

Lutheran Health Systems

VISION DEFINES REALITY  
REALITY REFINES VISION

1997/98 ANNUAL REPORT

## Table of Contents

- 2 Introduction
- 4 Outcomes, Strategies and Action Steps
- 12 Where We Are: 1998 Overview and Communities
- 26 Directors Emeriti and Board of Directors
- 27 Senior Management
- 28 Financial Performance

## Our Heritage

We are a family of health care providers with a heritage of serving communities for 60 years.

Lutheran Hospitals and Homes Society was formed in 1938. The Society teamed together seven hospitals and nursing homes struggling to survive the lean years of the Great Depression.

Under the leadership of Fred Knautz, centralized management techniques were put in place so facilities could operate economically and efficiently to provide high quality health care services. Knautz's successful methods soon attracted many other facilities eager to share the expertise and resources of the system.

In the mid-1980s, Lutheran Hospitals and Homes Society became Lutheran Health Systems to reflect the expansion into other areas of health care.

Lutheran Health Systems owns, leases and manages hospitals and nursing homes, primarily in rural communities. The array of health care services also includes a center for children with disabilities, physician practice support services, a network of home health agencies and home medical equipment operations.

Lutheran Health Systems is a not-for-profit company with headquarters in Fargo, North Dakota. Although we are not an agency of the church, we have always been proud of our Lutheran heritage. Our name reflects the Christian dedication of our founders.

**Vision Defines Reality, Reality Refines Vision**

Lutheran Health Systems was founded 60 years ago to provide compassionate care in rural communities. Over the years LHS has changed and adapted, while at the heart of the organization remain people who have nurtured and sustained the vision.

Each succeeding generation has taken the LHS vision and fused it to the realities of the environment.

It is this ability that transforms our health care company into a community of people greater than an individual or a group of individuals. Our vision defines the realities while the realities refine the implementation of our vision.

Underlying all of this is the understanding that the core reason for the existence of LHS is simply to do good for people.

I am blessed each year to be a part of this.

Thank you,

Steven R. Orr  
Chairman and Chief Executive Officer  
June 1998

# VISION DEFINES REALITY

*Through our total care vision, LHS is defining the future of rural health care.*

# REALITY REFINES VISION

*Through operational planning, LHS locations identify and deal with realities that help us refine our vision on a quarterly basis.*

## GAME PLAN:

- In 1988, LHS began developing the total care vision and long-range strategies for what we term the short, middle and long games to preserve our historic mission of serving rural communities well into the 21st century.
- The format of this report reflects the outcomes, strategies and action steps LHS creates as part of the operational planning process. The following pages define our vision for the future of rural health care, a vision continually being refined by changing realities.

## STRATEGIES:

### Short Game (1988–1992)

LHS adopted five Guiding Principles and began annual Strategic Initiative projects designed to strengthen the organization in specific areas. Since 1988, financial performance has consistently improved, providing the resources necessary for the middle and long games.

### LHS Guiding Principles

- Leverage the System
- Maximize Assets
- Tie Vision to Reality
- Maintain a Common Focus for Individuals and the Organization
- Concentrate on What Truly Makes a Difference

### LHS Strategic Initiatives

The Strategic Initiatives are the Guiding Principles in action. Each year since 1988, initiative teams drawn from across LHS locations tackle projects deemed central to the total care vision.

Team members often rotate to bring fresh perspectives to bear on each area, and new teams form to address emerging issues such as implementing computer systems and researching biotechnology.

## Middle Game (1993–2000)

The middle game is the current period during which we defined our vision of total care and “Body by Fisher,” and began creating and fitting in place the pieces needed to achieve this vision by the year 2000, the start of the long game.

### Total Care

**O**ur total care vision ensures that the people we serve receive the most effective care in the most efficient manner possible through clinically integrated health care delivery systems. We will help connect people with the most appropriate setting and resources, whether offered at an LHS location or other health care provider. Total care combines care coordination, operational models and information technology to manage the care of entire communities.

### Body by Fisher

**L**utheran Health Systems builds efficient rural networks for other health care systems the way the Fisher Company built car bodies for General Motors. Through a Body by Fisher relationship, LHS becomes responsible for another organization’s rural community health care operations, which includes providing integrated systems for the delivery of total care.

## Long Game (Beyond 2000)

With our total care vision and Body by Fisher in place, the challenge becomes assisting individuals and communities in anticipating change and making transitions in a timely manner.

### Preparing for Personal and Organizational Change

**A**chieving successful transitions means dealing with change in a healthy and productive way. The LHS planning process does just that.

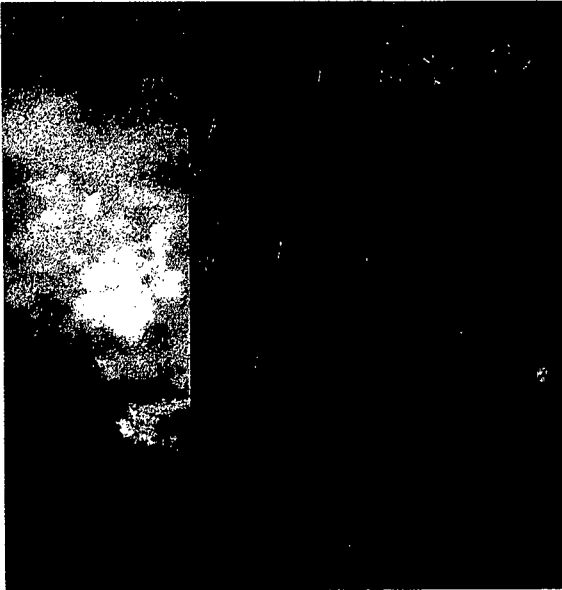

All LHS locations now translate community and systemwide priorities into outcomes, strategies and action steps through a standardized process that combines planning with budgeting and encompasses 12 quarters.

As each quarter ends, communities update their plans and budget projections, and add a new quarter to their 12-quarter perspective. We call this process “rolling quarters.”

Just as LHS has developed a vision for security and growth, as well as tools for achieving them, LHS employees have their own personal visions for the future.

To help with this personal planning process, LHS is promoting individual learning plans, leadership development and Life Cycle Planning tools.

With these resources, people will be able to transfer what they learn about planning for the organization to their personal lives, and vice versa.

**Change...Today's Challenge, Tomorrow's Success**

Change provides us opportunities to “Taste the Peach” — to grow and develop, and to share what we've learned with others.

Lutheran Health Systems

### Tasting the Peach

**I**n LHS, when people learn or experience new insights or perspectives, we call it “tasting the peach.” The poster above, showing people tasting the peach, was developed by LHS employees as part of a systemwide contest promoting personal responsibility to learn through change.

Each quarter, the planning process brings new opportunities to taste the peach and share what we've learned with others in LHS.

## OUTCOME:

*Our culture maximizes the talents and contributions of people across LHS and motivates them to grow with the organization.*

## STRATEGIES:

- Provide tools for employees to plan for life cycle needs throughout their careers with LHS.
- Research and evaluate benefit choices geared to personal life cycle needs.
- Cultivate a learning organization that fosters personal and professional growth.

### Life Cycle Planning:

Offer tools to help employees plan for personal life cycle needs. These tools will eventually link to the new human resources information system and allow employees secure access to their financial and benefits records.

.....  
**Begin the Journey  
 With Life Cycle Planning**

**T**he first Life Cycle Planning tool—personal financial planning software—is being piloted at several LHS locations during 1998. A user-friendly interface helps employees determine how much they need to save and invest to achieve debt reduction and provide for major purchases and future needs, like college and retirement. If the pilot is successful, financial planning workshops will be held systemwide beginning in 1999.

Future Life Cycle Planning tools will help employees make plans to live healthier, learn new career skills, and select and manage LHS benefits options that best fit their family needs over time.

### Benefits Choices:

Research benefit program changes that complement Life Cycle Planning by offering employees more choices in allocating benefit dollars.

### Innovation:

Provide LHS grant money for projects that spread employee best practices across the system and foster innovation and idea-sharing.

### Leadership:

Support the development of leadership competencies through the creation of individual learning plans. These plans help people identify personal areas for improvement and strategies to pursue self-development.

### Learning Teams:

Form cross-functional organizational, facility and community teams to spearhead business development, learning and implementation of new systems and approaches.

### On-Line Learning:

Continue to explore how technology can be used to enhance learning; for example, "learning\_on\_line" tools are being developed to help PC users teach themselves a variety of desktop applications.

### Self-Directed Benefits Investing

LHS is pursuing approaches to give employees self-directed benefit options. Potentially, employees may receive a certain amount of money annually to "spend" on LHS benefits any way they choose in order to best meet their individual needs.

LHS is also researching how to restructure the LHS Pension Plan so employees can make pre-tax contributions and choose investments according to their individual financial needs and tolerance for risk.

### Building a Learning Organization

Learning teams across LHS are focused on the future, working together to strengthen employee access to information and promoting responsibility for self-directed learning. The Lutheran Healthcare Network in Mesa, Ariz., has opened learning labs to provide employees access to computers equipped with interactive learning programs, VCRs and other resources. The learning lab at Valley Lutheran Hospital, shown at left, is open around the clock.

The network has also formed teams to focus on learning events for supervisors, patients, clinical/support staff and PC users receiving new systems. Another team will oversee orientation and customer service events, and explore ways to deliver learning via technology. For example, one approach may involve bringing mobile computers to and from departments for on-site learning.

"To be part of a learning organization means being ready to adapt to change, being flexible and willing to learn new skills," says Sherrie Beardsley, LHN director of Learning and Development.

# OUTCOME:

*LHS locations follow proven models of operation that provide coordinated and efficient services to meet community total care needs.*

# STRATEGIES:

- Partner with other organizations to operate their rural locations (Body by Fisher).
- Share/maximize resources and offer consistent services across networks.
- Expand care coordination efforts through special self-care programs.
- Facilitate service redesign to meet changing local needs.
- Establish and implement an effective Medicare compliance program.
- Implement an ongoing integrated planning/budgeting process.

## Body by Fisher in Iowa:

Install systems and operate rural hospitals in partnership with Iowa Health System through the Iowa Health System Community Network.

## Network Efficiencies:

Create further efficiencies by centralizing lab services and business office functions within selected LHS networks.

.....  
**Community Partners**

The Iowa Health System Community Network was created to serve communities seeking a regional network partner (Iowa Health System) and access to proven management expertise and systems for rural hospitals (LHS). This innovative arrangement has attracted hospitals in Perry and Grundy Center, Iowa. The team in Grundy Center expressed an urgent need to transition information services. LHS had less than three months to install a fully functioning PC network with e-mail, payroll and other systems needed to run the hospital. LHS Technical Services staff met the challenge, working closely with the hospital staff for a successful implementation.

"We are delighted to obtain an information system from LHS that was designed for small rural hospitals like Grundy County Memorial," said Administrator James Faulwell. "The LHS information system is less costly to maintain but still addresses many of the issues confronting us that could not be handled by our previous system."

### Care Coordination:

Use care coordination to address the needs of high-risk patient groups by establishing disease management clinics and patient-led self-care groups.

### Care Pathways:

Continue to identify the critical factors within each disease care pathway most likely to lead to positive clinical and financial outcomes.

### Service Redesign:

Develop local transition teams to help co-workers understand the need for redesigning services and adapting work assignments to meet changing local health care needs.

### Compliance:

Implement a formal plan that ensures all coding and billing practices across the continuum of care conform to requirements established by Medicare, Medicaid and other third-party payers.

### Operational Plans:

Refine the integrated planning/budgeting process to reflect environmental impacts and associated management actions quarter by quarter.

### Helping Each Other Get Better

Some benefits of care coordination can only be measured through stories, like the story of 12-year-old Sarah Lindahl, pictured at right, who has asthma. Sarah was referred to a new disease management program in North Colorado Medical Center, Greeley, Colo., part of the Western Plains Health Network. When she began the program, Sarah was not coping well physically or emotionally with her asthma. "But she seemed to open up a little with each class," says Care Coordinator Pat Samples. "After her series of classes ended, we continued to support her and her mother over the phone. Then Sarah called us, saying she wanted to help others." Now Sarah is a leader, helping others understand they can get better and what that can mean. For Sarah, it meant being able to enjoy sports like swimming and basketball again.

Care coordinators in other communities are also helping patients form their own self-care groups. Ogallala (Neb.) Community Hospital sponsored a patient with multiple sclerosis to attend a leadership program in order to gain skills for leading a group of area patients in coping with and managing chronic conditions (see page 16).

### Planning Updates Tie Vision to Reality

LHS has combined planning and budgeting into a standardized process that looks ahead over 12 quarters. Each quarter, LHS locations revisit goals and expected revenues and, if necessary, adjust actions and projections.

For example, when LHS home medical equipment operations were alerted in second quarter 1997 that Medicare would be significantly reducing reimbursement for oxygen services, they were able to focus on other areas for growth and formulate new outcomes and strategies for upcoming quarters.

O

**OUTCOME:**

*LHS locations have integrated information systems in place that leverage organizational strengths, improve efficiencies and can be quickly implemented in new community partnerships.*

**STRATEGIES:**

- Implement systems that enhance patient education, human resources, clinic management, materials management and product line pricing, billing and monitoring.
- Develop an intranet for interactive information sharing among LHS employees systemwide and develop approaches to maximize internet technology.
- Continue to upgrade PCs/PC network infrastructures to support new systems and broader access to on-line tools.

**Patient Education:**

Implement standard patient education materials to allow caregivers across all care settings the ability to provide the same consistent, high-quality up-to-date information.

**Activity Master:**

Implement a standard activity master (pricing/billing policies and descriptions of services) across the system to facilitate operational benchmarking and support compliance with government reimbursement programs.

.....  
**High Marks Received for Patient Education System**

New patient education software is making its debut across LHS in mid-1998. At right, Dr. Richard Campbell at Pioneer Medical Clinic, Torrington, Wyo., shares a printout of prenatal care information with mother-to-be Lauri Lamm.

"This is the first system-wide implementation of software that serves a purely clinical function," says Sandy Bilstad, LHS Home & Community Care operations coordinator. The software provides consistent, up-to-date baseline patient education information across the entire continuum of care, from hospitals and clinics to nursing homes and home care settings. The system is stored on PCs, where physicians and staff can quickly call up and print out patient education materials on a wide range of health and wellness topics.

### Human Resources Information System:

Select and install an HR information system that is Year 2000-compatible and interfaces with other LHS systems. This will eventually integrate with Life Cycle Planning tools for employees.

### Materials Systems:

Install a materials management/accounts payable system to automate supply orders and inventory management, and support regional buying networks. This system will reduce costs and assure contract compliance.

### Clinic Management:

Implement a standard clinic financial management system across LHS that will leverage clinic support resources and best practices, and integrate with other systems to support total care.

### Systems Integration:

Continue to upgrade PCs and PC network infrastructures to maintain a standard level of performance and support further integration of LHS systems.

### Information Sharing Via the Intranet:

Further develop LHSnet, our internal intranet, to provide easy access to up-to-date LHS resources and information from Corporate Office departments and other LHS network locations.

### The Buck Starts Here

Salaries and benefits for 13,000 employees represent the organization's largest financial investment. A new information system, SmartStream, is being implemented to support that investment. The new system links the functions of human resources, payroll and benefits with a shared database and will bring personnel information closer to human resources and payroll staff at each location, as well as employees.

"Having faster and broader access to human resources information will strengthen our operations," says Gerri Twomey, LHS Human Resources vice president. "It also supports our long-term goal of giving employees the ability to model benefit options and maintain key personal data."

But first, the basic payroll and human resource functions of the new system need to be put in place systemwide before the year 2000. Corporate Office staff from Information Services, Human Resources, Payroll and Corporate Accounting Services, shown at right, formed a special StreamTeam to meet the challenge.

### LHSnet is a Welcome Site

LHSnet, the LHS intranet, is creating some serious wave action that's attracting hundreds of "surfing" episodes a day by employees from across the system. They're accessing a wide range of LHS resources and information from the Corporate Office home page, as well as web pages developed by LHS network locations.

LHSnet has updates on projects, news, jobs and LHS policies and procedures. Underway are user/chat areas for employee peer groups.

With LHSnet up and running, construction has begun on an LHS internet site: [www.LHSnet.com](http://www.LHSnet.com)

# OUTCOME:

*LHS as a whole is able to quickly adopt new approaches and technologies that improve patient care and health care outcomes.*

# STRATEGIES:

- Pilot the LHS-developed Total Care Information System, a database that makes comprehensive patient information available to multiple care settings.
- Install new point-of-care technologies, remote monitoring and telemedicine equipment to enhance health care delivery in various rural settings.
- Explore how innovations in genetics can benefit LHS rural communities.

## ACTION STEPS INCLUDE:

### Total Care Information System:

Pilot the LHS Total Care Information System (TCIS) at the Lutheran Healthcare Network in Mesa, Ariz. Assess impact on care coordination efforts and outcomes.

### Electronic Patient Record Puts Clinicians on Same Page

The Total Care Information System (TCIS) developed by LHS can help keep better track of patient information and allow clinicians to coordinate care in a more effective and seamless manner.

In a pilot project at the Lutheran Healthcare Network in Mesa, Ariz., TCIS is allowing pharmacists, doctors, dietitians, social workers and care coordinators to share easy access to the most comprehensive and up-to-date patient information. Caregiver notes can be viewed by department or in chronological order.

Whenever a patient history is added or updated in the system, TCIS automatically generates a new health risk profile. If a risk is found, the system sends a "heads-up" e-mail to the appropriate department for follow-up. The system also captures patients' lifestyle habits and goals they may have for themselves, making TCIS a care planning tool, not just another database.

"TCIS helps deliver our vision of creating an integrated and seamless health care delivery system," says Gail Miller, TCIS project leader.

### Point-of-Care Technologies:

Install point-of-care blood gas analyzers, remote monitoring and telemedicine in pilot LHS locations.

### Technology Assessments:

Continue to explore viability of new technologies and their usefulness to LHS.

### Genetics Impact:

Investigate how gene therapies will impact future care delivery in rural communities. Explore expanding coverage for genetic screenings in the LHS health plan.

### Aging Services Software:

Further develop software systems in long-term care facilities that help accomplish assessments, care planning and identification of at-risk health problems as well as integration of financials.

### Joint Commission:

Develop/monitor LHS quality indicators and share data with JCAHO, the Joint Commission for Accreditation of Healthcare Organizations.

### House "Calls" and Other New Technologies

Seeing a doctor no longer necessarily means in person. It may mean seeing a doctor via videophone when a person's medical needs are not pressing. Videophones are also being used to keep home care patients linked with nurses and social workers.

In the photo at right, Mavis Jewitt, director of Hospice Services for LHS Home & Community Care in Spearfish, S.D., checks in with a patient by videophone between regular visits. The home care team is part of the Black Hills Healthcare Network.

Another new technology, the point-of-care blood chemistry analyzer, enables caregivers to perform tests at the bedside or at a patient's home.

"More and more health care services will be delivered remotely over telephone lines and the internet," says Sandra Skallerud, chief operating officer of LHS Home Medical Equipment operations. "We're beginning to practice some of the new skills rural communities will need to meet that challenge."

### In Step With JCAHO

Through an initiative called Oryx, JCAHO is moving toward a new model of continuous quality monitoring. That means facilities need a quality management system that can collect and send data on quality indicators (for example, cesarean sections) to JCAHO on an ongoing basis. JCAHO surveyors reviewed the LHS Systemwide Outcomes Program and suggested LHS submit it for Oryx approval, which was granted in late 1997.

Another benefit of the LHS program—major cost-savings. Diane Poehls, LHS Quality Management coordinator, said acquiring an external system might have cost each location as much as \$10,000, plus \$2,000 to \$3,000 a year to maintain.

"There is strong demand right now for a measurement system that has indicators applicable to hospitals, long-term care and home care," said Diane. "It's another benefit we can offer to locations thinking of joining LHS."

# Where We Are 1998 Overview

14 States

13,500 Employees at LHS Locations

28 Hospitals: 1,828 Beds

30 Nursing Homes and Nursing Units: 2,054 Beds

Anne Carlsen Center for Children: 47 Beds

30 Home Health Agencies and 2 Nursing Registries

34 Clinics, 18 Group Practices, 61 Employed Physicians and 31 Employed Mid-level Practitioners

20 Home Medical Equipment Locations

Statistics are for owned, leased and managed locations, and do not include affiliates.

# Lutheran Healthcare Network

500 W. 10th Place  
Suite 237  
Mesa, AZ 85201  
(602) 461-2157

Lutheran Healthcare Network was created in 1984 to manage and develop Valley Lutheran Hospital, Mesa Lutheran Hospital, Lutheran Hospitals Foundation and other associated entities, including Lutheran Urgent Care and nursing registries.

The network provides centralized executive management and support services, including information systems, finance, education, public relations, marketing/planning, human resources and managed care.

**Chief Executive Officer:**  
Don Evans

## LHS Home & Community Care

1325 N. Fiesta Blvd., Suite 1  
Gilbert, AZ 85233  
(602) 497-5535

**Owned** (LHS since 1988)  
**Programs:** Home health, extended care, home infusion therapy, hospice, home medical equipment, school-based health program, therapies, medical social services, certified nursing assistants, wellness centers

### Agencies:

- Mesa
- Miami/Globe

**Employees:** 347  
**Executive Director:** Jennifer Phillippe Huppenthal

## Lutheran Urgent Care

1151 N. Gilbert Road  
Mesa, AZ 85213  
(602) 610-0688

**City population:** 353,088  
**Total service area:** 943,817  
**Owned** (LHS since 1996)  
**Operated by:** Lutheran Healthcare Network and Lutheran Physician Hospital Organization  
**Services:** Prompt medical treatment for minor injuries and illnesses

### ACTION STEP:

The Mesa region is growing rapidly and Mesa Lutheran Hospital is keeping pace with a newly remodeled and expanded ER that helps staff like Kathy King, RN, respond fast and efficiently to emergencies.

### ACTION STEP:

Home health visits in the LHN service area are also increasing. At left, RN Bill Eagan of LHS Home & Community Care checks in with young client Sidney Deatherage.

## Mesa Lutheran Hospital

525 W. Brown Road  
Mesa, AZ 85201  
(602) 834-1211

**Owned** (LHS since 1967)  
**Hospital beds:** 315  
**SNF beds:** 60  
**Employees:** 1,811  
**Executive Director:**  
Bob Rundio

## Valley Lutheran Hospital

6644 E. Baywood Ave.  
Mesa, AZ 85206  
(602) 981-2000

**Owned** (LHS since 1984)  
**Hospital beds:** 231  
**Employees:** 1,085  
**Executive Director:**  
Bob Rundio

# Western Plains Health Network

2010 16th St.  
Greeley, CO 80631  
(970) 346-9200

The Western Plains Health Network (WPHN) was formed in 1995 to create an integrated network of health care providers focused on improving the health of the people in our region by providing or coordinating health and wellness services during each phase of life.

**Executive Director:** Doug Vang

### East Morgan County Hospital

2400 W. Edison  
Brush, CO 80723  
(970) 842-5151

**City population:** 4,438  
**Total service area:** 26,810  
**Leased (LHS since 1954)**  
**Hospital beds:** 24  
**Clinic:** Family Health Clinic, Brush, CO  
**Employees:** 102  
**Administrator:** Anne Platt

### North Colorado Medical Center

1801 16th St.  
Greeley, CO 80631  
(970) 352-4121

**City population:** 67,820  
**Total service area:** 149,325  
**Leased (LHS since 1995)**  
**Hospital beds:** 306  
**LTC beds:** 20  
**Clinics:** Fort Lupton and Keenesburg, CO  
**Employees:** 1,667  
**Administrator:** Karl B. Gills

### Haxtun Hospital District

235 W. Fletcher  
Haxtun, CO 80731  
(970) 774-6123

**Affiliated with Western Plains Health Network**

**City population:** 1,017  
**Total service area:** 4,651  
**Hospital beds:** 48  
**Employees:** 85  
**Administrator:** Jim Brundige

### Melissa Memorial Hospital

505 S. Baxter Ave.  
Holyoke, CO 80734  
(970) 854-2241

**Affiliated with Western Plains Health Network**

**City population:** 2,092  
**Total service area:** 4,651  
**Hospital beds:** 24  
**Employees:** 63  
**Administrator:** George Larson

#### **ACTION STEP:**

The Western Plains Health Network Cancer Care program is the only accredited comprehensive cancer program in northern Colorado. In addition to chemotherapy, radiation oncology (shown at left) and other traditional treatments, two new treatments have been added to the program. Previously, prostate implant patients and peripheral stem cell patients had to travel to Denver or out of state to receive treatments now available at North Colorado Medical Center.

Owned (LHS since 1951)  
Hospital beds: 98  
SNF beds: 11  
Clinic: Berthoud, CO  
Employees: 676  
Administrator:  
Charles F. Harms

**Sterling Regional MedCenter**

615 Fairhurst St.  
Sterling, CO 80751  
(970) 522-0122

City population: 10,706  
Total service area: 39,191  
Owned (LHS since 1938)  
Hospital beds: 36  
Clinic: Family Care Clinic,  
Sterling, CO  
Employees: 349  
Administrator: Jim Pernau

**Wray Community District Hospital**

1017 W. Seventh St.  
Wray, CO 80758  
(970) 332-4811

Affiliated with Western Plains Health Network  
City population: 2,083  
Total service area: 9,406  
Hospital beds: 16  
Employees: 55  
Administrator: Dan Dennis

**Yuma District Hospital**

910 S. Main St.  
Yuma, CO 80759  
(970) 848-5405

Affiliated with Western Plains Health Network  
City population: 2,971  
Total service area: 9,406  
Hospital beds: 22  
Employees: 80  
Administrator:  
Tim Reardon

**Physician Integration Integrated Practice Resources**

(Practice Management Services)  
Operating 10 practices with 35 providers (25 primary care physicians, 10 orthopaedic surgeons)

**High Plains Healthcare Alliance, Inc.**  
(Greeley-based Physician Hospital Organization)  
190 physicians

**Mountain Shadows Medical Association**  
(Loveland-based Physician Hospital Association)  
100 physicians

**NorthCare**  
(Preferred Provider Network serving northern Colorado)  
550 physicians

**ACTION STEP:**  
The Sleep Disorders Center of Northern Colorado, located at McKee Medical Center, is the only accredited sleep lab in northern Colorado. Western Plains Health Network patients receive high-quality care at the center for sleep apnea, insomnia and other sleep disorders, services they would otherwise have to seek in Denver.

**ACTION STEP:**  
The Western Plains Health Network Heart Care staff coordinates cardiac rehabilitation across the network to provide patients with the same high-quality care no matter where they live.

**Ogallala Community Hospital**

300 E. 10th St.  
Ogallala, NE 69153  
(308) 284-4011

**City population:** 5,157  
**Total service area:** 15,577  
**Leased (LHS since 1987)**  
**Hospital beds:** 41  
**Home Care Agency/HME Clinic:** Ogallala Medical Group, Ogallala, NE  
**Employees:** 156  
**Administrator:** Linda Morris

Photo: Larry Holscher

**Community Hospital**

2000 Campbell Drive  
Torrington, WY 82240  
(307) 532-4181

**City population:** 5,885  
**Total service area:** 16,132  
**Owned (LHS since 1950)**  
**Hospital beds:** 36  
**Home Care Agency Clinics:** 3 in Torrington, WY  
**Employees:** 185  
**Administrator:** Charles P. Myers

**ACTION STEP:** Learning to live with his multiple sclerosis makes Ron Siffring an effective support group leader for others coping with chronic health conditions. Ogallala Community Hospital sponsored leadership training for Ron at Stanford University in California. Ron and Care Coordinator Sue Hardessen stand outside the church where the support group regularly meets.

**Goshen Care Center**

2009 Laramie St.  
Torrington, WY 82240  
(307) 532-4038

**City population:** 5,885  
**Total service area:** 16,132  
**Leased (LHS since 1963)**  
**LTC beds:** 75  
**Evergreen Court (assisted living beds):** 26  
**Employees:** 93  
**Administrator:** Dave Garnas

**ACTION STEP:** A new Care Center is going up next to Community Hospital, enhancing total care services. Resident Floyd Ewing, a retired tiler, checks on the progress.

**Platte County Memorial Hospital, Nursing Home & Home Care**

201 14th St.  
Wheatland, WY 82201  
(307) 322-3636

**City population:** 3,367  
**Total service area:** 8,857  
**Leased (LHS since 1955)**  
**Hospital beds:** 43  
**LTC beds:** 43  
**Home Care Agency Employees:** 167  
**Administrator:** Dana Barnett

**ACTION STEP:** Platte County Memorial teams up with the area's largest employer, the Laramie River Station Power Plant, to provide an on-site health fair. An attractive feature of the wellness program is the custom health risk assessment coordinated through the Western Plains Health Network wellness department. Using summary reports identifying specific risk factors, the hospital wellness team follows up with the employer by providing educational programs for their staff.

# Northern Health Network

The Northern Health Network (NHN) links communities in North Dakota and Minnesota with a primary emphasis on chronic care services. The network includes an array of care settings, including acute, clinic, long-term care, home health, home medical equipment and a care center for children with disabilities. The NHN network leverages the system through shared resources and services such as purchasing and rehabilitation.

**Executive Director:** Eric Monson

**Pembina County Memorial Hospital & Wedgewood Manor**

301 Mountain St. E.  
Cavalier, ND 58220  
(701) 265-8461

City population: 1,493  
Total service area: 15,646  
Leased (LHS since 1953)  
Hospital beds: 29  
LTC beds: 60  
Country Estates units: 20  
Home Care Agency  
Clinic: CliniCare  
Employees: 165  
Administrator:  
George Rohrich

**Hillcrest Manor**

Total service area: 166,593  
Owned (LHS since 1938)  
LTC beds: 102  
Employees: 130  
Administrator: Mary Almen

**ACTION STEP :**

Rosewood residents are linked to the information age with access to computers and the Internet. Below, Ellen Gillies chats via e-mail with a granddaughter visiting China.

**ACTION STEP :** Within a short driving distance of each other, Hillcrest Manor and Lisbon Medical Center continually look for ways to leverage resources. For example, a doctor and nurse from Lisbon visit the Enderlin home once a week, a physician's assistant four days a week. At left, Lisbon LPN Pearl Stockwell draws blood from Hillcrest resident Gordon Roesler.

**Villa Maria**

3102 S. University Drive  
Fargo, ND 58103

**Owned (LHS since 1952)**  
**Hospital beds:** 19  
**LTC beds:** 45  
**Home Care Agency**  
**Clinics:** Lisbon and Enderlin, ND  
**Employees:** 136  
**Administrator:** Jack Jacobs

**Sheyenne Care Center**

979 Central Ave. N.  
Valley City, ND 58072  
(701) 845-8222

**City population:** 7,131  
**Total service area:** 13,000  
**Owned (LHS since 1938)**  
**LTC beds:** 170  
**Employees:** 205  
**Administrator:** Craig Christianson

**ACTION STEP:**  
Anne Carlsen Center's services are no longer confined to the facility, due to business development and community outreach efforts. Here, 17-month-old Dustin and his mother enjoy a visit by therapist Carol Anderson.

**ACTION STEP:**  
The LHS care philosophy, Choices, encourages resident independence. At the Care Center, Angie Harstad keeps in stride by delivering the newspaper to Ida Rieth and other residents.

# Black Hills Healthcare Network

930 10th St.  
Spearfish, SD 57783  
(605) 642-4641

BHNN Support Services  
430 Oriole Drive, Suite 1A  
Spearfish, SD 57783  
(605) 642-0143

Black Hills Healthcare Network (BHNN) provides health care services to the communities of Belle Fourche, Custer, Newell, Rapid City, Sturgis, Spearfish and Hot Springs. BHNN was formed in 1993 to build tighter links between acute, ambulatory care, physician clinics, rehabilitation, long-term care and home health services in the Black Hills region. Our mission is to provide sustainable, high-quality, cost-effective health care to the communities and residents of the Black Hills. This will be done in partnership with other providers who share those goals.

**Executive Director:** Peter W. Thoreen

## BHNN LOCATIONS IN SOUTH DAKOTA:

BHNN

### Belle Fourche Health Care Center

2200 13th Ave.  
Belle Fourche, SD 57717  
(605) 892-3331

**City population:** 5,156  
**Total service area:** 10,180  
**Owned (LHS since 1992)**  
**LTC beds:** 82  
**Clinics:** Belle Fourche and Newell, SD  
**Employees:** 97  
**Administrators:** Sara Delahoyde (Community), Deb Krmpotic (Acute Care/Clinic), Roger Heidt (LTC), Rachelle Schultz (H&CC/HME/Rehab)

BHNN

### Colonial Manor

1065 Montgomery St.  
Custer, SD 57730  
(605) 673-2237

**City population:** 1,824  
**Total service area:** 10,000  
**Leased (LHS since 1993)**  
**LTC beds:** 76  
**Employees:** 65  
**Administrator:** Deb Holm (Community)

BHNN

### Southern Hills Hospital & Castle Manor

209 N. 16th St.  
Hot Springs, SD 57747  
(605) 745-3159

**City population:** 4,322  
**Total service area:** 16,417  
**Owned (LHS since 1938)**  
**Hospital beds:** 12  
**LTC beds:** 48  
**Assisted living units:** 16  
**Clinic:** Hot Springs, SD  
**Employees:** 100  
**Administrators:** Eric Hanson (Community), Deb Holm (LTC), Deb Krmpotic (Acute Care/Clinic), Rachelle Schultz (H&CC/HME/Rehab)

BHNN

### Clarkson Mountain View Guest Home

1015 Mountain View Road  
Rapid City, SD 57702  
(605) 343-5882

**City population:** 57,565  
**Total service area:** 371,000  
**Owned (LHS since 1993)**  
**LTC beds:** 52  
**Employees:** 60  
**Administrator:** Klara Parks (Community)

### ACTION STEP:

Dr. Arthur Raymond, Physician Assistant Kathy Salu and Dr. Donald Primer were all recruited in 1997 to the Family Medical Center clinic in Hot Springs. Filling these key staffing needs has helped strengthen Southern Hills' operations for the future.

**David M. Dorsett Health Care Facility**

Clinic: Sturgis, SD

Employees: 199

Administrators:

Roger Heidt (Community/LTC), Deb Krmpotic (Acute Care/Clinic), Rachelle Schultz (H&CC/HME/Rehab)

**Family Medical Center Clinics:**

- Belle Fourche, SD
- Hot Springs, SD
- Newell, SD
- Spearfish, SD
- Sturgis, SD

Administrator:

Deb Krmpotic (Acute Care/Clinic)

**Senior Apartments and Services:**

- Hilltop Assisted Living
- Ponderosa Apartments
- John Burns Apartments
- Heritage Acre Apartments
- Belle Fourche Senior Living Center
- Hickory House Congregate Living
- Belle Fourche Adult Daycare
- Prairie Hills Transit & Spearfish Nutrition Site

**ACTION STEP:**

A \$1.6 million renovation at Dorsett, funded by LHS and a contribution from the Dickey family, has resulted in new enhancements, improved access and a more homelike environment. Shown here in the sunny new activity room, Dorsett resident Dorothy Schaffner visits with her daughter Connie Plaggemeyer and friend Eva Crouch.

**ACTION STEP:**

The Family Medical Center in Sturgis has expanded health services for women and children. Dr. Michael Preys advises Samantha Alisero on care for her two-day-old daughter Carly at the Family Medical Center.

# Iowa Health System Community Network

(515) 241-8281

The Iowa Health System Community Network is a partnership between Iowa Health System and LHS designed to link rural Iowa providers with a statewide seamlessly integrated health care delivery system.

**LHS Representative in Iowa:**  
Ed Myers

## Grundy County Memorial Hospital

201 East J Ave.  
Grundy Center, IA 50638  
(319) 824-5421

**City population:** 2,807  
**Total service area:** 15,830  
**Managed (LHS since 1998)**  
**Hospital beds:** 33  
**LTC beds:** 55  
**Home Care Agency**  
**Employees:** 114  
**Administrator:**  
James Faulwell

## Dallas County Hospital

610 10th St.  
Perry, IA 50220  
(515) 465-3547

**City population:** 7,179  
**Total service area:** 12,162  
**Managed (LHS since 1998)**  
**Hospital beds:** 49  
**Employees:** 145  
**Administrator:**  
Vernette Riley

## Wickenburg Regional Hospital

520 Rose Lane  
Wickenburg, AZ 85390  
(520) 684-5421

**City population:** 6,163  
**Total service area:** 17,994  
**Leased (LHS in 1998)**  
**Hospital beds:** 23  
**LTC beds:** 57  
**Employees:** 150  
**Administrator:**  
Carol Schmoyer

## Lassen Community Hospital

560 Hospital Lane  
Susanville, CA 96130  
(530) 257-5325

**City population:** 9,530  
**Total service area:** 31,584  
**Managed (LHS since 1994)**  
**Hospital beds:** 28  
**LTC beds:** 31  
**Home Care Agency**  
**Employees:** 200  
**Administrator:**  
David S. Anderson

### ACTION STEP:

Certified Nurse Assistant Kate LeLaCheur and resident Elias Guillen enjoy a spring day in the courtyard of the extended care wing of the Wickenburg Regional Hospital. The facility plans to implement the LHS Choices philosophy of care and environmental changes to enhance resident independence and wellness.

- Laramie, WY
- Rock Springs, WY

JCAHO accredited,  
Medicare certified  
Owned (LHS since 1987)  
Employees: 142  
Regional Director:  
Laurie Wright

**ACTION STEP:**

LHS Home & Community Care in Wyoming has experienced rapid growth in pediatric programs. Here, a jaundiced newborn receives care at home with a special UV light-emitting pad worn close to the baby's body. LHS H&CC nurses work with the LHS Mersco Medical store in Rapid City, S.D., to provide this service.

## Our Mission

The mission of our organization is to provide high quality health care to rural America in accord with the Christian ideals of concern and compassion. We are committed to respond to needs, including economic viability, in the communities we serve while recognizing that good health encompasses the physical, emotional and spiritual well-being of everyone.

To fulfill this mission, we will provide preventive, healing and rehabilitative services through a system that links services in rural and urban areas; preserve the dignity of each individual regardless of creed, race, sex, age or social status; strive to achieve and maintain standards of excellence in all aspects of health care; and operate facilities in a cost-effective and financially responsible manner.
