[REDACTED]

What is the UNOS ID number? I am calling the OPO for the other transplant centers contact information.

Thanks

[REDACTED]

We received the report from the left kidney recipient center (NVUM):

[REDACTED]
[REDACTED]

The OPO (NVLV) contact is:

[REDACTED]
[REDACTED]

Please let me know if you need additional information.

Thank you,

[REDACTED]

Greetings,
I am working with staff to identify this report. I will be in touch shortly.

Thanks, [REDACTED]
UNOS can identify the OPO from the recipients' info.

Just to clarify—our CDC contact did not know which OPO or which transplant centers were involved.

She was notified by the state public health labs and had otherwise scant information.

This is obviously a public health emergency so we wanted to get to work on this immediately as there may be dozens of healthcare workers at risk in addition to organ/tissue recipients.

Thanks, [REDACTED]
[REDACTED] would you please confirm that the OPO notifies all the transplant hospitals involved?
I copied [REDACTED] (our transplant ID specialist in DoT) and [REDACTED] [REDACTED] (our DTAC rep).
Thanks

Dear all,

We just received a call from our bacterial diseases group at CDC as they were notified of two patients (in CA and NV) who have confirmed tularemia infection – both were recipients of kidneys from a common donor. One (NV) recipient has died.

Have you (UNOS) received a report on this? CDC obviously will accept the investigation. We do not know yet if there are other organ recipients or tissues were recovered.

Please let us know as soon as you hear back about this
