State and local funds.

Individuals and families may qualify for federally matched social services if they are welfare recipients or meet certain income requirements. States may not provide services, other than protective services, family planning services, and information and referral services to families with incomes above 115 percent of the State median income. For 1980, this ranges from a low of \$16,830 for a family of four in Mississippi, to a high of \$36,937 in Alaska.

States use their title XX money in very different ways, depending on their own State-determined needs. On a national basis, the service for which the largest amount of money is being spent is child day care. Estimates for 1979 indicate that about 21 percent of all Federal social services funds were spent for child day care. Homemaker/chore services accounted for almost 14 percent of all funds in 1979, and education, training and employment services accounted for an additional 10 percent. Protective services and child foster care services together accounted for another 15 percent of total spending.

B. CHILD WELFARE SERVICES

The child welfare services program under title IV-B of the Social Security Act provides a relatively small Federal contribution to the costs of State programs to protect and promote the welfare of children, including the provision of services to enable children to remain in their own homes, action to remove children from unsuitable homes and place them in foster care homes or institutions, and measures to place children in adoptive homes. Title IV-B authorizes annual appropriations of up to \$266 million for child welfare services but the appropriation has never exceeded \$36.5 million, or about 21 percent of the amount currently authorized. It is estimated by HEW that combined State and Federal expenditures reported under the title IV-B program will be about \$800 million in fiscal year 1979, with State and local funds representing about 93 percent of that total amount. In addition, in fiscal year 1979, approximately \$350 million in Federal title XX funds were spent for protective services provided to children and families.

Most of the expenditures reported by States under the title IV-B program are used to provide foster care, including income maintenance for children who are ineligible for foster care under the Aid to Families with Dependent Children (AFDC) program (title IV-A). According to HEW statistics, in 1979 about 3 percent of the total Federal, State, and local funding under IV-B was used for adoption services, 8 percent for day care, 73 percent for foster care, 8 percent for protective services, and the remainder for a variety of other child welfare services.

X. Poverty and Family Composition Statistics

One common measure of the success or failure of the welfare system is the extent to which it removes people from poverty. In order to apply this measure, there has been developed an official standard of what constitutes the amount of cash income below which one is said to be poor. Table 54 gives the estimated 1979 poverty levels for families of different types and sizes. Table 55 shows the number and percent of people in poverty from 1959 to 1977. The official poverty levels are based upon a methodology adopted several years ago and are updated from year to year by applying the changes in the Consumer Price Index to the prior poverty levels. Since earnings levels over a period of years tend to rise more than price levels, the percentage of people in poverty could be expected to decline from year to year (except during recessionary periods) if the income of those in the poverty population reflects about the same rate of growth as the income of the population generally.

Much of the interest in welfare programs centers on the assistance provided to families with children. Table 56 shows the family status of children in the population.
