

Orrin,

Good morning.

We all are Under Siege.

<https://issuu.com/vocero.com/docs/v09232016>

Total electrical system failure-collapsed in Puerto Rico since Wednesday.

I have warned them since the year 2008. Long years.

I have proposed them with ideas, solutions, projects including financing and they dispatched me to their useless fleet dept.

I proposed big operational savings so that they can re invest in preventive maintenance and upgrades for the utilities but all went to deaf ears.

Now it is time to act.

At least I rest assured that I provided my two cents long time ago so this wouldn't happen but, such is life and the show must go on.

Best regards,

Jorge
