

MIN E

1 EXECUTIVE COMMITTEE MEETING ON PROPOSED TAX REFORM ACT OF  
2 1986

3 THURSDAY, APRIL 10, 1986

4 Committee on Finance

5 Washington, D.C.

6 The committee met, pursuant to recess, at 9:35 a.m. in  
7 Room SD-215, Dirksen Senate Office Building, the Honorable  
8 Bob Packwood (chairman) presiding.

9 Present: Senators Packwood, Dole, Roth, Danforth,  
10 Chafee, Heinz, Wallop, Durenberger, Armstrong, Symms,  
11 Grassley, Long, Bentsen, Matsunaga, Moynihan, Baucus, Boren,  
12 Bradley, Mitchell, and Pryor.

13 Also present: Roger Mentz, Assistant-Secretary-  
14 Designate for Tax Policy, Department of the Treasury;  
15 Richard Darman, Deputy Secretary of the Treasury.

16 Also present: Bill Diefenderfer, Chief of Staff; David  
17 Brockway, Chief of Staff, Joint Committee on Taxation; Randy  
18 Weiss, Deputy Chief of Staff, Joint Committee on Taxation;  
19 John Colvin, Chief Counsel; Bill Wilkins, Minority Chief  
20 Counsel; Greg Jenner, Lindy Paull, Tax Counsel, Majority;  
21 Randy Hardock, Tax Counsel, Minority; Susan Taylor,  
22 Executive Assistant.

1 The Chairman. The Committee will come to order, please.

2 Let us continue on on the subject of depreciation. And  
3 we had before us the Roth-Baucus et al amendment yesterday.  
4 And I would like to continue discussion on that and see if  
5 we can possibly dispose of it sooner or later.

6 Who wants to talk? Or should we simply move its  
7 adoption?

8 Senator Moynihan. Let me talk a little bit. I wonder  
9 if I could ask Secretary Darman or Mr. Brockway or whoever  
10 would like to answer: We made the point yesterday that  
11 one of the aspects of a productivity property designation  
12 in the accelerated depreciation schedule is that it tends to  
13 take a static photograph of what are export oriented  
14 markets at this moment when those markets are very much  
15 designed to change.

16 I think Senator Durenberger made the point yesterday  
17 that if you look at this list of goods that are to be  
18 given special treatment, you look at the traditional makeup  
19 of the Senate Finance Committee. We are from the extractive  
20 industries, the states that are sort of primal in their  
21 products. Although manufacturer of tobacco and tobacco  
22 products, I don't see that fellow around here, but I guess  
23 I am wrong about everything.

24 But the idea that land improvements and manufacture of  
25 athletic jewelry -- all this is sort of 19th century industry.

1 And if there is one big thing this Committee has been moving  
2 toward in trade matters is can we not get open trade barriers  
3 with respect to something we are newly competitive in, which  
4 is service. And we are talking about a GATT round that  
5 would bring in services.

6 And what we specifically leave out here are those  
7 aspects of technology which make our service effective. I  
8 mean computers, desk computers. And isn't this always the  
9 problem of state economic planning? That the planning tends  
10 to reflect old realities, not new ones; necessarily rigid.

11 And there is a word for it. It is called state  
12 capitalism. And you pick the winners and losers, and then  
13 you bet on the losers because almost always the losers have  
14 the largest --

15 (Laughter)

16 Senator Moynihan. So you go all over the world and you  
17 see this. They say it is -- they call these socialist  
18 regimes of the third world. They are mostly state  
19 capitalist regimes. The production techniques are owned  
20 privately, but the government decides what will be supported  
21 by tariffs and subsidies. And pretty soon you get a political  
22 interplay which is inevitable.

23 And does the Treasury really not think this is what we  
24 are doing? I mean, Mr. Darman, do you not think we are  
25 picking winners and losers here on a most arbitrary basis?

1 This is, in a sense, an industrial policy written into the  
2 depreciation schedule.

3 Mr. Darman. Senator Moynihan, thank you for that  
4 question. It gives me an opportunity to remind you and  
5 members of the Committee that Treasury originally favored  
6 an extremely neutral approach --

7 Senator Moynihan. Yes. A market --

8 Mr. Darman. -- a market tax policy in which we said,  
9 as you are suggesting, the market would and should do most  
10 of the allocating of resources. We continue to believe that  
11 that is the best approach.

12 However, it has been clear from the day the Treasury 1  
13 was launched -- I was not at the Treasury at the time. I  
14 had a more neutral perspective from which to observe. It  
15 was clear that there was close to zero practical political  
16 support for that approach, even though it has a number of  
17 distinguished theorists who favor it.

18 So we modified Treasury 1 in a direction that began to  
19 deviate somewhat from market neutrality, market-oriented  
20 neutrality, and made some choices. And we were criticized  
21 in the process, but I think they accommodated political and  
22 practical reality to some degree.

23 The House went on to make some further choices. And it  
24 was very clear in conversations with the Senate Finance  
25 Committee that the Senate Finance Committee intended to make

1 further choices. And I believe you yourself, Senator, were  
2 quite eloquent in recognizing that the decisions made by  
3 this Committee are inescapably decisions that involved the  
4 selective provision of tax benefits in one way or another.

5 And so I think we have long since passed the issue of  
6 pure philosophy. By your way of characterizing this, we  
7 have been in the business of state economic planning for as  
8 long as we have been in the practical political process.

9 It seems to me an inescapable fact of political life.  
10 Senator Moynihan. But could I ask you, sir? At this  
11 level of detail, isn't this a new level of detail?

12 Mr. Darman. No, I wouldn't say this is a particularly  
13 new level of detail. It is my observation that as we  
14 approach the final days of development of the bill in the  
15 House where there were a number of advocates of neutrality  
16 there were some extraordinarily specific adjustments made  
17 in the last several days.

18 Senator Moynihan. But that was called "boat buying."

19 Mr. Darman. Well, I didn't characterize it as such, but  
20 it seems to me that almost every tax bill over the many years  
21 has at one stage or another had some accommodation of  
22 particular political interest.

23 In this case, if I may say, in this case I take it that  
24 the authors have in mind an economic principle in the  
25 enhancement of U.S. competitiveness through the identification

1 of what is productivity property. And it seems to me that  
2 the debate is what is or isn't productivity property, within  
3 the framework at least of the amendment as proposed by the  
4 sponsors.

5 Senator Moynihan. My question to you would be simply  
6 that we fully understand that, you know, this district or  
7 even that state needs something and as a political matter  
8 that is how you put together a majority. But this is an  
9 economic principle we have here before us.

10 And I would have thought that you would have found an  
11 economic principle that won't work. You cannot figure it  
12 out. You can say this should be our principle, but you  
13 can't apply it. It is just too elusive.

14 Mr. Darman. If I could respectfully suggest, Senator  
15 Moynihan, that that question ought to be directed to the  
16 authors because the --

17 Senator Moynihan. Well, the authors aren't here, sir.

18 Mr. Darman. We did not participate in the process that  
19 developed the specific discriminations.

20 Senator Moynihan. Yes.

21 Mr. Darman. We said we could accept the issue of  
22 principle that there would be some discrimination on the  
23 basis of a category to be called productivity property. But  
24 the specific discrimination that has been made has been  
25 worked out among the authors.

1           Could I add one other point, if I might? On your  
2 initial observation with respect to the service sector and  
3 U.S. competitiveness, I think your general point about the  
4 dynamic nature of technological development and changes in  
5 comparative competitiveness is right. But I would note  
6 that with respect to the service sector the main impediments  
7 to competitiveness have much more to do with investment  
8 treatment abroad than they do with domestic tax treatment,  
9 in my opinion.

10           Senator Moynihan. I think this Committee has been  
11 dealing with that. I am not trying to harass anyone. I  
12 am just trying to say: I think you have made an important  
13 point, Mr. Chairman, that this particular schedule does  
14 not -- it is not that last minute trading involved. This is  
15 an economic principle of sorts we are putting into the  
16 tax code, and it is a principle I don't think -- I don't  
17 think it will work.

18           I mean would anybody be able to say -- would Mr. Brockway  
19 be able to tell me what proportion of leather and leather  
20 products that are manufactured in the United States are  
21 exported? Mind you that the degree to which if you are  
22 competitive with imports, that is an element too.

23           Mr. Brockway. I expect we could get that information.  
24 I do not have that information right now.

25           Mr. Darman. Senator Moynihan?

1 Senator Moynihan. Sir.

2 Mr. Darman. Excuse me. I know that the authors by and  
3 large are not here, and I suggest that I and Treasury have  
4 not participated in the process. I do know that at one  
5 stage their rationalization was related to the question you  
6 are asking. And that is the percent of import and export  
7 involvement of the sector. And they were working from what  
8 is an available list.

9 Senator Moynihan. Commerce.

10 Mr. Darman. Yes, exactly.

11 And I think there was a relatively high degree of  
12 correspondence between those things which they put on the  
13 list as being productivity related and those things which  
14 had a high degree of export or import sensitivity.

15 But I just volunteer that on their behalf since they  
16 are not here.

17 Senator Moynihan. I am not trying to monopolize this  
18 conversation. I was invisted. The Chairman said anybody  
19 want to talk before you two gentlemen came in, the three of  
20 you.

21 Does anybody know what that calculation was? At what  
22 point you qualify as a productivity category. Some  
23 arithmetical designation, I gather.

24 Mr. Darman. You may see my eyes wandering around the  
25 room looking for one of the authors.

1 Senator Moynihan. The authors are rather conspicuously  
2 absent.

3 The Chairman. Further comments on the Baucus-Roth et al  
4 proposal?

5 Senator Danforth. I have a question.

6 Senator Symms. I have a question also, Mr. Chairman,  
7 when we get around to it.

8 Senator Danforth. In calculating revenue effects in  
9 this bill on indexing, what is the -- what estimate for  
10 inflation do we use?

11 Mr. Brockway. In the Joint Committee's revenue estimates  
12 we assume a four-year -- I mean a four percent level of  
13 inflation.

14 Senator Danforth. You assume four percent level of  
15 inflation.

16 Mr. Brockway. Each year.

17 Senator Danforth. Each year throughout this five-year  
18 period of time.

19 Mr. Brockway. We take the CBO assumptions where they  
20 have them, and after that we straight line it at a four  
21 year --

22 Senator Danforth. I can't hear you.

23 Mr. Brockway. During the window period, we use CBO  
24 assumptions.

25 Senator Danforth. Yes.

1 Mr. Brockway. And then after that period for running  
2 it, looking at what impact it might have on the long-run  
3 basis is something else.

4 Senator Danforth. I think your sound is on, but it  
5 must be turned way down.

6 Mr. Brockway. We used the numbers the CBO projects  
7 during the period, and they are roughly four percent. The  
8 impact, basically, is a four percent assumption of  
9 inflation.

10 Senator Danforth. And, Mr. Darman, you just handed me  
11 a sheet of paper which I haven't had the opportunity to  
12 digest. But does this -- this shows revenue effect of  
13 indexing basis for depreciation? Is that right?

14 Mr. Darman. It shows the effect of -- yes is the short  
15 answer. As you can see, it shows the revenue loss or gain  
16 associated with the Chairman's package with two point two  
17 to eight percent indexing compared with zero to eight  
18 percent indexing. And then it makes the same set of  
19 comparisons on a fully phased in basis, which -- both of  
20 which tables, or the two halves of the table you see before  
21 you, are, I think, at least partially responsive to your  
22 line of questioning yesterday.

23 And this morning, as I understand, you were just asking  
24 for, in effect, different inflation rates. And we --

25 Senator Danforth. Well now, what I am asking for is

1 whether in computing revenue estimates on the bill -- we assume  
2 a rate of inflation over the next five years, and my  
3 question to you is in computing this information did you  
4 assume a rate of inflation?

5 Mr. Darman. Yes. And as you can see, what we did is  
6 we have given you three different sets of estimates at  
7 three different inflation rate assumptions -- two, four and  
8 eight percent inflation rate assumptions. So that you can  
9 see what happens with inflation.

10 And as we were discussing yesterday, it becomes clear  
11 that as inflation rises the revenue loss relative to a  
12 system in which there were no indexing rises with indexing.

13 Senator Danforth. Right.

14 Mr. Darman. But that, of course, as I was trying to  
15 suggest yesterday, is a reason to put a cap, if you wish.

16 Senator Danforth. Yes.

17 Mr. Darman. But it doesn't, to my way of looking at it,  
18 have any relationship to the question of a floor.

19 And what I think this table suggests -- and we would be  
20 happy to go over the back-up detail with you or your staff,  
21 if you would like, but this in a summary way suggests that  
22 looking just at the depreciation system, only at the  
23 depreciation system, excluding the ITC, and, of course,  
24 excluding all other provisions of the bill, the Chairman's  
25 proposal, in fact, raises revenue by our estimates, and would

1 do so at all inflation rates within the zero to eight  
2 percent range or higher. And that if you added -- excuse  
3 me, the two to eight percent range. And if you added what  
4 we have suggested and what is in the Roth amendment, that is  
5 indexing from zero to eight, it would have the effects  
6 indicated here, which I would say are rather modest effects.  
7 There is certainly no major revenue loss. And there is an  
8 enormous favorable affect on the cost of capital, which we  
9 had at one stage been led to understand was the principal  
10 concern of the Committee.

11 Senator Danforth. This shows Chairman's package,  
12 exclusive of the ITC repeal.

13 Mr. Darman. Yes.

14 Senator Danforth. And the Chairman's package with  
15 two point two to eight percent indexing and Chairman's  
16 package with zero to eight percent indexing as -- I mean  
17 these -- in other words, these first two numbers here, this  
18 is the Packwood package. This isn't the Roth package.

19 Mr. Darman. That is right.

20 Senator Danforth. The only difference between the first  
21 two is whether it is two or eight, right?

22 Mr. Darman. Right.

23 Senator Danforth. I mean two to eight to zero to eight.

24 Mr. Darman. Right. This goes only to the question:  
25 What is the effect of changing from two to eight percent

1 indexing to zero to eight percent indexing. And it answers  
2 that question.

3 Senator Danforth. Let me ask you this: These numbers  
4 here that one picks up 35 and the other 30, that is  
5 exclusive of expensing, the 50,000 expensing?

6 Mr. Darman. That is correct.

7 Senator Danforth. How much does that lose?

8 Mr. Darman. Well, the Joint Committee has estimated  
9 that, I believe, at about -- I should defer to them.  
10 Twenty-two nine.

11 Mr. Brockway. Twenty-two nine under the proposal, but  
12 we have a different set of numbers entirely from these so  
13 you just really --

14 Senator Danforth. You have different numbers. We are  
15 going to have to go and vote right now. I would like to see  
16 your numbers, too, Dave.

17 But in other words, there is about -- instead of 30,  
18 it should be more like eight for the zero to eight.

19 Mr. Darman. Except for the fact that -- yes, if you  
20 want to include expensing. And if you want to include the  
21 ITC, it will be a much larger positive number. We  
22 confined it to the depreciation system because indexing only  
23 applies to the depreciation system.

24 Senator Danforth. All right. Well, we are half way  
25 through a roll call vote on the floor. So we will be in

1 recess for about five minutes or so.

2 (Whereupon, at 10:55 a.m., the meeting was recessed.)

3 AFTER RECESS

4 (11:06 a.m.)

5 The Chairman. Let us continue on. Again, let me  
6 emphasize the schedule. It would be my hope that we can  
7 finish depreciation possibly this morning. I would like to  
8 get accounting done this afternoon. And if we cannot move  
9 onto the foreign tax proposals this afternoon -- I will  
10 have to simply wait and see. But there will be votes through  
11 the afternoon.

12 On Monday afternoon we had initially scheduled a  
13 hearing on or a discussion of bonds and we had another  
14 morning on bonds, but I have a feeling we may be able to  
15 reach a compromise on that and we won't need both Monday  
16 afternoon and another morning for discussion. In which  
17 case I would use Monday afternoon to continue on with some  
18 votes on areas where we may not have otherwise reached an  
19 agreement.

20 And I might even use that afternoon to see if we can  
21 finish the employee benefits section. So far, I have  
22 received only one amendment. There may be one or two  
23 others. But if we had that section and had only a few  
24 amendments, we will try to finish that that day.

25 But at the moment, we have the principal sponsor of

1 depreciation here. And perhaps Senator Roth would like to  
2 make some comments.

3 Senator Roth. Mr. Chairman, I would rather make some  
4 comments when we have those here who have raised a number  
5 of questions.

6 Again, I would like to underscore why I think this  
7 amendment is desirable. I really feel very strongly that  
8 the purpose -- one of the principal purposes of our tax  
9 policy must be to help this country become competitive in  
10 world markets. And one of the areas that I think the  
11 draft proposal, the House proposal in particular, is  
12 deficient is with respect to the depreciation of equipment.

13 Now there is no question of what we have a very strong  
14 challenge from abroad in many of these areas that would be  
15 impacted by this amendment. And the one chance we have of  
16 overtaking our competition and being a leader in these areas  
17 is by developing a kind of policy that will help those  
18 industries who depend on modern technology and equipment to  
19 incorporate them in their facilities. And that, of course,  
20 is the basic purpose of this proposal.

21 Now there has been a lot of talk, a lot of talk, that  
22 the proposal is industrial policy. But, ladies and  
23 gentlemen, there is just no truth to that charge in any  
24 manner whatsoever.

25 The idea of so-called industrial policy is that

1 government decides, targets, certain industries for growth  
2 or phase out. That they play God, so to speak, in those  
3 cases.

4 And let me tell you I am very much opposed to an  
5 industrial policy for this country. And I would in no way  
6 support legislation that was going to push that approach.

7 And that is not what this amendment does. And let me  
8 be very frank with you, Mr. Chairman, and the others. You  
9 know as well as I do that this proposal -- I would be the  
10 last to claim is perfect, but we think it represents a  
11 reasonable compromise, a reasonable compromise that will  
12 achieve the goals that I think are necessary.

13 I see Senator Mitchell is now here, and I guess Senator  
14 Chafee was another one that argued the industrial policy.

15 But what is being overlooked is that this amendment,  
16 this proposal, is not targeting particular, specific  
17 industries for growth or decline or for whatever the  
18 government policy would be.

19 What our amendment is doing is providing accelerated  
20 depreciation to a tremendously broad class of assets. It  
21 involves manufacturing. It involves extraction. It  
22 involves agriculture. It involves communications and  
23 transportation.

24 It is absolutely ludicrous to try to argue that this  
25 approach is picking winners and losers. Now as I mentioned

1 earlier -- may I have the attention of the --

2 As I mentioned earlier, our definition of productivity  
3 property almost directly tracks Section 48(a)(1)(b) of the  
4 Internal Revenue Code which defines what property is  
5 eligible for the investment tax credit. The list of  
6 qualified property is not arbitrary. The ADR class as  
7 listed correspond to property that qualifies under the code  
8 for the ITC. And people have not been arguing, at least that  
9 I am aware of, that ITC was a so-called industrial policy.

10 Now there are some modifications to this definition.  
11 Property used in services does not qualify. And there are  
12 several reasons for this exception, one of the most  
13 important being that of the impact on revenue. We are trying  
14 to minimize the impact. I know that is important to the  
15 members of this Committee.

16 But I would also point out that as far as services are  
17 concerned, equipment is a much smaller component in the  
18 cost of capital for services. To the contrary, rates are  
19 much more important. We are reducing rates so that will  
20 be a significant help to the service industry. As a matter  
21 of fact, I think it is relevant just to point out that a  
22 lot of the service industries were supporting the House  
23 bill, which, frankly, I think had very miserable  
24 depreciation treatment. They didn't care.

25 Now another question that has been raised is why are

1 computers not covered. Well, I think it should be pointed  
2 out that computers have already been taken care of. They  
3 have been moved from the five-year category to the three-  
4 year category, so that we felt that that was favorable  
5 treatment for them.

6 Now as I said earlier, this is not a perfect proposal.  
7 It is one that we have sought to work out with members of  
8 the Committee on both sides of the political aisle, worked  
9 out in the sense of being gravely concerned about revenue;  
10 tried to minimize the so-called revenue dabbies. Very  
11 frankly, I would prefer a much broader approach, but the  
12 revenue drain would be large. In fact, I would be very  
13 willing to offer my expense program that is part of my  
14 reform package, because I think it does a much more  
15 effective job of meeting the problems here than the one  
16 that we have.

17 It does equalize effective tax rates across all  
18 industries and assets, and it gets the cost of capital down.  
19 I think it satisfies the Treasury. But it costs considerable  
20 money. However, I would say, Mr. Chairman, that if my  
21 good friends, Mr. Chafee, Mr. Mitchell and Mr. Moynihan,  
22 would like to offer the Roth-Mitchell-Chafee-Moynihan  
23 amendment to incorporate my ECRS plan, I would be happy to  
24 do that.

25 But since it is pretty clear that that is not practical

1 at this stage, I think this amendment is probably the best  
2 compromise that can be worked out. It reduces, again, the  
3 bias against equipment for a very broad class of assets;  
4 lowers the cost of capital for the entire producing sector  
5 of this economy. And I would hope that it would be acted  
6 favorably.

7 The Chairman. Further discussion? Senator Mitchell  
8 had his hand up first and then Senator Bentsen.

9 Senator Mitchell. No, you, Senator Bentsen.

10 The Chairman. All right, Senator Bentsen.

11 Senator Bentsen. I would rather try to rebut what you  
12 say on it.

13 (Laughter)

14 Senator Bentsen. Rather than you having a shot at me.

15 Senator Mitchell. Whatever you say, Mr. Chairman.

16 (Laughter)

17 The Chairman. Go ahead, George.

18 (Laughter)

19 Senator Mitchell. I would like to ask, Mr. Chairman, if  
20 someone, a member of the staff, at the Treasury would explain  
21 if this has not already occurred -- and if it has, I  
22 apologize because we were all out for a vote -- the  
23 document entitled "Five-Year Depreciation Revenue Estimates,"  
24 which has just been distributed. And I assume that -- well,  
25 I guess rather than stating an assumption, if it has not been

1 explained, would it be possible to have that done?

2 The Chairman. Mr. Darman, can you explain that?

3 Mr. Darman. Senator Mitchell, I believe to some degree  
4 it has been explained already before you arrived. But I  
5 suppose -- might you have a particular question or would you  
6 like me to go over the whole chart?

7 Senator Mitchell. Well, the top heading says "Five-  
8 Year Depreciation Revenue Estimates." Does that five years  
9 cover the entire document or is that only the first two  
10 figures half way down the page? And does the second  
11 category relate to a different period of time?

12 Mr. Darman. There are basically two charts. The heading  
13 of one is "Five-Year Depreciation Revenue Estimate Exclusive  
14 of ITC." Those are the two numbers that you see there --  
15 35.3 and 30.8, under two different assumptions.

16 Senator Mitchell. And revenues would increase relative  
17 to current law over that period?

18 Mr. Darman. Right. But as I suggested before you  
19 arrived, Senator -- and I recognize this may be on your  
20 mind -- this does not include treatment of the expensing  
21 provision. And, of course, it does not include the ITC,  
22 and it does not include all other provisions of the law. It  
23 is addressed exclusively to the depreciation system.

24 Senator Mitchell. Right.

25 Mr. Darman. And then the second table, in effect, is

1 headed "Fully Phased In Depreciation Revenue Estimates."  
2 That is not on a five-year basis. That is on an annual  
3 basis, because a number of people have been asking: Well,  
4 what is the long-term revenue loss associated with these?  
5 Could we please produce numbers with respect to those?

6 And the way in which we have done that is we have  
7 calculated what would be the annual revenue loss associated  
8 with these and other provisions assuming that the entire  
9 package were fully phased in.

10 Senator Mitchell. Is there any reason why that was not  
11 done on a five-year basis as all other estimates have been  
12 done?

13 Mr. Darman. It is done both ways. It is done on a  
14 five-year basis, which is the first table --

15 Senator Mitchell. No, I meant for the second five-year  
16 phase.

17 Mr. Darman. Oh. Well, the conventional way of  
18 estimating fully phased in has not been to go beyond five  
19 years and do the sixth year, seventh year, eighth year and  
20 ninth year and tenth year because those years -- the  
21 particular numbers for those years will vary a lot  
22 depending on particular economic assumptions for those  
23 years and other variables.

24 The conventional way of estimating has been, at least  
25 at Treasury, has been to say let us take some numbers we

1 know that we have confidence in. The 1986 levels of  
2 activity in 1986 economic assumptions. Let us assume that  
3 whatever the proposal is had been in effect forever up to  
4 this date, and say what then would be the annual revenue  
5 loss in 1986 dollars, the year you are in dollars, associated  
6 with the proposal if it had been fully phased in forever.

7 That has been the way of calculating it. And it is,  
8 I think, a more accurate indicator of what the steady state  
9 effect to the proposal would be than picking any particular  
10 year in the future.

11 Senator Mitchell. You just said that the assumptions  
12 as to economic -- you didn't use the word "performance."  
13 I think you said "growth." That it would affect the  
14 estimate, as is obvious.

15 I notice that the first footnote is that this assumes  
16 four percent real growth. So I gather that what this is  
17 based upon is an assumption of four percent real growth  
18 indefinitely over a long period of time in each year.

19 Mr. Darman. That is correct. But if I could add one  
20 point here.

21 In comparing with current law, we have used the same  
22 economic assumptions for current law and for any proposal.  
23 Now if you change the growth rate, you will have a different  
24 effect. But the way we have approached that is always to  
25 change it simultaneously for current law and for whatever is

1 being compared with current law to try to control for that  
2 uncertainty to some degree.

3 Senator Mitchell. I understand that. But, of course,  
4 you could produce substantial effects with respect to  
5 revenue estimates under either alternative, current law or  
6 any proposal, by varying the assumption as to real growth.

7 Mr. Darman. That is right.

8 Senator Mitchell. And my next question is: To what  
9 extent are these estimates influenced by that assumption?  
10 And may I perhaps be more specific: If you assumed a two  
11 percent real growth, would these figures, particularly this  
12 portion of the document entitled "Fully Phased in  
13 Depreciation Revenue Estimates" be dramatically altered?

14 Mr. Darman. These are growth -- I should clarify. Where  
15 it says, the footnote: "Assumes four percent real growth."  
16 This is four percent real growth in investment. That is a  
17 substantially more conservative assumption of growth and  
18 investment than the Administration's own assumption.

19 If we were to use the Administration's higher growth  
20 assumption, these numbers would be more favorable.

21 Senator Mitchell. I see. So that is not real growth  
22 in the economy?

23 Mr. Darman. No. It is real growth in investment.

24 Senator Mitchell. All right. Mr. Darman, could I --  
25 this may have been asked. Again, I apologize to the members

1 of the Committee if this is repetitious in any way. But I  
2 have not heard a response to this question: Does the  
3 Administration support this amendment and urge us to vote  
4 for it?

5 Mr. Darman. The short answer would be yes.

6 Senator Mitchell. Thank you.

7 Mr. Darman. It merits a longer answer, but I might  
8 spare you that.

9 (Laughter)

10 Mr. Darman. We have had a certain amount of discussion  
11 about the question of productivity property. The other  
12 elements we have no problem with whatsoever in the proposal.  
13 And we particularly think the indexing portion is important.

14 The productivity property category involves an issue of  
15 principle that relates to deviation from neutrality and  
16 having the market do the allocating. And as I suggested  
17 before you arrived, Senator, our original position and in  
18 a non-political pure world our continuing position would be  
19 that we would favor having the market do the allocating  
20 purely.

21 As a matter of practical political reality, we do not  
22 think that the Congress or this Committee is going to leave  
23 it entirely to the market. There is no evidence to suggest  
24 that that is what is going to happen.

25 So if one is not going to leave it entirely to the market,

1 it seems to us desirable that there be some principles for  
2 making discriminations in favor of acceleration. And this  
3 Committee has, in effect, suggested that it is interested  
4 in a principle that would improve U.S. competitiveness.

5 It is from that that I understand they have derived the  
6 notion of productivity property as a category. And we have  
7 said we can accept that principle.

8 The particular discrimination that has been made in  
9 favor of one set of assets or another as to what should be  
10 in that category or not, we have not participated in. By  
11 and large, we think it is a defensible distribution, but we  
12 would have some reservations about particular elements.  
13 That is the nature of my footnote.

14 Senator Mitchell. And would I be unfair to interpret  
15 your footnote as saying, well, okay, and we will fix it in  
16 conference?

17 Mr. Darman. Yes, I think that would be unfair.

18 Senator Mitchell. Then I won't say that.

19 Thank you, Mr. Chairman.

20 The Chairman. Further discussion before we vote?

21 Senator Bentsen. Yes.

22 The Chairman. Senator Bentsen.

23 Senator Bentsen. Mr. Chairman, what you have here is,  
24 as Secretary Darman is talking about and certainly Senator  
25 Mitchell is pointing to, a philosophical different approach,

1 and whether or not the tax system should be used to try to  
2 achieve certain economic objectives or not.

3 And I am motivated a great deal by the fact that we have  
4 this \$148 billion trade deficit. And I know that we are  
5 becoming the principal debtor of the world. And for the  
6 balance of this decade and certainly into the 1990's, we  
7 are going to finally have to sell more than we import. And  
8 I certainly agree with Senator Bradley that the exchange  
9 rate is going to be one of the very major causes of whether  
10 or not we win or lose in that fight.

11 And there are quite a number of other factors involved.  
12 But one of them is the cost of capital. That is one of the  
13 facets of the problem. And it certainly is a controversial  
14 matter when you start picking and choosing among assets  
15 and deciding if you are going to favor one over the other.

16 And you do that when you talk about a 200 percent  
17 declining balance on depreciation for a particular class that  
18 you label as productivity property.

19 I do think it is helpful in that kind of competition on  
20 trade. My good friend from Maine made a point yesterday  
21 that a single asset would receive different treatment  
22 depending on how it was used. If it was used in  
23 manufacturing, it would receive more favorable treatment  
24 than if it was used in the service industry.

25 But what was not pointed out is that same disparity

1 exists right now on a category of property that is labeled  
2 "Other Tangible Property."

3 Now other tangible property is property that is not  
4 personal property, nor is it buildings. It would include,  
5 for example, a special platform that was built for  
6 manufacturing. Under current law, if such a platform is  
7 used in manufacturing, production, extraction, or in the  
8 furnishing of transportation, communications, electrical  
9 energy, gas, all of that, it qualifies for an investment tax  
10 credit. But if it is used in the typical service business,  
11 then it does not qualify.

12 There are numerous types of property in the other  
13 tangible property classification. An example of that is  
14 the roads, bridges, docks, railroad tracks, blast furnaces,  
15 pipelines, broadcasting towers for all of these types of  
16 property under the current law. The availability of the  
17 investment tax credit depends on what type of business the  
18 property is used in.

19 The point is that the current law already makes  
20 distinctions not only between types of properties but  
21 between the uses of the property.

22 So we are not talking about a radical change. We are  
23 talking, once again, about trying to encourage the  
24 productivity in the country to make it more competitive.

25 It merely means that the line that currently exists

1 between investments and different types of property would  
2 be drawn a little more sharply. For example, under current  
3 law a dock that was installed by a manufacturer would  
4 qualify for the ITC; whereas, a dock that was built for a  
5 marina would not qualify.

6 So this is what we are addressing. It is not a perfect  
7 proposal, certainly. And I am sure it will probably be  
8 massaged and changed some. But I do think it has a lot to  
9 commend it, and I support that proposal.

10 Senator Chafee. Mr. Chairman.

11 The Chairman. Just a second.

12 Senator Bradley was next, and then Senator Danforth,  
13 Senator Chafee and Senator Heinz and Senator Baucus.

14 Senator Bradley. Mr. Chairman, I would like just to ask  
15 Treasury on this piece of paper that we received, 1987-1991  
16 revenue change relative to current law. Are you saying that  
17 under the Chairman's proposal that the Chairman's proposal  
18 would raise an additional \$35 billion, and that the Roth  
19 proposal would raise an additional \$30 billion?

20 Mr. Darman. No. No, Senator. I am sorry. If I could  
21 clarify.

22 Senator Bradley. Yes.

23 Mr. Darman. The second alternative there is not the  
24 Roth proposal. This piece of paper was intended to respond  
25 to Senator Danforth's rather narrow question on indexing, the

1 effects of indexing.

2 And the first proposal is the Chairman's package. The  
3 second one is not the Roth package. It is the Chairman's  
4 package modified in the way that the Roth approach modifies  
5 indexing. But that is all.

6 Senator Bradley. All right.

7 The number that I am looking for is how much more does  
8 the Roth proposal cost over the Chairman's proposal.

9 Do I ask Joint Tax?

10 Mr. Darman. That is right. You would need an  
11 entirely different sheet.

12 Mr. Brockway. If you are talking about the pending  
13 Roth proposal as compared to the Chairman's, it is \$14.8  
14 billion over the period, over the five years.

15 Senator Bradley. Fourteen point eight billion dollars  
16 more expensive.

17 Mr. Brockway. That is correct.

18 Senator Bradley. Well, I think that that is a number  
19 that we should know. We are now spending \$14.8 billion more  
20 on this depreciation, productivity property, whatever you  
21 want to call it, than we were prior to the adoption of this  
22 minute. That would put the whole effort of tax reform  
23 \$14.8 billion further behind the eight ball. We would have  
24 to raise \$14.8 billion more.

25 Now let me, if I could -- yesterday, I also asked

1 Treasury or Joint Tax so that we could make an informed  
2 judgment on the exact point that Senator Bentsen raised  
3 which is the cost of capital. Could you tell me, if you  
4 have gotten the numbers, what is the cost of capital on the  
5 assets in the productivity property class under current  
6 law, under the Roth-Packwood proposal and in the  
7 circumstance in which there was no corporate tax on these  
8 assets at all?

9 Mr. Brockway. On the productivity property under the  
10 Roth amendment, under present law, the cost of capital  
11 would be five point four.

12 Under Senator Roth's proposal, it would be six point two.

13 If you had no federal corporate tax, it would be  
14 five point five. In other words, slightly higher than  
15 present law.

16 Senator Bradley. Five point five. So current law  
17 essentially is negative?

18 Mr. Brockway. Very slightly, yes. That is correct.  
19 By the estimating assumptions used. That is a combination  
20 of the investment credit and depreciation.

21 Senator Bradley. As I read this -- and I would like  
22 to address this question, I guess, to Senator Roth as the  
23 sponsor of the amendment and taking as his explanation of  
24 the amendment to try to improve our competitiveness -- that  
25 you have listed a number of assets that are included in the

1 productivity property class and then you have II, "Property  
2 included in productivity property class if used in  
3 productive property activity classes." And as I read  
4 this, you have general purpose trucks are not included in  
5 the productivity property class unless they are engaged in  
6 transportation of an approved activity in the first Roman  
7 numeral of the productivity property class.

8 Now what that means, as I read this, is if I have a  
9 truck and I use it to transport jewelry or baseball gloves,  
10 I can put that truck in productivity property class. But  
11 if I have that truck to transport textbooks, I can't.

12 And since education is a major component of any effort  
13 to be competitive, I would like to know what is the  
14 rationale for favoring baseball gloves over textbooks.

15 Senator Moynihan. What if it was a textbook about how  
16 to play baseball?

17 (Laughter)

18 Senator Bradley. Unfortunately, they wouldn't know how  
19 to properly use the gloves that they were being subsidized  
20 to purchase.

21 Senator Moynihan. You underestimate the capacity of  
22 our bloated bureaucracy to make decisions?

23 Senator Bradley. Yes.

24 (Laughter)

25 The Chairman. Further discussion?

1           Senator Bradley. Well, I would like to have the answer  
2 to the question.

3           (Laughter)

4           Senator Roth. Are you through?

5           Senator Bradley. No, I am not through. I would like to  
6 have the answer to the question.

7           Mr. Brockway. Senator Bradley, in your example, the  
8 use of a truck would depend on whether the user was in one of  
9 the categories listed as a productivity property class.

10          Senator Bradley. Right. It says: "Manufacturer of  
11 athletic, jewelry and other goods."

12          Mr. Brockway. Correct. But also item Asset Guideline  
13 Class 27 under the ADR regs includes printing, publishing  
14 and allied industries. So a printer or a publisher who had a  
15 truck would be treated -- that truck would be treated as  
16 productivity property the same way as a manufacturer of  
17 jewelry if he had a truck and used it in that business  
18 would be productivity property.

19          If you had a taxpayer who was a, for example, utility or  
20 trade or distributive service, that that taxpayer would not  
21 be productivity property. It would --

22          Senator Heinz. Senator Bradley, would you yield for a  
23 clarifying question?

24          Senator Bradley. Sure.

25          Senator Heinz. What you are saying then, Dave, is

1 that textbooks and baseball gloves and jewelry would be  
2 considered productivity property and the truck used to  
3 transport them would get the benefit. But if the truck was  
4 used to transport hamburger buns to a fast-food outlet  
5 from the warehouse, it wouldn't.

6 Mr. Brockway. If it were the MacDonal'd's or whatever,  
7 their truck, you are correct. That is correct.

8 Senator Heinz. That sounds like pretty good policy to  
9 me.

10 The Chairman. Fellows, let us be serious. There is no  
11 perfect world. If we didn't have anything written in the  
12 law and you had each business trying to say what the useful  
13 life of each of its assets were, you are going to have  
14 arguments. You are going to have arguments when some people  
15 say this car is three years and somebody else says it is  
16 five years, and you can hassle the IRS, and they finally try  
17 to set up uniform regulations which you can then go to  
18 court and argue about.

19 Whether or not we have a -- I know what this compromise  
20 is. And I know how hard the principal sponsors on both  
21 sides worked to put it together. Is it perfect? No. Was  
22 the bill as I drafted it perfect? No. Was Treasury 1  
23 perfect on depreciation? No. These same kind of questions  
24 could be raised against any kind of depreciation schedule.  
25 At some stage, you have got to have some trust in the

1 administration of the law, and there will be mistakes made  
2 in the administration of the law.

3 But if you are going to wait until you have a perfect  
4 world and until you can write a perfect bill, we will write  
5 no bills, period, of any kind on depreciation or any other  
6 subject.

7 Senator Danforth.

8 Senator Danforth. Mr. Chairman, is it appropriate to  
9 offer an amendment which would go to either the Roth  
10 proposal or the Chairman's proposal?

11 The Chairman. It is in order.

12 Senator Danforth. Now, Mr. Chairman, I am going to  
13 offer two alternatives with respect to indexing of  
14 depreciation. One is to delete indexing of depreciation,  
15 and the other is to cap indexing for depreciation at four  
16 percent so it will be zero to four instead of either zero to  
17 eight or two to eight.

18 But let me ask this question: Mr. Darman, I have looked  
19 at the sheet that you handed out. On the face of the sheet  
20 it isn't clear what the cost of indexing for depreciation is.  
21 But it looks to me as though it works out to about one and  
22 three-quarter billion, roughly, per percent of inflation.  
23 I mean that is the -- if you had no indexing versus having  
24 indexing, depending on the rate of inflation, it would be  
25 in the neighborhood of about one and three-quarter billion,

1 somewhere around there, maybe \$2 billion per percentage  
2 point.

3 Mr. Brockway. Yes, that is roughly right.

4 Senator Danforth. Is it about two? Was that ball park  
5 two percent?

6 Mr. Brockway. I would rather you use one and three-  
7 quarter. I liked your first estimate.

8 Senator Danforth. Is it accurate? I mean I know you  
9 like it better, but is it accurate?

10 Mr. Brockway. The problem is it is not a linear  
11 relationship. You would get a different number if you were  
12 going from eight to seven than if you were going from five  
13 to four, say. But in the range you are talking about, one  
14 and three-quarters is the right number.

15 Senator Danforth. Would it go up or down as the  
16 percentage of inflation changes?

17 Mr. Brockway. We feel you can use one and three-quarters.

18 Senator Danforth. Straight line, so to speak?

19 Mr. Brockway. Yes.

20 Senator Danforth. All right.

21 And as time goes on, would it change a little bit?

22 Mr. Brockway. No.

23 Senator Danforth. No. I mean for eternity, it would  
24 be about 1-3/4 billion per percentage point?

25 Mr. Brockway. Well --

1 Senator Danforth. Ten years from now?

2 Mr. Brockway. That is right. As the whole economy  
3 grows, that number is going to grow, but so is the entire  
4 revenue base. And as the percentage of the revenue base,  
5 it would not change. But the number would grow.

6 Senator Danforth. I am asking you about the number.

7 Mr. Brockway. Yes, the number would grow, but so would  
8 the whole revenue base.

9 Senator Danforth. Well, that is nice. I mean that is a  
10 supply-side concept.

11 Mr. Brockway. No, sir. No, sir. If I could respect-  
12 fully disagree. There is not one trace of supply-side  
13 presumption in that comment. It is making an assumption  
14 about whatever rate of growth you want to have in the  
15 economy, but not any additional growth, thanks to the tax  
16 proposal.

17 Senator Danforth. All right. Well, I am thinking more  
18 in terms of inflation growth rather than GNP growth.

19 But in any event, just for working purposes, the cost is  
20 about 1-3/4 billion per percentage point of inflation per  
21 year. So, therefore, if we assume a four percent inflation  
22 rate, the cost per year of indexing, if we are going to  
23 index the basis, the cost per year is about \$7 billion,  
24 correct?

25 Mr. Brockway. That is correct.

1 Senator Danforth. And if our estimate is to -- the  
2 cost per year is correct, that means over the five-year  
3 period that we are talking about the cost is -- well, it  
4 would be less than in the first years, obviously. But  
5 over a five-year period it is around \$35 billion per year,  
6 right, assuming four percent inflation?

7 Mr. Brockway. Per year?

8 Senator Danforth. Over a five-year period.

9 Mr. Brockway. That is right.

10 Senator Danforth. All right.

11 And, similarly, if we have an eight percent inflation  
12 rate and the indexing is zero to eight, if we have an  
13 eight percent inflation rate, then the cost of the program  
14 is in the neighborhood of \$14 billion each year that it is  
15 at eight percent?

16 Mr. Brockway. That is right.

17 Senator Danforth. Right.

18 Mr. Brockway. You're just --

19 Senator Danforth. Yes. I mean you put down eight  
20 percent, assuming hypothetical eight percent inflation, and  
21 I am saying if that is correct, you are talking about a  
22 cost to the Treasury not just for five years but out into  
23 the future of, if it is eight percent inflation, \$14  
24 billion a year. If it is four percent inflation, \$7 billion  
25 a year.

1 Mr. Brockway. That is right. Relative to what a  
2 non-indexed system would produce under the same set of  
3 assumptions.

4 Senator Danforth. Yes.

5 Mr. Brockway. But it is not a revenue loss relative  
6 to the prior year necessarily because with inflation --

7 Senator Danforth. I understand. I am talking the cost  
8 of this indexing scheme. We are talking about if indexing  
9 is eight percent, we are looking at \$14 billion a year  
10 revenue loss.

11 Mr. Brockway. Senator, you might consider this a  
12 semantic quibble, but the same point could be stated instead  
13 of a revenue loss as a revenue gain that would have taken  
14 place in a non-indexed system which is foregone in the  
15 amount you described.

16 Senator Danforth. Well, all right. But difference in  
17 revenue to the Treasury.

18 Now, Mr. Chairman, I will just make one assertion. I  
19 think and I guess that business people making decisions on  
20 the purchase of equipment are going to make it on the basis  
21 of what they are going to get in the first few years in  
22 depreciation probably, and that they are less likely to make  
23 the decision on the basis of whether or not the basis is  
24 indexed.

25 I will offer two amendments, assuming I lose on the first.

1 Maybe I won't lose on the first. The first is to delete for  
2 the purposes of both proposals, both the Packwood and the  
3 Roth proposal, delete indexing a basis. And if I lose on  
4 that, I will offer another one, which would be to cap it  
5 at four percent.

6 Mr. Darman has made an excellent point about the worth  
7 of capping. And I say if we are going to have a cap, let us  
8 cap it at what we assume inflation is going to be. We  
9 assume for all of the purposes of predicting the revenue  
10 effects of this bill that inflation was going to be at  
11 four percent, but let us assume it for the purpose of this  
12 if we have indexing at all.

13 The Chairman. Motion to eliminate indexing.

14 Senator Long.

15 Senator Long. I would just like to say one thing. Mr.  
16 Chairman, I am going to support that motion because looking  
17 at all the billions of dollars involved, if this were really  
18 a good idea to index this thing to inflation, I would have  
19 thought -- if it was a great idea, I would have thought I  
20 would have hordes of business people come to me and ask me  
21 to vote for that indexing. And I just haven't had it.  
22 Hardly anybody has asked me to do anything about indexing  
23 to inflation.

24 I think part of that is because, A, they have all got  
25 their orders in that those of them that have a lot of major

1 equipment to buy, and they have it where we are going to  
2 protect them for the investment tax credit for some time to  
3 come; they have got a fast tax write off under the ACRS,  
4 and what remains will get a pretty fast tax write off.

5 In addition to that, as sure as I am talking to you just  
6 if experience is anything to go by, the minute we hit a  
7 little economic slump somebody is going to come in and say,  
8 well, we have got to restore the investment tax credit; we  
9 have done it twice already.

10 And so I just have not seen the kind of support for the  
11 indexing it ought to have if it is as good as some people  
12 think it is. I am going to vote for the Senator's motion.

13 The Chairman. Senator Armstrong.

14 Senator Armstrong. Mr. Chairman, I think there is much  
15 merit in what Senator Danforth has said, but I am a little  
16 troubled by the sequence in which we are taking these issues.

17 I personally believe a far better proposal is the  
18 proposition which I think Malcolm Wallop will offer to go  
19 to 200 percent declining balance for everything. And were  
20 that to pass, then I would personally be glad to kick the  
21 indexing provision in the creek because exactly what Senator  
22 Danforth says, I think, is true. That the business people  
23 will look at their early year recovery in making capital  
24 outlay decisions. So as a matter of encouraging investment,  
25 I think that is the right combination.

1           It also seems pretty clear to me that it would be  
 2 cheaper from a revenue standpoint to go to 200 percent  
 3 declining balance for everything and do away with indexing  
 4 than to go to 150 percent and leave indexing in.

5           So I guess I am speaking in encouragement of somebody  
 6 to get 200 percent declining balance on the table and to  
 7 consider that issue first. If I am the only one whose  
 8 vote on the indexing issue would be predicated on that or  
 9 if there are plenty of votes on one side or another of the  
 10 issue then it doesn't make any difference. But I think those  
 11 two are closely related.

12           The Chairman. Questions on the indexing?

13           Senator Bradley. Mr. Chairman, how much revenue does  
 14 the Danforth amendment save?

15           (CONTINUED ON NEXT PAGE)

1 Mr. Brockway. The amendment to eliminate indexing  
2 entirely would raise \$7 billion. In other words, the Roth  
3 proposal would have lost \$14.8 compared to the chairman's  
4 mark.

5 This would mean, if it were adopted, the Roth proposal  
6 would lose \$7.8.

7 Senator Danforth. Seven per year?

8 Mr. Brockway. Now, Senator Danforth, that is over the  
9 five-year period. The numbers that you were discussing with  
10 Secretary Darman were the long-run estimates they were using,  
11 using current dollars. They are simply not comparable.

12 Senator Danforth. All right. What I am saying is when  
13 you look down the road when the effects of indexing are  
14 fully phased in, if it is four percent inflation, it is  
15 roughly \$7 billion a year; and if it is eight percent  
16 inflation, it is roughly \$14 billion per year that we would  
17 be saving.

18 The Chairman. Questions on the amendment of the Senator  
19 from Missouri? Those in favor will say "aye." The clerk  
20 will call the roll.

21 The Clerk. Mr. Dole?

22 Senator Dole. Aye.

23 The Clerk. Mr. Roth?

24 Senator Roth. Aye.

25 The Clerk. Mr. Danforth?

1 Senator Danforth. Aye.  
2 The Clerk. Mr. Chafee?  
3 Senator Chafee. Aye.  
4 The Clerk. Mr. Heinz?  
5 Senator Heinz. Aye.  
6 The Clerk. Mr. Wallop?  
7 Senator Wallop. No.  
8 The Clerk. Mr. Durenberger?  
9 Senator Durenberger. Aye.  
10 The Clerk. Mr. Armstrong?  
11 Senator Armstrong. (No response)  
12 The Clerk. Mr. Symms?  
13 Senator Symms. No.  
14 The Clerk. Mr. Grassley?  
15 Senator Grassley. No.  
16 The Clerk. Mr. Long?  
17 Senator Long. Aye.  
18 The Clerk. Mr. Bentsen?  
19 Senator Bentsen. Aye.  
20 The Clerk. Mr. Matsunaga?  
21 Senator Matsunaga. Aye.  
22 The Clerk. Mr. Moynihan?  
23 Senator Moynihan. Aye.  
24 The Clerk. Mr. Baucus?  
25 Senator Baucus. No.

1 The Clerk. Mr. Boren?

2 Senator Boren. No.

3 The Clerk. Mr. Bradley?

4 Senator Bradley. Aye.

5 The Clerk. Mr. Mitchell?

6 Senator Mitchell. Aye.

7 The Clerk. Mr. Mitchell?

8 Senator Mitchell. Aye.

9 The Clerk. Mr. Pryor?

10 Senator Pryor. Aye.

11 The Clerk. Mr. Chairman?

12 The Chairman. No.

13 Senator Armstrong. Mr. Chairman, I vote No.

14 The Chairman. Senator Armstrong votes no.

15 The Clerk. Thirteen yeas, seven nays.

16 The Chairman. The amendment is adopted, and indexing is  
17 out of both the Roth-Baucus proposal and the chairman's  
18 proposal.

19 You applied it to both, didn't you, Jack?

20 Senator Danforth. Yes.

21 The Chairman. That also applies to my proposal.

22 Senator Danforth. Yes.

23 The Chairman. Indexing is out. Senator Dole?

24 Senator Dole. Mr. Chairman, I wonder if based on the  
25 action taken on the Danforth amendment, as I understand, the

1 limitation on rental cars was imposed and returned for  
2 indexing basis without a two percent floor.

3 And I am wondering now if there is any reason for the  
4 distinction between rental cars and other cars such as a  
5 fleet of company cars, and how much it would cost to remove  
6 the limitation? Dave, do you have anything on that?

7 Mr. Brockway. I will have that in a second, Senator.  
8 I think that part of the rationale was that rental cars are  
9 heavy use vehicles. That is why they had a three-year  
10 straight line rather than five years, 200 percent declining  
11 balance.

12 The Chairman. Excuse me. I didn't hear the answer.

13 Senator Roth. I would be willing to go along with the  
14 suggestion of Senator Dole.

15 Senator Moynihan. Are they a productivity property?  
16 Rental cars?

17 Senator Roth. Yes.

18 Mr. Brockway. It would depend upon how the property  
19 was used: what taxpayer used the property, what activity.

20 Senator Symms. Could I ask a question? How is the  
21 interpretation of an automobile that a person uses to conduct  
22 his business, say a salesman, and drives it, say, 40,000  
23 miles a year? I don't see how we can fairly put that in a  
24 five-year classification. How would that be interpreted?

25 Mr. Brockway. A car that the salesman used would be

1 five years under the proposal. It would be five years,  
2 150 percent declining balance under the proposal.

3 If you switched autos to five years, 200 percent--excuse  
4 me--to three years straight line, that would be roughly \$2  
5 billion.

6 The Chairman. \$2 billion more?

7 Mr. Brockway. \$2 billion --

8 The Chairman. Over the three years for rental cars and  
9 light trucks?

10 Mr. Brockway. Correct. In other words, treating all  
11 autos the same way as rental autos and light trucks.

12 The Chairman. Are you making that as a motion?

13 Senator Dole. Yes.

14 The Chairman. Discussion on the motion?

15 Senator Symms. Now, is the motion, Mr. Chairman, so  
16 that all business-owned and used automobiles and light  
17 trucks will be going to three years?

18 The Chairman. That is the motion.

19 Senator Symms. I could support that.

20 The Chairman. Discussion? Senator Heinz?

21 Senator Heinz. Just a parliamentary question. Is this  
22 to the Roth proposal?

23 The Chairman. It is to the Roth proposal.

24 Senator Heinz. Thank you.

25 The Chairman. Which I assume at some stage we are going

1 to vote on in its totality, one way or the other.

2 Further discussion?

3 Senator Matsunaga. Does that mean, Mr. Chairman, that  
4 you will go back to the present law, taking the Roth amendment  
5 to the present law?

6 The Chairman. That is correct. All those in favor of  
7 the amendment --

8 Senator Long. That is not quite it. You are talking  
9 about three years straight line, aren't you?

10 Mr. Brockway. That is correct.

11 Senator Long. Right now, they are getting three years  
12 with 150 percent declining balance, don't they?

13 Mr. Brockway. That is correct.

14 Senator Heinz. And what is the revenue cost of this  
15 proposal?

16 Mr. Brockway. Senator Dole's amendment would be  
17 approximately \$2 billion.

18 Senator Matsunaga. \$2 billion?

19 Mr. Brockway. That is correct. Over the five-year  
20 period.

21 Senator Bradley. So, in the previous amendment, we  
22 gained \$7 billion over five years, and now we are giving \$2  
23 to \$3 of that back with this amendment. Is that correct?

24 Mr. Brockway. That is correct. Right now, Senator  
25 Roth's proposal would lose, from the chairman's proposal,

1 roughly \$7.8 billion. This would take it up to \$9.8 billion,  
2 or \$10.

3 Senator Bradley. \$10?

4 Mr. Brockway. \$10.

5 The Chairman. You have heard the motion. All those in  
6 favor of the motion will say "aye."

7 (Chorus of ayes)

8 The Chairman. Opposed, no?

9 (Chorus of noes)

10 The Chairman. Let's call the roll.

11 The Clerk. Mr. Dole?

12 Senator Dole. Aye.

13 The Clerk. Mr. Roth?

14 Senator Roth. Aye.

15 The Clerk. Mr. Danforth?

16 Senator Danforth. Aye.

17 The Clerk. Mr. Chafee?

18 Senator Chafee. No.

19 The Clerk. Mr. Heinz?

20 Senator Heinz. Aye.

21 The Clerk. Mr. Wallop?

22 Senator Wallop. Aye.

23 The Clerk. Mr. Durenberger?

24 Senator Durenberger. Aye.

25 The Clerk. Mr. Armstrong?

1 Senator Durenberger. Aye.  
2 The Clerk. Mr. Symms?  
3 Senator Symms. Aye.  
4 The Clerk. Mr. Grassley?  
5 Senator Grassley. Aye.  
6 The Clerk. Mr. Long?  
7 Senator Long. Aye.  
8 The Clerk. Mr. Bentsen?  
9 Senator Bentsen. (No response)  
10 The Clerk. Mr. Matsunaga?  
11 Senator Matsunaga. Aye.  
12 The Clerk. Mr. Moynihan?  
13 Senator Moynihan. No.  
14 The Clerk. Mr. Baucus?  
15 Senator Baucus. No.  
16 The Clerk. Mr. Boren?  
17 Senator Boren. Aye.  
18 The Clerk. Mr. Bradley?  
19 Senator Bradley. No.  
20 The Clerk. Mr. Mitchell?  
21 Senator Mitchell. No.  
22 The Clerk. Mr. Pryor?  
23 Senator Pryor. (No response)  
24 The Clerk. Mr. Chairman?  
25 The Chairman. Aye.

1 The Clerk. Fifteen yeas, five nays.

2 The Chairman. While I have everybody here, let me  
3 announce again the schedule for the benefit of the members.

4 As I have indicated, we will have no votes on Friday  
5 afternoons or Monday mornings, but we will use those times  
6 under normal circumstances to continue discussion on the bill.

7 Tomorrow, however, we are on to the Canadian-American  
8 Free Trade hearing in the morning. There is no afternoon  
9 hearing.

10 On Monday afternoon, we had initially scheduled a  
11 discussion on bonds and then we would reserve another morning  
12 for bonds. This is not, however, the issue of the minimum  
13 tax and municipal bonds.

14 We will get to that on the minimum tax debate.

15 But I think we may be near an agreement on bonds, and I  
16 don't think we will need both Monday afternoon and I think it  
17 was Wednesday morning, but I wouldn't swear to when we had  
18 that other discussion on bonds. When was it, John? Wednesday  
19 or Thursday? Never mind; don't worry about it.

20 We had two times set aside for discussion. I don't  
21 think we will need both. So, Monday afternoon, I would like  
22 to use for further votes, if we have not finished on  
23 depreciation or on accounting or on employee benefits.

24 And I would ask again for all of the members that have  
25 amendments to have them in. You have been very good so far

1 about turning them in, and I appreciate it very much. Senator  
2 Pryor?

3 Senator Pryor. Mr. Chairman, at the hearing tomorrow  
4 on the Canadian-American Free Trade Agreement, at that session  
5 will we be faced with a proposition of either approving or  
6 disapproving? We won't be faced with that question?

7 The Chairman. Not tomorrow, but what I may be inclined  
8 to do if there is enough-- And I have to confess that a  
9 fair number of members have spoken to me about wanting to  
10 vote "no." They don't want to give the President the authority  
11 to go ahead.

12 Understand the implications. I mean, the President can  
13 negotiate anything he wants. However, if he submits to us  
14 the proposition that he wants to negotiate and we turn it  
15 down and he then negotiates a treaty, he does not get the  
16 fast-track method.

17 And I have had a fair number of people on this committee  
18 to say they would like to say "no." They don't want to get  
19 themselves into a bind on fast track and let the President  
20 go ahead and we will then consider it.

21 So, we will not vote tomorrow; but I think there will  
22 be enough members on this committee that want to register a  
23 vote at some stage that, before the deadline, on one of these  
24 hearings or one of these mark-ups that we are having, I will  
25 give you notice and we will have that issue for a vote.

1 Senator Chafee? Excuse me. Senator Chafee and then  
2 Senator Moynihan.

3 Senator Chafee. All right. What I would like is the  
4 figures-- The next vote will be on the Roth proposal, will  
5 it not?

6 The Chairman. There may be some more amendments, but  
7 the Roth proposal is before us.

8 Senator Chafee. All right. What I would like from Mr.  
9 Brockway here is what is the cost of the Roth amendment with  
10 the revisions that have taken place for Senator Danforth's  
11 proposal? That is, over present law--changes from present  
12 law. What is it going to cost?

13 Senator Bradley. Do you mean present law or the Packwood  
14 proposal?

15 Senator Chafee. My next question is: What is the cost  
16 of the Packwood proposal over present law.

17 In other words, up or down, what is it costing us?

18 Mr. Brockway. Senator Packwood's proposal is minus \$4.3  
19 compared to present law --

20 Senator Chafee. With the changes now?

21 Mr. Brockway. With the changes, it would be roughly an  
22 additional \$10 billion; so, it would be \$14.3.

23 Senator Chafee. That is the Roth?

24 Mr. Brockway. The Senator Roth proposal, as amended,  
25 is now, as compared to the chairman's proposal, an additional

1 revenue loss of roughly \$10 billion, over the five-year  
2 period.

3 Senator Chafee. \$10 billion over five years?

4 Mr. Chairman, it seems that now is the time to address  
5 the Roth proposal, as we have been. It seems to me that  
6 if we adopt the Roth proposal with \$10 billion over your  
7 proposal, which was revenue neutral, that means there is  
8 just \$10 billion more we have got to struggle to pick up  
9 somewhere.

10 If we are going to have tax reform, if we are going to  
11 have lower rates, the objective of the exercise as I see it  
12 is to get lower rates. And this puts the chances of receiving  
13 lower rates further out of sight.

14 And I think every time we pass these substantial measures,  
15 and by substantial I consider \$10 billion loss of revenue or  
16 increased money we have got to make up somewhere, a blow to  
17 the chances of having successful passage of this measure  
18 in a revenue neutral fashion.

19 And I consider that a severe detriment to the Roth  
20 proposal. It has got some attractiveness in it unquestionably,  
21 but it all costs money; and so, for that reason, I would vote  
22 against it.

23 Senator Moynihan. Mr. Chairman?

24 The Chairman. Senator Moynihan?

25 Senator Moynihan. Mr. Chairman, Senator Chafee spoke

1 about the cost of the proposal to adopt a new category of  
2 economic goods called productivity property. And the Joint  
3 Committee has given us a very good chart that shows the  
4 quite striking difference in the cost of capital for  
5 productivity property as against property generally.

6 In our bill, for example, the cost of capital goes from  
7 eight percent to 6.8, a very real division.

8 I would like to read a very brief statement on the  
9 theory and practice of State capitalism.

10 "State capitalism is a melding of the most prominent  
11 features of capitalism and socialism. Although economically  
12 ruinous, it has shown adaptive qualities that make it  
13 attractive to emerging or declining industrial economies.

14 "The principal feature of State capitalism is that the  
15 means of production remain in private ownership, but the  
16 State is the arbiter of which enterprises will prosper and  
17 which will not.

18 "Generally speaking, the State economic planners pick  
19 winners and losers in the economy. Then the politicians  
20 back the losers. The reason for this is that the losers are  
21 typically old, declining sectors where more workers and owners  
22 are found and therefore more political support.

23 "This is generally speaking economically counterproductive.  
24 On the other hand, it has occasionally improved a source of  
25 political stability to nations that have weak sectors and

1 need to accumulate as much political influence on the  
2 periphery as possible.

3 "The concept of defining some form of manufacture as  
4 productivity property is an example of State capitalism.  
5 Such economies are continuously preoccupied with export  
6 drives and typically are seeking to sell abroad manufactures  
7 which have long since gone through the trade cycle in which,  
8 first the technology, then the actual production systems  
9 have moved abroad.

10 "These export drives rarely succeed, but they give the  
11 central government the appearance of enterprise and are a  
12 source of contributions at election time."

13 The Chairman. Who is the source?

14 Senator Moynihan. The export drives. They give to  
15 central government, of course.

16 The Chairman. Senator Wallop?

17 Voice: Who is the source?

18 Senator Moynihan. Oh, Daniel Patrick Moynihan, Honorary  
19 Fellow, London School of Economics --

20 (Laughter)

21 The Chairman. Did I what?

22 Senator Heinz. Did you lose my name on your list there?

23 The Chairman. No. I didn't have it on the list.

24 Senator Heinz. You had me after Senator Chafee the last  
25 time you read it.

1 The Chairman. I apologize. Let me recognize Senator  
2 Wallop, and then I will recognize you next.

3 Senator Heinz. All right.

4 Senator Wallop. Mr. Chairman, I think it is time that  
5 we reminded ourselves what the objectives of tax reform were,  
6 and they were not solely lower rates.

7 That is a fixation that seems to come back in here, but  
8 one of the other things was simplicity, and one of the other  
9 legs of that stool was economic vitality.

10 And we are losing sight of that--the very reason the  
11 Senator from Texas spoke yesterday and the Senator from  
12 Delaware. That is, the cost of capital, with all respect  
13 to my learned and professorial friend from New York, that  
14 few people in universities were ever able to contribute much  
15 to the productive capacity of the nation.

16 They contribute a great deal to the intellectual  
17 capacity of it, but the point of fact is that capital in  
18 productive equipment does make a nation competitive.

19 I doubt seriously if productive capacity of equipment  
20 does contribute to campaign funds. I think that is an  
21 unfair interjection into what we are trying to accomplish  
22 here.

23 What we are trying to see is whether or not this nation  
24 can have a cost of capital that is competitive with those with  
25 whom we trade, not only abroad but domestically in our own

1 markets.

2 We can build apartment houses or other things here,  
3 probably better than the Japanese can build apartment houses  
4 or other things like that here.

5 But we can't build a great deal of the rest of what this  
6 nation must have, both for its national defenses and for  
7 the employment of its people. Not all of us can hold hammers  
8 and saws. Not all of us can work on ends of computers.

9 Now, what I would ask the Treasury Department here is:  
10 What has just happened to the cost of capital by the adoption  
11 of the Danforth amendments on productive property?

12 Mr. Darman. Senator Wallop, as I suggested earlier,  
13 the most efficient--revenue efficient--way to reduce the  
14 cost of capital is to adopt the indexing provision. Having  
15 eliminated it, the Senate Finance Committee has raised the  
16 cost of capital on the Roth proposal probably to something  
17 in excess of seven percent on productivity property and  
18 overall something in excess of eight percent.

19 It has, of course, done that for the chairman's proposal  
20 as well.

21 Senator Wallop. Well, I must say that my friends at--  
22 Under present law, according to this sheet that is here,  
23 productive property, capital expenses, 5.4 percent, and overall  
24 8.2 percent. It defies logic to understand how we have  
25 improved any of this nation's requirements for tax reform by

1 adopting that amendment.

2 Now, what we have is something that is worse than the  
3 present law, worse than where we were before. And we are  
4 still a nation, I think and hope, that tries to compete  
5 abroad.

6 With that in mind, Mr. Chairman, I would like to offer  
7 that we go to the straight 200 percent declining balance  
8 without indexing on all property.

9 That will level the playing field. That will not  
10 distinguish between classes, but it certainly will do  
11 something about the productive capacity of this country and  
12 lower the cost of capital.

13 The Chairman. Is that a motion, Malcolm?

14 Senator Wallop. I want to hear from Treasury first.

15 Mr. Darman. Senator, do you want a revenue estimate?

16 I think Joint Tax has a revenue estimate of that, but  
17 our own is approximately --

18 Mr. Brockway. Senator Wallop, if you are discussing  
19 property in the five, ten, fifteen year class under present  
20 law, taking that to 200 percent, overall that would have  
21 been a \$40 billion revenue loss; but Senator Roth's amendment  
22 would have net a \$30 billion revenue loss compared to where  
23 we are right now. Actually, it is \$27; excuse me.

24 Senator Wallop. That is the most mystical answer I have  
25 ever heard.

1 (Laughter)

2 Mr. Darman. The answer, I think, Senator, on their  
3 numbers is: If your amendment were to the Packwood proposal,  
4 it would cost \$40 billion. If it were to the Roth proposal,  
5 it would cost \$30. Is that right?

6 Mr. Brockway. Correct.

7 Mr. Darman. Our own estimate is slightly lower than  
8 that. Our own estimate is, respectively, \$34 billion and  
9 \$24 billion; but they are in the same range.

10 Mr. Brockway. Actually, Senator Wallop, I gave you a  
11 number that would have assumed \$50,000 expensing or \$40,000  
12 expensing. It would be \$37 billion as against the chairman's  
13 package, \$27 billion against Senator Roth. So, I think that--

14 Senator Wallop. Yes. And I am contemplating, of course,  
15 keeping the real estate provision as something different  
16 than this. Is that what your estimate contemplates?

17 Mr. Brockway. Yes, that is correct.

18 Senator Wallop. Senator Bradley?

19 The Chairman. Are you making a motion yet?

20 Senator Wallop. I am trying to get to the point, but  
21 I think Senator Bradley has a question, Mr. Chairman.

22 Senator Bradley. Mr. Chairman, as I understand the  
23 revenue numbers and also the motivation for Senator from  
24 Wyoming's offering the amendment was the passage of Senator  
25 Danforth's elimination of indexing, which over five years

1 costs \$7 billion. He picks up \$7 billion because he has  
2 eliminated indexing.

3 And you are now proposing an amendment that will lose  
4 a minimum of \$27 billion. I would say that that goes a  
5 little bit beyond making up for Senator Danforth's pickup  
6 of \$7 billion.

7 Senator Wallop. I have a mystical time with this  
8 concept of cost, anyway. Nothing is costing that you haven't  
9 yet got. We are still trying to achieve an overall package  
10 here.

11 What has happened is unacceptable, I think, and what is  
12 even more unacceptable is that, as you go down the line on  
13 this thing and play with it, that the old nemesis of the  
14 minimum tax re-enters in here; and you are going to put  
15 more and more people subject to it, which I think is  
16 counterproductive.

17 Senator Chafee. Could I ask a question? Would your  
18 proposal apply to real property?

19 Senator Wallop. No.

20 Senator Chafee. You exempted real property. And did  
21 you know that when you gave your figure here?

22 Senator Wallop. I have a hard time accepting the figures  
23 but we have, once again, no choice.

24 Senator Symms. Would you say again what the suggestion  
25 is or the proposal?

1 The Chairman. A 200 percent declining balance but not  
2 on real estate is what he is suggesting.

3 Senator Symms. On five years or on three years?

4 The Chairman. You are talking about all properties,  
5 aren't you, other than real estate?

6 Senator Symms. On a five-year, 200 percent declining --

7 Senator Wallop. Yes.

8 The Chairman. You are talking about properties on  
9 longer than five years also?

10 Senator Wallop. Yes, that is correct.

11 Mr. Brockway. Senator Wallop, just for clarification.  
12 The numbers I gave you were on the assumption that you did  
13 not split up the five-year class of property, retain present  
14 law ACRS categories?

15 Senator Wallop. That is true.

16 Mr. Brockway. Okay. So, there are two things going  
17 on in that proposal then. One is taking property under  
18 the Roth amendment would be treated as nonproductive  
19 property giving it 150 declining balance. You would give  
20 that 200 percent declining balance plus property under the  
21 Roth amendment where the ADR life was more than 15 years,  
22 which under the Roth amendment and the chairman's proposal  
23 is treated as 10-year property, you would treat that as  
24 five-year property as in the present law?

25 Senator Wallop. That is correct.

1 Mr. Brockway. And also, there are certain changes in  
2 utility property as well, and you would again retain present  
3 law under your amendment.

4 So, it was all those changes that aggregated the net  
5 \$27 billion number.

6 Senator Wallop. Now, Mr. Chairman, I won't offer the  
7 amendment, but I would just tell you that we have now  
8 arrived at the point where tax reform, as made in the name  
9 of tax reform, we have waged an assault on the productivity  
10 of America; and that is a very curious thing to do with  
11 the great claims for creativity on the part of this  
12 committee.

13 I just don't think that that is what we were asked to  
14 do and what we set out to do. There were three legs on  
15 that stool. We have chopped off two of them in the name  
16 of trying to make it stand on one leg, lower rates. I  
17 think it is idiotic.

18 The Chairman. Senator Heinz?

19 Senator Heinz. Thank you, Mr. Chairman.

20 I want to ask a question regarding the Roth amendment,  
21 as modified by the Danforth amendment, versus current law as  
22 to what the increase in revenues is from what I will call  
23 changes in capital cost recovery.

24 Capital cost recovery would include the investment tax  
25 credit and changes in depreciation, ACRS being current law.

1 My question is: If we were to adopt the Roth amendment,  
2 as modified, how much revenue increase would there be  
3 compared to current law?

4 Mr. Brockway. Under the chairman's package, you have  
5 looked at all the provisions and this is on the list we  
6 handed out to the committee generally of changes including  
7 depreciation changes, expensing changes, changes to the  
8 investment tax credit.

9 Those provisions in the aggregate would have raised  
10 \$143.9 billion over the five-year period.

11 With Senator Roth's amendment, then, that aggregate  
12 package would raise \$133.9 billion.

13 Senator Heinz. So, in either event, we are increasing  
14 the tax burden on the business sector over the five-year  
15 period?

16 Mr. Brockway. Insofar as you are discussing the cost  
17 recovery --

18 Senator Heinz. Just in terms of capital cost recovery,  
19 to the tune of either \$133.9 if we adopt Roth, \$143.9 if  
20 we don't.

21 Mr. Darman. Senator, could I just interject: And  
22 assuming, as I know Dave Brockway would himself wish to add,  
23 assuming no corporate tax rate reduction.

24 Senator Heinz. I understand that; but we have been  
25 talking about how much does Roth add, how much does it

1 subtract; and I just wanted to put that in that perspective.

2 Now, as I understand some of the concern about Senator  
3 Roth's amendment, some of the people who have spoken say  
4 that this distinction between productivity property and  
5 other property is an artificial one.

6 I would associate myself not only with Bill Roth's  
7 comments but with those of Senator Baucus that it is  
8 important and it is legitimate and it is, indeed, necessary  
9 to take into account the fact that productivity property,  
10 as it is defined here, is in fact property that is used to  
11 produce products that are almost the subject of foreign  
12 competition.

13 And there is no sense in putting our industries that  
14 are subject to that kind of competition at a disadvantage,  
15 vis-a-vis our tax code compared to somebody else's tax code.

16 Now, somebody said that these categories are kind of  
17 totally new and arbitrary. My understanding is that  
18 categories of this kind are indeed quite well known. They  
19 have been quite precisely defined in the ADR categories that  
20 we have been using for some 15 years.

21 Would you care to comment on that, Mr. Brockway?

22 Mr. Brockway. Essentially, the dividing line between  
23 productivity property and nonproductivity property is derived  
24 from a dividing line you have in present law for tangible  
25 property other than personal property, which if it is used in

1 certain activities--manufacturing, extraction, production,  
2 and a variety of other activities--qualifies for investment  
3 credit, and it is treated as --

4 Senator Heinz. And current law really is based on the  
5 asset depreciation range that was in effect prior to that.  
6 Is that not so?

7 Mr. Brockway. Well, two things are going on. One is  
8 that you have current law, categories of assets, whether  
9 for example you fall in the three-year class, the five-year  
10 class or the ten-year class under present law, under ACRS,  
11 are in turn where you were categorized under ADR, which is  
12 a similar structure as under this proposal it would be.

13 In addition, under present law and under prior law, you  
14 had a differentiation between property-- Investment credit  
15 would be allowed for all tangible personal property, movable  
16 property; and then real property would also qualify for the  
17 investment credit under present law, depending upon whether  
18 it is in certain described activities: manufacturing,  
19 production, extraction, communications, etcetera.

20 It is from that second list where the basic dividing  
21 line between productivity and nonproductivity property was  
22 derived for this proposal. It was basically picking it up  
23 from present law.

24 Senator Heinz. So, the philosophical concept is not new.  
25 Its application is not new; and much of the classifications

1 are quite similar and have been made going back, in some  
2 cases, as many as 15 years.

3 Mr. Brockway. Basically, they would have gone back to  
4 1962. Yes, the classifications are somewhat different and  
5 for different purposes, but it is similar --

6 Senator Heinz. Now, it is my understanding that the  
7 Bradley-Gephardt bill uses the accelerated depreciation range  
8 in its distinctions.

9 Mr. Brockway. It would assign property to classes,  
10 as would this proposal and as would the House bill and as  
11 present law, depending on what their ADR category was.

12 Senator Heinz. So, Senator Bradley and Congressman  
13 Gephardt have made the same kinds of distinctions that we  
14 have been making since 1962 and upon which the productivity  
15 classes, broadly speaking, are based?

16 Mr. Brockway. I am somewhat hesitant to characterize  
17 it that way. They used ADR mid-point life, what ADR system  
18 is used in the property, how long it would be used, for  
19 deciding whether it was going to be in various classes of  
20 depreciation.

21 They did not have a split between property that was  
22 productivity property and not productivity property.

23 Now, the same process is used for drawing those lines.

24 Senator Heinz. Now, clearly, what Senator Roth is trying  
25 to do in his proposal is to keep as much of the revenue gain

1 of \$143.9 billion as he responsibly can, and he has only  
2 modified that revenue gain and knocked it down by \$10 billion  
3 to \$133.9, looking at just those items. Is that accurate?

4 Mr. Brockway. That is my understanding of his purpose.

5 Senator Heinz. Mr. Chairman, I obviously am arguing  
6 in favor of the Roth amendment. I wanted to put it into a  
7 perspective where we might understand that, while the  
8 categories that are used here are used perhaps more stringently  
9 than heretofore, they are not new either philosophically or  
10 in their application; and that the reason they are used is  
11 to be fiscally responsible and to try and keep tax reform  
12 alive.

13 There is no doubt in my mind that it certainly is  
14 possible to pile up so much straw on the back of the camel  
15 in the way of amendments that we can break the back of tax  
16 reform.

17 Senator Roth, I think, is trying to treat the camel in  
18 a humane way and keep tax reform alive.

19 My own view is that unless we adopt something like the  
20 Roth amendment or maybe even something better than it, we  
21 will kill tax reform because the capital formation provisions  
22 in the chairman's draft--at least while they are an  
23 improvement in some ways for small business--they are not  
24 as good, I think, as they need to be.

25 So, I hope the Roth amendment --

1 The Chairman. I would like, if we could, to put the  
2 Roth amendment to a vote.

3 Senator Bradley. Mr. Chairman?

4 The Chairman. Senator Bradley?

5 Senator Bradley. Let me just get one number correct  
6 because I think it was gone over rather quickly in the course  
7 of the questioning.

8 The Roth amendment versus current law is more generous  
9 or less generous than current law, or about the same?

10 Mr. Brockway. With respect to depreciation itself, it  
11 is more generous if we take into account all the things we  
12 list as depreciation on that table.

13 That includes the expensing provision. If you take  
14 into account all of the capital cost recovery provisions,  
15 including investment credit, it is less generous than present  
16 law.

17 Senator Bradley. But the point to be made is that  
18 the depreciation schedules and the benefits will accrue to  
19 the particular category of assets in the Roth amendment plus  
20 they would get a lower rate of tax?

21 Mr. Brockway. The numbers I gave about saying  
22 depreciation is more generous, as I say, includes the  
23 expensing provision in that package; but yes, in the aggregate  
24 for depreciation including expensing that the recovery would  
25 be more generous under the package.

1 In the aggregate, there would be a lower rate, but  
2 taxpayers would lose the investment credit; so that as to  
3 how their particular tax liabilities would go, they might  
4 go up or down.

5 Senator Bradley. Right.

6 The Chairman. Senator Moynihan?

7 Senator Moynihan. Mr. Chairman, I don't want to prolong  
8 and will not, but I would make the gentle point that none of  
9 us were in-- There are those of us on the committee that  
10 were not part of the discussions that led to the amendment  
11 before us, and so it came new to us yesterday about mid-day,  
12 and we are just trying to learn it.

13 I would like to ask first Secretary Darman and then  
14 Mr. Brockway; or perhaps it should be Mr. Brockway. It is  
15 about the Joint Committee on Taxation table you just handed  
16 out.

17 It says that if there were no corporate Federal tax,  
18 the corporate tax of productivity capital, the special class  
19 we are now creating, would be 5.5 percent.

20 Mr. Brockway. That is correct.

21 Senator Moynihan. With the present law, we have 5.4  
22 percent; so in effect that is a negative rate.

23 Mr. Brockway. That is correct.

24 Senator Moynihan. You get the tax advantage in doing  
25 all of this; and yet, under the Roth amendment, it goes up

1 from present law from 5.4 percent to 6.2. So, they are  
2 raising the cost of capital here, while at the same time  
3 we are giving away a lot of revenue.

4 Mr. Brockway. Senator Moynihan, I think that as a  
5 general matter, if you look at overall property of a  
6 taxpayer rather than the productivity property, you will  
7 have a different picture than present law.

8 But if you look just at equipment, the combination of  
9 investment credit and depreciation under present law is,  
10 under the discount rates we are assuming, more generous in  
11 expensing so that any proposal that involved the repeal of  
12 the investment credit is likely to have an increased cost  
13 of capital.

14 Senator Moynihan. I would just make the point to my  
15 colleagues that we think we have some great malaise in terms  
16 of the productivity property, but we are raising the capital  
17 cost above present law.

18 And in present law, you know, you are rewarded by the  
19 tax system for investment. So, I don't know how the tax  
20 system is holding us back.

21 And inevitably, we will remove that present incentive,  
22 will we not?

23 Senator Matsunaga. Mr. Chairman, I have one fast question  
24 of the offerer of the amendment.

25 While you do away with the investment tax credit, this

1 has no bearing at all on the energy business tax credit?

2 Senator Roth. That is correct.

3 The Chairman. Clerk, call the roll on the Roth  
4 amendment.

5 The Clerk. Mr. Dole?

6 Senator Dole. (Aye by proxy)

7 The Clerk. Mr. Roth?

8 Senator Roth. Aye.

9 The Clerk. Mr. Danforth?

10 Senator Danforth. Aye.

11 The Clerk. Mr. Chafee?

12 Senator Chafee. (No response)

13 The Clerk. Mr. Heinz?

14 Senator Heinz. Aye.

15 The Clerk. Mr. Wallop?

16 Senator Wallop. No.

17 The Clerk. Mr. Durenberger?

18 Senator Durenberger. No.

19 The Clerk. Mr. Armstrong?

20 Senator Armstrong. (No response)

21 The Clerk. Mr. Symms?

22 Senator Symms. Aye.

23 The Clerk. Mr. Grassley?

24 Senator Grassley. Aye.

25 The Clerk. Mr. Long?

1 Senator Long. Aye.

2 The Clerk. Mr. Bentsen?

3 Senator Bentsen. (Aye by proxy)

4 The Clerk. Mr. Matsunaga?

5 Senator Matsunaga. Aye.

6 The Clerk. Mr. Moynihan?

7 Senator Moynihan. No.

8 The Clerk. Mr. Baucus?

9 Senator Baucus. Aye.

10 The Clerk. Mr. Boren?

11 Senator Boren. Aye.

12 The Clerk. Mr. Bradley?

13 Senator Bradley. No.

14 The Clerk. Mr. Mitchell?

15 Senator Mitchell. No.

16 The Clerk. Mr. Pryor?

17 Senator Pryor. No.

18 The Clerk. Mr. Chairman?

19 The Chairman. Aye. And Mr. Armstrong "no" by proxy.

20 Senator Chafee?

21 Senator Chafee. No.

22 The Chairman. Senator Chafee "no."

23 The Clerk. Twelve yeas, eight nays.

24 The Chairman. The amendment is adopted. Let's break

25 and come down at 2:00 and see if we can finish depreciation

1 this afternoon. Yes?

2 Senator Heinz. All right. Let me lay down an amendment  
3 for 2:00, if I may, which is that I have an amendment to  
4 reduce the depreciation life of residential real estate to  
5 a 25-year straight line depreciation.

6 The Chairman. Come back at 2:00.

7 (Whereupon, at 12:29 p.m., the meeting was recessed,  
8 to reconvene the same day, Thursday, April 10, 1986,  
9 at 2:00 p.m.)

## AFTERNOON SESSION

(2:10 p.m.)

1 The Chairman. The committee will come to order.

2 Senator Chafee? Have you got any amendments, Senator?

3 Senator Chafee. Let's see.

4 The Chairman. We are still on depreciation. We are  
5 waiting for Senator Heinz to come, who is going to move a  
6 25-year I think he said "residential life."

7 Senator Chafee. That is right.

8 The Chairman. And yesterday he had indicated he was  
9 going to do it, but he would have a method of paying for it;  
10 although, I am not sure.

11 Senator Chafee. Does Mr. Brockway have a figure on that?

12 Mr. Brockway. If you took Senator Heinz' proposal as he  
13 articulated it before he left, of simply taking residential  
14 property and giving it a 25-year life, that would lose .4 over  
15 the period, \$400 million over the period.

16 The Chairman. Senator Mitchell?

17 Senator Mitchell. Thank you, Mr. Chairman.

18 Mr. Chairman, much of the discussion this morning  
19 revolved around the question of revenue estimates, the effect  
20 that the various proposals we were debating and subsequently  
21 voted on would have on revenues.

22 I would like to ask if we are maintaining any kind of a  
23 running total that can tell us at any given moment where we  
24  
25

1 are from some base line, which I would assume would be your  
2 proposal.

3 The Chairman. I would just as soon start from the  
4 Chairman's draft, which hopefully is revenue neutral, but it  
5 is revenue neutral because of the limitation of the excise tax  
6 deductions. So we start there with \$62 billion. I don't know  
7 how the members are going to finally come out, but just keep  
8 that in the back of your mind.

9 I would ask the staff as we go along on amendments if  
10 you want to indicate where we are from the Chairman's draft,  
11 just from time to time reminding us of the \$62 billion but  
12 for the moment presume it is there and let us know how far off  
13 from the draft we are.

14 Senator Mitchell. Does anybody have any estimate of  
15 that now?

16 Mr. Brockway. Well, the Chairman's original package was  
17 revenue neutral within a couple of billion dollars. I think  
18 it was slightly up, raises a slight bit of revenue, but we  
19 are sort of refining the fine points. It was basically  
20 revenue neutral.

21 If you remember, this morning, we don't have a final  
22 estimate but it was roughly \$10 billion, the Roth amendment  
23 as modified.

24 So the package would be down \$10 billion at the moment.

25 Senator Mitchell. As the result of this morning's

1 action. Are there any other actions which we have previously  
2 taken that would have produced a cumulative effect?

3 Mr. Brockway. Yesterday you had some very minor revenue  
4 items, less than \$50 million, or I think one of them might  
5 have been \$100 million. So, it is \$10 billion down.

6 Senator Mitchell. So, now we are at about \$10 billion  
7 down?

8 Mr. Brockway. That is correct.

9 Senator Mitchell. All right.

10 Mr. Chairman, before the noon break Senator Heinz laid  
11 down an amendment.

12 The Chairman. The 25-year residential.

13 Senator Mitchell. Yes.

14 As you know from our prior discussion, I had intended to  
15 offer that amendment, and as soon as he comes I would hope we  
16 could proceed on that.

17 The Chairman. Why don't you go ahead and talk on it.  
18 Just before you got in they estimated about a \$400 million  
19 loss on it.

20 Senator Mitchell. That's right.

21 The Chairman. But why don't you talk, and we'll keep  
22 going as far as we can.

23 Senator Mitchell. All right. Well, I don't want to do  
24 anything to which Senator Heinz might object. I would be  
25 happy to do that, but I merely want to speak now in support

1 of the amendment which he has previously indicated would be  
2 laid down.

3 I would like to make some comments on it, because I did  
4 say some rather strong words yesterday regarding our attempt  
5 to influence market decisions.

6 I think we are all agreed at least in principle that an  
7 objective ought to be to group assets on the basis of  
8 equivalent economic depreciation. That would provide for  
9 more uniform tax treatment of assets, so that market forces  
10 could then determine where investment funds flow.

11 For any given level of investment, the improved  
12 deficiency of investment flows should produce a higher level  
13 of output. That principle is, of course, applicable to real  
14 estate, and it is true that the economic depreciation of  
15 residential property is comparable to the economic depre-  
16 ciation of commercial property.

17 But if we place residential and commercial in the same  
18 asset class, with the same depreciation rate, factors in the  
19 market will tend to cause investment dollars to flow to  
20 commercial over residential real estate, until the market  
21 adjusts through higher residential rents.

22 The market would ultimately work, but in the interim it  
23 would produce higher rents, and of course people who have to  
24 pay them would pay for that.

25 Now, that is not and has not been our nation's policy.

1 For at least the last half-century it has been a policy of  
2 the Federal Government to encourage the availability of  
3 affordable and decent housing.

4 I know, Mr. Chairman, you spoke very forcefully on this  
5 in another context earlier regarding another provision of this  
6 legislation.

7 And through direct spending programs and, indirectly,  
8 through the Tax Code, the government has given a high policy  
9 priority to housing.

10 This committee is concerned that the real estate industry  
11 has enjoyed tax benefits that sometime bear no relationship  
12 to economic depreciation. You, Mr. Chairman, have proposed  
13 that the value of those benefits be moderated somewhat in some  
14 areas.

15 I think all of us are concerned that in some cases  
16 investment dollars have been wasted in commercial real estate  
17 in recent years, as evidenced by the many office buildings  
18 that now stand vacant, and which were constructed for tax  
19 considerations as opposed to economic considerations.

20 A similar problem does not exist with regard to  
21 residential real estate. The amendment would deal with the  
22 problem in which most areas of the country in fact face a  
23 shortage of housing, not a surplus; and at very little cost it  
24 simply tries to maintain a differential between residential  
25 real estate and commercial real estate.

1           While I acknowledge that this does represent some effort  
2 to moderate pure market forces, I think it does so in a  
3 manner that is consistent both with national policy over the  
4 last half-century and with meeting what is an essential need  
5 in our society.

6           So, Mr. Chairman, I commend Senator Heinz for his  
7 amendment and urge the committee's support of it.

8           Senator Heinz. Mr. Chairman?

9           The Chairman. Senator Heinz?

10          Senator Heinz. Mr. Chairman, I want to thank Senator  
11 Mitchell for his support. I know he had an interest that I  
12 discovered in another amendment, and it might have been the  
13 Mitchell Amendment just as easily as it happens to be the  
14 Heinz Amendment.

15          But I just want to make the following observations on  
16 this amendment. The first is that, I suppose to the extent  
17 anybody argues against it, to argue against it because the  
18 revenue loss might be as much as \$400 million over five years,  
19 I would remind our colleagues that in repealing indexing from  
20 these proposals we saved in excess of \$7 billion. And indeed,  
21 even though the committee I think spent about \$2 billion of it  
22 within 60 seconds thereafter on Senator Dole's motion on  
23 automobiles, that still leaves a balance of some \$5 billion  
24 that in a sense we are ahead.

25          The Chairman. I understand we are already \$10 billion

1 behind. It is all relative, that we are not \$15 billion  
2 behind.

3 Senator Chafee. Yes. We adopted the Roth Amendment,  
4 which consumed what the Dole Amendment didn't. So, we  
5 gobbled up that so-called "saving" pretty quickly.

6 Senator Heinz. Well, if you want to look at it that way,  
7 you are entitled to do so.

8 (Laughter)

9 Senator Chafee. You are the one who is looking at it  
10 that way.

11 Senator Heinz. Let's look, though, at what the amendment  
12 does before we all blindly rush in and say, you know, "We are  
13 unwilling to give a mild preference to residential rental  
14 real estate."

15 If there is general agreement among the membership of  
16 this committee, and I think there is, and I do share it, that  
17 it was bad policy to have 15 or subsequently 18 or 19 years on  
18 commercial and residential real estate, it seems to me that  
19 we need to recognize that we did, even under the various  
20 manifestations of what is called "current law," have a  
21 preference for residential rental real estate.

22 We did that, treating recapture differently. And the  
23 reason we did that was that we recognized that rental property  
24 serves the social purpose of providing housing for those who  
25 can't afford to purchase a home. And of the 30 million rental

1 households in America, 55 percent of them have incomes under  
2 \$15,000.

3 Now, there is a good reason, if we want to ensure that  
4 residential rental real estate is not at a disadvantage versus  
5 commercial real estate, to treat them differently.

6 Were we to treat them the same, someone might say, "Well,  
7 30 years on both, why aren't they being treated equally? How  
8 is that disadvantaging rental residential real estate?" And  
9 the answer is: The structure of that industry disadvantages  
10 residential rental property in several ways:

11 Rental housing property involves much more intensive and  
12 costly management than commercial real estate. It is  
13 inhabited all day and all night long. Commercial real estate  
14 isn't. There is a much wider variation and variety in the  
15 tenants: the tenants are a lot less wealthy than the tenants  
16 of commercial real estate, on the whole.

17 And in housing, the nature of the tenants is such that  
18 they don't sign up for 15 and 20 year leases. Typically,  
19 rental residential real estate people, people are renting on  
20 an annual basis, sometimes on a monthly basis, and in rela-  
21 tively few cases on a multi-year basis, compared to commercial  
22 real estate where people are renting on very long-term  
23 leases, and indeed many commercial structures are actually  
24 pre-leased. You could never find a residential rental  
25 property that was pre-leased.

1 As a result, residential property cannot avoid the heavy  
2 start-up costs that commercial property is often able to get  
3 around because of the nature of the clients -- business firms  
4 tend to be better off than renters.

5 As a result, it is my firm conviction -- Senator  
6 Mitchell's and my firm conviction -- that residential rental  
7 property needs some degree of favorable treatment under the  
8 Tax Code if we want to have any of it; otherwise, there will  
9 be, in effect, a preference given to the construction of  
10 commercial real estate.

11 So I hope, Mr. Chairman, that we look at what that  
12 so-called "revenue loss" of \$400 million will buy us.

13 But let me just ask this of staff: Taking into account  
14 the fact that we are moving from 18 or 19 years out to in  
15 this instance 25 years, versus current law, are we gaining  
16 revenue or losing revenue in this provision that I would  
17 promote?

18 Mr. Brockway. Well, I think, with the same qualification  
19 as this morning, if you look solely at depreciation, that  
20 changing from 19 years to 25 for residential would be a  
21 revenue raiser in the aggregate. Looking also at the rate  
22 cut, residential real estate may be better off than it is  
23 under present law with the combination of --

24 Senator Heinz. Is there any evidence to suggest that it  
25 would be better off than under present law? Looking at

1 everything?

2 Mr. Brockway. If you are looking at everything, and  
3 fully equity-financed.

4 Senator Heinz. Looking at all of the changes that we  
5 are making, including the accounting changes.

6 Mr. Brockway. Well, if you look at the proposal,  
7 looking at cost of capital in the aggregate, just at  
8 structures, it would have been 9.2 under present law and  
9 9.0 under the Chairman's proposal with 30 year straight line  
10 for both.

11 Now, these numbers, again, are just equity financed.

12 Senator Heinz. And is that both residential and  
13 commercial?

14 Mr. Brockway. That is residential and commercial. So  
15 even at 30 years it is slightly better, and at 25 years it  
16 would even be additionally better, if you look at it from  
17 that standpoint.

18 Senator Heinz. Does your calculation of the cost of  
19 capital under current law take into account the advantages  
20 that commercial real estate has under current law to deduct  
21 many construction period expenses?

22 Mr. Brockway. Those changes wouldn't be reflected in  
23 these numbers.

24 Senator Heinz. I think we ought to recognize, if you  
25 want to really look at this correctly, that there are very

1 substantial advantages under current law for building  
2 commercial office buildings. That is why we have built so  
3 many of them.

4 We have not exactly gone on a building spree on  
5 residential rental property -- to the contrary. And the  
6 reason is that the cost of capital for building commercial  
7 property isn't anything like 9.2 percent; it is substantially  
8 lower than that average figure. And for residential rental  
9 property it is substantially higher.

10 So, thank you.

11 The Chairman. Senator Chafee?

12 Senator Chafee. Thank you, Mr. Chairman.

13 First of all, I would call attention to page 18 of the  
14 spreadsheets here, where in item D under 1, on the definition  
15 of low-income housing, I can only presume that the Chairman's  
16 proposal will have something forthcoming in connection with  
17 low-income housing. Is that correct?

18 Mr. Colvin. Those provisions are contained in the real  
19 estate title in the spreadsheets, Senator Chafee.

20 Senator Chafee. Say that again, please.

21 Mr. Colvin. The provisions affecting low-income housing  
22 are contained in the real estate title in the spreadsheets.

23 Senator Chafee. Oh, I see. In any event, they are  
24 there, some provisions which in effect make special provisions  
25 for low-income housing?

1 Mr. Colvin. Yes, sir.

2 Senator Chafee. To encourage the building of that.

3 Mr. Colvin. It is on page 180 in the spreadsheets.

4 Senator Chafee. Yes. So we have not neglected that  
5 area in our efforts here today, or the efforts under the  
6 Chairman's proposal.

7 Mr. Colvin. That is correct. That will come up when  
8 you turn to the real estate title.

9 Senator Chafee. All right.

10 Now, the second question is of the Treasury Department.  
11 Senator Heinz was indicating that there is a bias in favor of  
12 investment in commercial as opposed to residential real  
13 estate. Is that so? Is there a more rapid wear-out of  
14 residential real estate because it is used 24 hours a day?  
15 Is there any justification for that assertion?

16 Mr. Brockway. Senator Chafee, there is some information  
17 under the revenue procedures that applied before 1981, before  
18 you went to a fixed life for real estate, that did have  
19 different average useful lives for property, different types  
20 of real estate. And apartment buildings were somewhat less  
21 than other types of buildings, office buildings.

22 For example, under the revenue procedure that applied,  
23 apartment buildings would have had a 40-year useful life, and  
24 office buildings a 45-year useful life, a retail store, a  
25 50-year useful life, a warehouse, 60 years.

1 Senator Chafee. I see.

2 Mr. Brockway. And that type of pattern also was  
3 reflected in the average useful lives claimed by taxpayers.  
4 Taxpayers were not required to use these useful lives and  
5 typically did not; they claimed a shorter life. But generally  
6 that type of pattern, where apartment buildings were  
7 depreciated on a somewhat faster rate than other types of  
8 real estate.

9 Mr. Mentz. Although Senator, to answer the question you  
10 asked of Treasury, we are not aware of any empirical data that  
11 suggests that commercial office buildings, for instance, would  
12 wear out faster than a commercial apartment house.

13 It is true that they are treated differently, have been  
14 treated differently in the past under ADR, but --

15 Senator Heinz. Is there any evidence the other way  
16 around?

17 Mr. Mentz. Not that I am aware of, Senator.

18 Senator Heinz. No evidence either way?

19 Mr. Mentz. That is right.

20 Senator Chafee. Let me ask another question of Treasury  
21 or of Mr. Brockway: Who will principally receive the benefits  
22 of this? Will this be multi-family housing or single-family  
23 housing?

24 Mr. Brockway. This would be multi-family housing, I'm  
25 quite sure.

1           The Chairman. Do you mean the benefits would go to those  
2 people who build apartment houses?

3           Mr. Brockway. It would apply to both, but I think the  
4 investment largely would be in multi-family when you are  
5 talking about depreciable rental property.

6           Senator Heinz. I don't think there are many rental  
7 single-family units being built these days.

8           Senator Chafee. No.

9           This isn't necessarily oriented entirely toward, clearly  
10 not toward, middle-income or lower-income -- it could be any  
11 income?

12          Mr. Brockway. That is correct.

13          Senator Chafee. Is Trump Towers going to get something  
14 out of this?

15          Mr. Brockway. Well, if it were resold -- some probably  
16 placed in service like Trump Tower.

17          The Chairman. But you could built a Trump Tower and get  
18 25 years?

19          Mr. Brockway. Sure. Correct. Or Trump Tower if it  
20 were sold. This would apply to used property as well.

21          Senator Chafee. And that wouldn't fall into either  
22 middle-income or low-income housing, I suspect.

23          Mr. Brockway. Not most of the units there.

24          (Laughter)

25          Senator Chafee. Now, Mr. Chairman, I have some problems

1 with this. All through here we have done quite a bit for  
2 housing. I don't know how I am going to vote, but I would  
3 point out to everyone that you have a provision here dealing  
4 with builders' bonds, which you explained the other day was  
5 oriented --

6 The Chairman. Single-family housing, basically.

7 Senator Chafee. That's right. But the purpose of it  
8 was to encourage building of residential property.

9 The Chairman. That is correct.

10 Senator Chafee. For single-family homes we've got the  
11 ability to deduct the interest expense on both the first and  
12 the second home. Again we get into the problem -- did I miss  
13 something? Senator Heinz, did you propose a way of paying for  
14 this?

15 Senator Heinz. Yes, with the repealed indexing.

16 Senator Chafee. I think we are going to ride that  
17 indexing horse a lot. We are going to get a lot of rides out  
18 of that.

19 (Laughter)

20 Senator Heinz. The horse is fresh so far. This is only  
21 the second rider on the horse.

22 The Chairman. This is a race to the courthouse. Senator  
23 Danforth wasn't here when we started to spend his savings.

24 (Laughter)

25 The Chairman. Coming right behind, we are going to have

1 soon a recommendation for 5-year lives on oil refineries and  
2 5-year lives on food producing, all of which I think is going  
3 to come out of your savings, on the argument that we have now  
4 saved -- what is it? -- seven billion?

5 I am going to vote against this provision of the Senator  
6 from Pennsylvania, because I don't want to start down the  
7 road now of, "Well, it's only \$500 million, only \$600 million,  
8 only \$800 million, and we'll take it all out of Senator  
9 Danforth's savings." All that is going to do is make this  
10 bill tougher and tougher and tougher at the end, bearing in  
11 mind that it's revenue neutral -- only neutral -- only because  
12 it has \$62 billion in revenues from the elimination of the  
13 deduction of excise taxes, and we are \$10 billion off of  
14 neutrality now. I think we are better off to say, "Does this  
15 add to the \$10 billion?" rather than to say, "We are now  
16 simply spending some of the Danforth savings."

17 Senator Chafee. Well, let's get that Danforth saving  
18 thing straightened out once and for all, can we, Mr. Chairman?  
19 We gobbled up those savings this morning.

20 The Chairman. Well, we gobbled up about \$2 billion of  
21 them on the three-year cars.

22 Senator Chafee. Oh, that went quickly; that was the  
23 Dole Amendment.

24 The Chairman. Yes.

25 Senator Chafee. But you also remember we had an

1 amendment -- not "we had," "there was" -- an amendment here,  
2 the Roth Amendment, that passed 12 to 8.

3 Now, you can correct me, Mr. Brockway, but as I recall  
4 that took all the balance of the Danforth Amendment savings,  
5 didn't it?

6 Mr. Brockway. My understanding was that the Danforth  
7 Amendment was an amendment to the Roth Amendment.

8 The Chairman. Yes. Put it the other way around: it  
9 made the Roth Amendment not as expensive as it otherwise would  
10 have been but for the Danforth Amendment.

11 Senator Chafee. Very well phrased.

12 (Laughter)

13 Senator Chafee. But when we get to the bottom line, as  
14 they say, the combination of Roth-Danforth-Dole added how  
15 much?

16 The Chairman. We are \$10 billion off.

17 Senator Chafee. So, I don't want Senator Heinz to  
18 disregard that \$10 billion. That horse has already been  
19 ridden hard and is back in the barn, exhausted.

20 (Laughter)

21 The Chairman. Well, I am prepared to put the motion to  
22 a vote.

23 Senator Mitchell. Mr. Chairman, I would just like to  
24 make one point, because Senator Chafee commented on it and  
25 you also spoke on it.

1           If you want to do something for housing, and the choice  
2 is between this and the builder bonds, in my judgment, with  
3 all due respect, I think this is far more effective at far  
4 less cost.

5           The Chairman. Well, I would disagree with you, in this  
6 sense: If you want to do more for single family housing,  
7 this isn't going to do it at all.

8           We have tailored this bill to low-income housing, and  
9 we have worked with the low-income people. I think between  
10 what we have here and what we will have in the bond proposal,  
11 the low-income housing people, multi-family or otherwise, are  
12 going to be satisfied. The ones that want a little more are  
13 those who are building multi-family middle- and upper-income  
14 housing. But in no event, I think, should the builder bonds  
15 be compared with this, because builder bonds are basically  
16 single-family residences, and most of them are houses of  
17 \$90,000 or less.

18           Senator Mitchell. Not to prolong it, Mr. Chairman, I  
19 would just note that the Coalition for Low and Moderate  
20 Income Housing and the Council for Rural Housing Development  
21 support this amendment.

22           I really feel it is very difficult to make the argument  
23 that the builder bond provision will result in more construc-  
24 tion of homes, particularly when compared to this. And the  
25 cost of this is far lower than that of the builder bond

1 provision. The benefits of that are much more narrowly  
2 focused, and there is a very considerable dispute on whether  
3 they flow through the builders ultimately to home builders.

4 But in any event, I would hope that the committee would  
5 approve the amendment.

6 The Chairman. Is the committee ready to vote?

7 Do you want a rollcall?

8 Senator Heinz. Yes.

9 The Chairman. Rollcall. Clerk, call the roll.

10 The Clerk. Mr. Dole?

11 (No response)

12 The Clerk. Mr. Roth?

13 (No response)

14 The Clerk. Mr. Danforth?

15 Senator Danforth. No.

16 The Clerk. Mr. Chafee?

17 Senator Chafee. No.

18 The Clerk. Mr. Heinz?

19 Senator Heinz. Aye.

20 The Clerk. Mr. Wallop?

21 (No response)

22 The Clerk. Mr. Durenberger?

23 (No response)

24 The Clerk. Mr. Armstrong?

25 (No response)

1 The Clerk. Mr. Symms?  
2 (No response)  
3 The Clerk. Mr. Grassley?  
4 (No response)  
5 The Clerk. Mr. Long?  
6 Senator Long. No.  
7 The Clerk. Mr. Bentsen?  
8 Senator Bentsen. Aye.  
9 The Clerk. Mr. Matsunaga?  
10 (No response)  
11 The Clerk. Mr. Moynihan?  
12 (No response)  
13 The Clerk. Mr. Baucus?  
14 (No response)  
15 The Clerk. Mr. Boren?  
16 (No response)  
17 The Clerk. Mr. Bradley?  
18 (No response)  
19 The Clerk. Mr. Mitchell?  
20 Senator Mitchell. Aye.  
21 The Clerk. Mr. Pryor?  
22 Senator Pryor. Aye.  
23 The Clerk. Mr. Chairman?  
24 The Chairman. No.  
25 Senator Heinz. Mr. Chairman, Senator Symms votes Aye

1 by proxy.

2 The Chairman. And Senator Grassley votes Aye by proxy.

3 Senator Moynihan votes Aye.

4 The Clerk. Seven Yeas, four Nays.

5 The Chairman. The amendment is adopted.

6 Are there amendments to the depreciation section? I  
7 told Senators Durenberger and Boren if there were no more  
8 amendments we would move on to another section until they got  
9 here, because they have two amendments to present and they  
10 are at an Intelligence Committee confirmation hearing right  
11 now.

12 Senator Heinz. Mr. Chairman, excuse me. Are you about  
13 to leave this section?

14 The Chairman. The depreciation section. It depends.  
15 If there are other amendments to be offered now -- if not, I  
16 am going to move off it and go on to accounting, until  
17 Senators Boren and Durenberger get here.

18 Senator Heinz. Mr. Chairman, I have a minor amendment to  
19 this section. I would like to come back. It has to do with  
20 rental tuxedos.

21 The Chairman. Rental tuxedos?

22 Senator Heinz. Yes, Mr. Chairman. They currently get a  
23 5-year life, and if you want to rent a five-year-old rental  
24 tuxedo, well, you are welcome to do so; but the market for  
25 five-year-old rental tuxedos is modest.

1 Senator Moynihan. Are these a productivity property?

2 (Laughter)

3 Senator Heinz. They are manufactured in New York.

4 Senator Moynihan. Even though the Japanese can sell  
5 them things that they have to wear?

6 Senator Pryor. May I ask the Senator, is this a  
7 productive or a non-productive item that you are talking  
8 about?

9 Senator Heinz. Well, in all fairness, I don't want to  
10 get into that dispute. I think what happened was, in 1981  
11 we made a mistake -- I guess we'd better do it.

12 Mr. Chairman, if I may?

13 The Chairman. Yes.

14 Senator Heinz. In 1981, the fact is we made a mistake.  
15 There was one group of people, believe it or not, that we  
16 shafted.

17 (Laughter)

18 Senator Heinz. It's hard to believe that there was  
19 actually somebody who didn't get a good deal in that 1981  
20 tax bill. But we put rental tuxedos into this 5-year  
21 category, and they just don't last five years. So, what I  
22 would like to do is put them into the 3-year category.

23 The Chairman. Do you want to so move?

24 Senator Heinz. I so move.

25 Senator Moynihan. Depreciation ideally should be just a

1 question of fact. What does the Treasury have -- I have to  
2 say I have seen Mr. Darman in a tuxedo which is clearly more  
3 than five years old.

4 (Laughter)

5 Senator Heinz. While they are trying to figure out what  
6 their position is --

7 Senator Bentsen. What I want to know is, was it rented?

8 (Laughter)

9 Senator Heinz. We decided even before the Dole Amendment  
10 that rental cars should have three years. Then Senator Dole  
11 came along and said all cars should get three years.

12 You know, tuxedos are not quite made out of the kind of  
13 steel that cars are made out of. They may wear like iron, but  
14 they are not made out of steel.

15 Mr. Brockway. Senator Heinz, just a point of information.  
16 Would that be three years straight-line, as the cars are, or  
17 three years 150-percent declining balance?

18 Senator Heinz. Three years straight line.

19 Mr. Brockway. The revenue effect of that would be less  
20 than \$100 million.

21 The Chairman. A hundred million?

22 Senator Heinz. Less than.

23 The Chairman. A lot less than a hundred million?

24 Mr. Brockway. Well, it depends. I first thought that it  
25 would have been a lot less, because I thought that most

1 everybody in this business would be expensing these. And  
2 when it came up when we were in markup a week ago, I so  
3 indicated. I have since gotten a letter castigating me from  
4 someone who said that they had far more than \$50,000 worth  
5 of tuxedos that they rent out each year. Evidently renting  
6 tuxedos is a large business, and other clothing.

7 The Chairman. Well, only in this town and in New York,  
8 I guess, could this be an issue.

9 (Laughter)

10 Senator Heinz. Oh, good God, wait a minute.

11 The Chairman. There are some things that we do to make  
12 ourselves look foolish, and then some things that make us look  
13 really foolish.

14 (Laughter)

15 Senator Heinz. Mr. Chairman, I object to that charac-  
16 terization.

17 The Chairman. Well, I don't know.

18 Senator Heinz. You clearly never were a haberdasher. I  
19 want to refer you to Harry Truman.

20 The Chairman. Yes. He went bankrupt because he didn't  
21 have three years depreciation.

22 (Laughter)

23 Senator Heinz. I am glad you understand the situation.

24 The Chairman. Now let me rethink this. Do you mean if  
25 he had had five years he might have been successful and not

1 gone into politics?

2 (Laughter)

3 The Chairman. Productive property, I understand the  
4 debate on it. But gee whiz, this seems outrageous.

5 But anyway, you put the motion -- three years.

6 Senator Long. Couldn't we ask Treasury? The Treasury  
7 ought to know something about this to advise us. I mean,  
8 somebody ought to know something besides the sponsor of the  
9 amendment. What can the Treasury advise us on how long those  
10 tuxedos wear, according to the Treasury? How long do you  
11 think they will last?

12 Mr. Darman. Senator, I am sorry to report we do not have  
13 any definitive data on the use of rental tuxedos or their  
14 lives. I can say that Senator Moynihan kindly referred to my  
15 own tuxedo, and he is correct about it's appearance. But it  
16 is over 17 years old.

17 Senator Long. Well, I have a full dress suit that is  
18 over 30 years old. But I only wear it once a year -- that's  
19 if I get invited to the Gridiron Club.

20 (Laughter)

21 Senator Heinz. A good argument for renting.

22 Senator Long. I have rented tuxedos many times, and may  
23 I say they have developed a new technique? They have  
24 developed a suit-type thing where you can have a waist 50  
25 inches or you can have one 20 inches, and the same thing will

1 fit either way.

2 (Laughter)

3 Senator Long. They have done some fantastic things  
4 about making them adjustable. If you haven't found that out,  
5 I have.

6 Senator Danforth. They figured out the R&D tax credit.

7 (Laughter)

8 Senator Heinz. Senator Long, will you yield?

9 Senator Long. Yes, sir.

10 Senator Heinz. In Texas they not only clean quail in  
11 the rental cars, they do it in tuxedos as well.

12 (Laughter)

13 Senator Long. I am dismayed that the Treasury can't  
14 tell us anything about it; I thought the Treasury knew some-  
15 thing about anything.

16 (Laughter)

17 Mr. Mentz. We can usually make it up.

18 (Laughter)

19 The Chairman. Is the committee ready to vote?

20 Senator Chafee. Mr. Chairman, does this apply to all  
21 rental clothing -- graduation gowns and things like that?

22 The Chairman. Rental tuxedos is what he said.

23 Senator Chafee. Just tuxedos?

24 Senator Heinz. A good question. I only phrased it for  
25 tuxedos, but --

1 The Chairman. The revenue loss has to be way up if it  
2 includes wedding gowns and --

3 Mr. Brockway. I think our assumption was it was all  
4 rental clothing. That is the way I heard it proposed before.

5 Senator Moynihan. Let us say all rental clothing.

6 Mr. Brockway. Retail rental clothing.

7 Senator Long. How much is that going to cost now? Wait  
8 a minute. Maybe we shouldn't have even discussed the matter;  
9 now it is for all rental clothing, I am told. Is that right?  
10 How much will that cost, Treasury?

11 Senator Heinz. I want to apologize. The correct term  
12 I meant to use was "formal wear" which covers tuxedos and  
13 graduation gowns.

14 Senator Long. How about any gown?

15 Senator Heinz. No. I apologize to my colleagues; I was  
16 inaccurate.

17 Senator Moynihan. "Tuxedo" is from Tuxedo Park, New  
18 York.

19 Senator Heinz. It is "formal wear," for formal occasions  
20 such as a graduation or --

21 The Chairman. Is the committee ready to vote? The  
22 Clerk will call the roll.

23 The Clerk. Mr. Dole?

24 (No response)

25 The Clerk. Mr. Roth?

1 (No response)  
2 The Clerk. Mr. Danforth?  
3 Senator Danforth. No.  
4 The Clerk. Mr. Chafee?  
5 Senator Chafee. Aye.  
6 The Clerk. Mr. Heinz?  
7 Senator Heinz. Aye.  
8 The Clerk. Mr. Wallop?  
9 (No response)  
10 The Clerk. Mr. Durenberger?  
11 (No response)  
12 The Clerk. Mr. Armstrong?  
13 (No response)  
14 The Clerk. Mr. Symms?  
15 Senator Heinz. Aye, by proxy.  
16 The Clerk. Mr. Grassley?  
17 Senator Heinz. Aye, by proxy.  
18 The Clerk. Mr. Long?  
19 Senator Long. No.  
20 The Clerk. Mr. Bentsen?  
21 (No response)  
22 The Clerk. Mr. Matsunaga?  
23 (No response)  
24 The Clerk. Mr. Moynihan?  
25 Senator Moynihan. No.

1 The Clerk. Mr. Baucus?

2 (No response)

3 The Clerk. Mr. Boren?

4 (No response)

5 The Clerk. Mr. Bradley?

6 (No response)

7 The Clerk. Mr. Mitchell?

8 Senator Mitchell. No.

9 The Clerk. Mr. Pryor?

10 Senator Pryor. Aye.

11 The Clerk. Mr. Chairman?

12 The Chairman. No.

13 Senator Mitchell. Senator Baucus votes No by proxy.

14 The Clerk. Five Yeas, six Nays.

15 The Chairman. Defeated.

16 Are there other amendments to the depreciation section  
17 other than those that Senators Boren and Durenberger will be  
18 bringing when they come from the Intelligence Committee?

19 Mr. Mentz. Mr. Chairman?

20 The Chairman. Mr. Secretary?

21 Mr. Mentz. I wonder if I might just seek a clarification  
22 on a couple of points in the Roth-Heinz depreciation proposal?  
23 Well, Mr. Heinz has just left, so maybe I am not going to be  
24 able to get clarification.

25 The one issue in particular that I would like to raise is

1 the treatment of leased property, whether leased property  
2 qualifies as "productivity property" if the lessee uses it in  
3 an activity that would qualify it were the lessee to be the  
4 owner.

5 The Chairman. I can't answer your question.

6 Mr. Brockway. The revenue estimates assumed that it would  
7 apply depending upon the user, the same way the present  
8 investment credit rules turn on whether the user of the  
9 property is using it in manufacturing or extraction industry  
10 on the one hand or a retail hand on the other. The same  
11 concept would apply.

12 Mr. Mentz. All right. So, an equipment lessor that  
13 leases property that is used in a manufacturing activity will  
14 qualify as productivity property, as I understand it. Is  
15 that right?

16 Mr. Brockway. That is correct.

17 Mr. Mentz. And how about for the new expensing rule,  
18 the \$40,000 expensing rule, where there is a limitation on  
19 trade or business? Is a lessor who leases equipment entitled  
20 to take that \$40,000 deduction against any other income from  
21 that same trade or business?

22 (Pause)

23 The Chairman. I don't know if they are huddling on an  
24 answer to your question or not. Are you?

25 Mr. Colvin. Yes, Mr. Chairman.

1 If the business is an active trade or business, it would  
2 be eligible for expensing.

3 Mr. Mentz. All right. So, in other words, if the lessor  
4 is in effect himself in an active business -- in other words,  
5 he is not passive; he is managing the equipment -- and he is  
6 a full-time lessor, he would be eligible for the \$40,000  
7 expensing?

8 Mr. Colvin. That is correct.

9 Mr. Mentz. All right.

10 Mr. Wilkins. I assume that is if the lessor is himself  
11 a small business, within the definition of how much he could  
12 place in service?

13 Mr. Mentz. Yes. My question assumed that.

14 What about assets that are not in listed ADR activities?  
15 I assume they are not productivity property; is that correct,  
16 Mr. Colvin?

17 Mr. Brockway. This is an exclusive list. So, it is.

18 Mr. Mentz. It is an exclusive list, yes. That was my  
19 understanding.

20 Is it correct that research facilities can be produc-  
21 tivity property if used in a listed ADR activity?

22 Mr. Brockway. Do you mean the 3-year straight line?

23 Mr. Mentz. Well, let us assume -- if it is 3-year  
24 straight line, it can't be productivity property, right?  
25 That's right. So, it has to be 5-year. But if you have

1 some 5-year property that is a research facility?

2 Mr. Brockway. If it is 5-year property, and it is used  
3 in the appropriate categories, then the treatment would  
4 follow, if I understand the question.

5 Mr. Mentz. Yes. That was my assumption; I just wanted  
6 to make sure that was clear.

7 I assume Senator Durenberger is going to pursue his  
8 amendment on food processing. Is that right?

9 The Chairman. He indicated he is, yes.

10 Mr. Mentz. Well, all right.

11 The Chairman. He will be here later this afternoon to  
12 present it, and Senator Boren on a 5-year life on oil  
13 refineries.

14 Mr. Mentz. Thanks, Mr. Chairman.

15 The Chairman. Are there other amendments on the  
16 depreciation section? Senator Grassley?

17 Senator Grassley. No, I don't think so.

18 The Chairman. All right. Let's move on, then, to the  
19 accounting section, and we will move back to this section  
20 when either Senators Boren or Durenberger get here.

21 (Pause)

22 The Chairman. I am advised also that Senator Wallop will  
23 have an amendment on the depreciation of pipelines.

24 Now let's see if there are amendments to be offered,  
25 because if I recall we have been through this section, John,

1 in terms of discussion, haven't we?

2 Mr. Colvin. That is correct.

3 The Chairman. Are there amendments to the accounting  
4 section?

5 (No response)

6 The Chairman. Let me say this: I actually know of  
7 some. There are at least four. I might ask the committee if  
8 they have any knowledge of any amendments in this area at  
9 all -- and I will tell you which pages in your book it is on.  
10 Start on page 24.

11 On the simplified LIFO for small business, I have had  
12 no requests for any amendments to it at all. And I think it  
13 is generall accepted. Treasury supports it.

14 On page 28, on the repeal for bad debt reserves other  
15 than for banks and thrifts, we get to that at another time.  
16 I have had no interest or suggestion of amendments.

17 On page 28, the retained special rule for the magazines,  
18 paperbacks, and records, I had no interest or requests.

19 And lastly, also on page 29, where we repeal the special  
20 rule for qualified discount coupons, I had no expressed  
21 interest.

22 Senator Grassley. Mr. Chairman, I just heard that you  
23 mentioned banks, and this isn't the time to bring this up now;  
24 but just to protect myself, just in case I would be absent  
25 sometime when that would come up, there is this treatment for

1 banks but another treatment for finance companies.

2 The Chairman. That is correct.

3 Senator Grassley. And I want to raise a point about the  
4 equity of that. You don't have to answer that now; in fact,  
5 it would probably be more appropriate later.

6 The Chairman. We have adopted the Administration's  
7 position on the banks, correct, Mr. Secretary? The bad debt  
8 reserve?

9 Mr. Mentz. That's right.

10 The Chairman. But you are right, it is different than  
11 the Finance Committee's.

12 Senator Grassley. All right. And I want to raise that  
13 issue at that time.

14 The Chairman. Now, are there amendments to the accoun-  
15 ting section?

16 Senator Long. Mr. Chairman, what is the page number in  
17 section 2?

18 The Chairman. Page 26, section 2.

19 Senator Long. There is a provision there. I did not  
20 anticipate any objection, but I have heard from electric  
21 utilities in my state and apparently they are just coming  
22 alerted to the fact that apparently this would create a  
23 problem that they did not anticipate.

24 They maintain that a portion of construction carrying  
25 costs, if they were spun out of equity rather than debt

1 because of a regulatory requirement, should not fall under  
2 these capitalization rules. This is a very complicated area,  
3 and I am not prepared at this point to say whether they are  
4 right or not, but I would like to reserve the right to  
5 reopen this matter.

6 The Chairman. What I am going to try to do is to go as  
7 far as we can on this today. And then -- again, emphasizing  
8 -- on Monday morning we will discuss but have no votes on the  
9 foreign tax provisions. But Monday afternoon I would expect  
10 we would have votes, and I would like to finish up if we can  
11 the accounting section, the depreciation section, and the  
12 employee benefits section, so that we have those behind us.  
13 I think we can do that in a good three hour stretch on  
14 Monday afternoon.

15 Senator Pryor. Mr. Chairman?

16 Senator Chafee. Mr. Chairman?

17 The Chairman. Senator Pryor, then Senator Chafee.

18 Senator Pryor. I would be glad to yield.

19 Senator Chafee. My question was just a timing one. I  
20 missed the first part of your remarks, which were that you  
21 are going to keep going for a while this afternoon on  
22 accounting.

23 The Chairman. I will even come back to depreciation, if  
24 any of the members come back who indicated they had  
25 depreciation amendments.

1 Senator Chafee. Yes. But on Monday afternoon did you  
2 say that we would be voting on -- we can come back to the  
3 accounting on Monday afternoon?

4 The Chairman. We can come back to it, although I am  
5 trying to encourage any members who have amendments to be  
6 here now and offer them. But I would like to wrap up those  
7 three topics that afternoon -- depreciation, accounting, and  
8 employee benefits.

9 Senator Chafee. So, in other words, even though we  
10 don't bring up an accounting amendment today, we have another  
11 shot at it Monday afternoon?

12 The Chairman. Yes. You are not precluded, but I would  
13 like to get as many done today as we can. And again, I would  
14 like to have notice if you have a new one that I don't know  
15 about on Monday.

16 Senator Pryor. Mr. Chairman, I thought that I would be  
17 ready at this time to move forward with an amendment relative  
18 to installment sales on land. And to be honest, we have  
19 given it to the staff and there may be some problems, but in  
20 fact I don't think they are insurmountable. I think if we  
21 can have until Monday, we may be able to work out something,  
22 hopefully where it would be acceptable.

23 So, if I could, I would like to reserve that option until  
24 Monday to move forward in this area.

25 The Chairman. Without objection.

1 Senator Pryor. Thank you.

2 Senator Danforth. As I understand it, Senator Pryor's  
3 suggestion would raise revenue. Is that right?

4 Senator Pryor. It could very well raise revenues in  
5 the long run.

6 (Laughter)

7 Mr. Mentz. In the long run, we are all dead.

8 Senator Danforth. I think, Mr. Chairman, that any  
9 Senator who has a revenue-saver and who puts a horse in the  
10 stable should be able to ride his own horse. That is a major  
11 tool.

12 The Chairman. Any member who has a revenue-saver gets  
13 a priority, gets to come on any day at any time.

14 (Laughter)

15 Senator Chafee. Yes, I think we ought to have ownership  
16 of the savings, and we should have to get permission from the  
17 fellow who garnered the savings before it can be used up.

18 Senator Pryor, were you indicating you were going to have  
19 something on the builder bond?

20 Senator Pryor. No, it is not a builder-bond issue; it  
21 is the installment sales of land. Really, our particular  
22 problem in our part of the country is in the retirement areas,  
23 where people are moving down and they don't even in fact move  
24 to the area; they sell a lot or a piece of land, say for a  
25 small percentage down. The question is: At what point is it

1 taxable?

2 It is not quite like the completed contract, either, that  
3 Senator Danforth has mentioned, but somewhat about a third  
4 cousin to it.

5 The Chairman. Senator Mitchell?

6 Senator Mitchell. Thank you, Mr. Chairman. If you would  
7 like me to do so, I am prepared to offer an amendment now to  
8 the inventory section on behalf of myself and Senator Baucus,  
9 who is necessarily on the floor at this time. I will be glad  
10 to speak to it and then afford Senator Baucus the opportunity  
11 later.

12 The Chairman. Go right ahead.

13 Senator Mitchell. This amendment would exempt whole-  
14 salers and retailers with less than \$5 million in average  
15 annual gross receipts over the prior three years from the  
16 new inventory capitalization rules.

17 The Chairman. I would be prepared to accept that  
18 amendment if you didn't speak any further on it.

19 Senator Mitchell. One time, Mr. Chairman, when I was a  
20 Federal Judge, I was hearing an argument. I had read in great  
21 detail the briefs the night before and had made up my mind  
22 which way to rule. The lawyer in whose behalf I decided to  
23 rule got up and started speaking. After about 30 minutes, I  
24 was waivering.

25 (Laughter)

1           Senator Mitchell. So, I called him up to the bench, and  
2 I said, "Listen, I have already decided to rule in your  
3 favor, but if you keep going, I said, "I think I am going to  
4 go the other way." He walked back to the table and said,  
5 "Your Honor, I rest."

6           (Laughter)

7           Senator Mitchell. So therefore, Mr. Chairman, with  
8 those words, I rest.

9           The Chairman. I think it is a fair provision for this  
10 \$5 million exemption, and I hope, if we grant it, the  
11 committee would stick there and not attempt to expand it to  
12 companies bigger than that. But I think in fairness to  
13 companies that size it is a good provision.

14          Senator Mitchell. Thank you, Mr. Chairman.

15          Senator Grassley. Mr. Chairman, I have been working  
16 with Senator Wallop on an amendment that deals with  
17 depreciation and administrative and general expenses.

18          The Chairman. Excuse me -- of what?

19          Senator Grassley. Well, not in the area he was talking  
20 about.

21          The Chairman. No, I understand that; but I didn't hear  
22 what you said at the end.

23          Senator Grassley. For depreciation and administrative  
24 expenses in this area. But he is not here, and I don't want  
25 to go ahead without his taking the lead on that.

1 The Chairman. Do it on Monday.

2 Senator Grassley. All right.

3 The Chairman. Other amendments to be considered today?

4 Senator Grassley. And I also want to ask Treasury's  
5 judgment. If on page 27, under the Chairman's proposal, item  
6 3, long-term contracts, if the \$10 million figure was \$25  
7 million, can you give us some judgment of what that would  
8 cost?

9 The Chairman. Are you asking on the 10 million or two  
10 years?

11 Senator Grassley. Yes.

12 The Chairman. It is similar, I think, to the Pryor  
13 Amendment. David, is he on the same amendment you are?

14 Senator Pryor. Mr. Chairman, I don't think it is the  
15 same.

16 The Chairman. It is not the same?

17 Senator Pryor. No.

18 Senator Grassley. It is not the same. And I am not  
19 proposing an amendment, Mr. Chairman; I just want to know what  
20 it is going to cost.

21 Mr. Brockway. You are keeping the two years?

22 Senator Grassley. Keeping the two years.

23 Mr. Brockway. But raising it from 10 to 25? That would  
24 be .2, \$200 million.

25 Senator Grassley. Two hundred million, over five years?

1 Mr. Brockway. That is correct.

2 The Chairman. Further amendments?

3 Senator Chafee. Mr. Chairman, I have trouble with item  
4 B on page 24. Under the House bill -- and the Chairman's  
5 proposal is the same as the House bill, essentially, in the  
6 matter I am concerned with -- exceptions are made for the  
7 cash method of accounting for farming business.-- I can  
8 understand that -- to qualified personal-service corporations,  
9 and then these "with an annual gross receipts of \$5 million  
10 or less."

11 The outfit I am concerned with is a service corporation,  
12 a personal-service corporation, but it is publicly-owned.  
13 Now, in this instance it would not qualify under the so-called  
14 "qualified personal service corporations." Is that right?  
15 To be a qualified personal service corporation, it must be  
16 owned by the employees? What, X-percent?

17 Mrs. Paull. Yes, sir.

18 Mr. Brockway. There is no stated percent, but it is  
19 substantially all. So it would be the typical incorporated  
20 law firm or accounting firm.

21 Senator Chafee. Well, listen to this: My problem is I  
22 have got a small corporation with about \$12 million of gross,  
23 which is -- excuse me, what was that figure, the percentage?

24 Mr. Brockway. It is not listed as a particular  
25 percentage, but it is substantially all the stock which is

1 owned by the employees.

2 Senator Chafee. This is not substantially owned; it is  
3 40-percent owned.

4 Now, in order for the company I am interested in to come  
5 into this, because the fact that they cannot use the cash  
6 accounting method is severe to them, what I would like to do  
7 is to look at the cost of increasing the average gross  
8 receipts to something like, say, 15.

9 They have gotten approval from the IRS to use the cash  
10 accounting. Does that make sense, that that would be a form  
11 of restriction?

12 Mr. Brockway. Well, I think, of the total 3.4 that you  
13 raise from putting corporations on to the accrual method from  
14 the cash method, in most of those situations probably the  
15 taxpayer has gotten approval. It is clearly a permissible  
16 method. Right now under present law, if you start out using  
17 the cash method, you can continue to use it, under present  
18 law.

19 Senator Chafee. Well, in other words, the IRS currently  
20 exerts some restraint, I presume, on this. Don't they?

21 Mr. Brockway. Well, the general problem in the area is  
22 that cash method for a business without inventories is a  
23 permissible method under present law; the only time you get  
24 IRS approval is if you are going to switch from another  
25 method -- let's say if you are on accrual and you want to

1 switch to cash, then you would have to get IRS permission to  
2 do that. And in the past they have resisted that; where a  
3 taxpayer was already on a hybrid method on the accrual and  
4 wanted to switch to cash, they have resisted that, even  
5 though another taxpayer in a similar business who started  
6 out in cash could continue to use cash.

7 Senator Chafee. Well, Mr. Chairman, I don't want to take  
8 the committee's time. I will be talking with Mr. Brockway  
9 and seeing if there is a possibility of doing something here.  
10 Then I might possibly have an amendment Monday.

11 The Chairman. Are there other amendments? Other  
12 amendments to consider today?

13 (No response)

14 The Chairman. If not, let me remind the committee  
15 again of our schedule:

16 Tomorrow, Canadian-American Free Trade. Monday morning,  
17 a discussion of the foreign tax provisions in the bill.  
18 Monday afternoon -- and let us start at 1:30 on Monday  
19 afternoon if we could -- votes on depreciation, accounting,  
20 and employee benefits, and try to wrap up those three sections  
21 that afternoon.

22 To the extent that any of you need information from the  
23 Joint Committee or Treasury, if you could get to them this  
24 afternoon and tomorrow and Monday morning, I am sure they are  
25 willing to work over the weekend. It would be helpful.
