

My proposal is very simple and I'm sure has been discussed before:

Throw out the current tax laws for individuals and replace them with either

- a) A 10% flat tax system – taken immediately from all earned wages, income, investment income, etc. Exempt any taxes on social security income. Any individual 65 or older should only have to pay 5% (after all he/she is retired and has paid taxes all their life). They'll need the extra money for medical expenses.
- b) A consumption tax and no income tax.

The proposals above will ensure everyone contributes towards the services provided by the Federal Government.

Just do it!! You know it's right and just!!
