

BROADEN THE TAX BASE

Every American citizen with income should pay something towards supporting our government and our military and our judiciary. I don't care if it is only \$500 a year—everybody needs to be a payer of taxes. We currently have over 40% of American taxpayers paying NOTHING—and even getting other hard working citizen's money redistributed to them via tax credits. This is wrong!! It is important for all of us to be invested in supporting our government and having an interest in keeping taxes down. As it is, we have a big segment of the population who are happy to have taxes increased because it doesn't effect them. It's the old: Other Peoples' Money problem. Please address this issue and broaden the tax base!!! Everyone needs to pay something!!! Thank you. Jolene Winn
