CONFIDENTIAL MEDICAL PEER REVIEW

March 27, 2017

VIA SECURE EMAIL

[REDACTED]
Chief Executive Officer
Mississippi Organ Recovery Agency
[REDACTED]

Dear [REDACTED]

The United Network for Organ Sharing (UNOS) operates the Organ Procurement and Transplantation Network (OPTN) under contract with the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services. Under that contract, UNOS staff review reported or identified patient safety and/or public health-related concerns associated with organ donation and transplantation occurring within the OPTN.

UNOS' Member Quality staff screen all reports to determine whether the matter suggests a risk or threat to patient safety or public health. Often additional information is needed from the involved OPTN member(s) to finalize the assessment of threat. If the matter is assessed as both time-sensitive and serious, this department will alert OPTN leadership and, under that direction, work with OPTN member(s) to alleviate the threat.

UNOS' Member Quality Department staff also screen all reports to determine if there is a possible violation of OPTN/UNOS bylaws or policies associated with the matter. Again, additional information is typically needed from OPTN member(s) involved in order to complete the assessment.

We are currently reviewing a kidney allocation by Mississippi Organ Recovery Agency for donor [REDACTED]. Our preliminary analysis indicates that a courier was unable to deliver the kidney to the airport in time to make the scheduled flight. The kidney was ultimately discarded.

We are contacting you to obtain a complete understanding of what occurred. We appreciate as much detail as you can provide. Any information you provide that suggests a potential policy or bylaw violation, or which may pose a threat to transplant or donor patient health or public safety may be referred for review by OPTN leadership, including the Membership and Professional Standards Committee (MPSC), and in some cases the OPTN Board of Directors.

CONFIDENTIAL MEDICAL PEER REVIEW

Please address the following issues related to the transport of this kidney:

- Please provide a detailed explanation of why the kidney was unable to be placed on the scheduled flight. Please include a descriptive timeline.
- Please provide a root cause analysis, if available.
- Please provide your Standard Operating Procedures and/or policies for sending organs via courier.
- Please explain why the kidneys from this donor were ultimately not transplanted. Was this a result of the transportation issues?
- What corrective actions, if any, have been implemented or are planned to prevent recurrence of this type of issue? Include any documentation that supports these corrective actions, such as revised policy, staff re-training materials, etc.

The OPTN bylaws and policies guide the sequence of allocation and wait listing practices of OPTN members in an effort to assure equitable organ allocation for transplant. The bylaws and policies also guide safe and effective practice connected to organ transplantation and living donor care. UNOS is responsible for monitoring compliance by OPTN members with these OPTN obligations, as well as for processing reports of transplant-related patient safety and living donor safety.

The MPSC, and in certain cases, the OPTN Board of Directors, perform the peer review functions of the OPTN. Please be aware that this correspondence and all documents and information requested by UNOS staff, on behalf of the OPTN, are protected by applicable peer review statutes and will not be disclosed. For this reason, all associated reports, inquiries, deliberations, findings, recommendations, and actions must be kept confidential. This means we will not be able to provide you with the results of our investigation.

I look forward to hearing from you by **April 10, 2017**. Responses can be sent via mail, email and/or fax. I can be contacted at [REDACTED]

[REDACTED] Thank you in advance for providing the additional information requested.

Sincerely,

[REDACTED]

Safety Analyst
UNOS Member Quality
